Full Description

The Ph.D. degree in Special Education is designed to prepare highly qualified, experienced persons for academic faculty and research positions in colleges, universities and research centers, in addition to leadership, administrative and advocacy positions. The program enables students to master a comprehensive field of emphasis in special education; employ intellectual and innovative methods for addressing the needs of exceptional children, youth and adults; and acquire a breadth of understanding of related disciplines that focus on the professional roles of college teaching, research, administration and clinical-, educational- and agency-based services for individuals with exceptionalities.

Students participate in research studies, learn methods for conducting research and design independent and collaborative studies in their specialty area. In addition to conceptualizing, designing, implementing and interpreting research, all doctoral students are also expected to demonstrate competence in teaching at the college level during their doctoral training.
