Full Description

Students pursuing the Aviation Law and Policy minor gain a deep understanding of existing policy and case law while developing the skills necessary to influence the regulatory process, which establishes and creates new laws and regulations. This minor enhances the student learning experience from a multitude of disciplines (aeronautics, engineering, business, pre-law, etc.), and prepares students to affect change in the air transportation industry from a variety of career fields.

The air transportation industry is one of the most heavily regulated in the U.S. economy. Responsible for more than 10 million jobs and driving five percent of the U.S. gross domestic product (GDP) and nearly \$1.5 trillion in annual economic activity, the industry requires aviation professionals who can readily navigate the complex areas of aviation regulations.
