About This Program

The Exercise Science B.S. program focuses on the scientific study of human movement and exercise, preparing students for careers in fields such as sports performance, rehabilitation, fitness and health promotion. You will learn from experienced faculty members and gain hands-on experience through internships, research opportunities and our state-of-the-art exercise science lab. Read more...

Examples of Possible Careers and Salaries*

Exercise physiologists

- 11.3% much faster than the average
- 19,800 number of jobs
- \$50,280 potential earnings

Physical therapists

- 18.2% much faster than the average
- 258,200 number of jobs
- \$91,010 potential earnings

Additional careers

- Strength and conditioning coaches
- Exercise specialists

Careers requiring additional education

- Pre-physical/occupational
- Therapy/podiatric medicine
- Exercise physiologists
- Physical therapists

Accreditation

Commission on Accreditation of Allied Health Education Programs,
Committee on Accreditation for the Exercise Sciences

National Strength and Conditioning Education Recognition Program

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of proficiency of the English language (unless they meet specific exceptions) through the submission of an English language proficiency test score or by completing English language classes at Kent State's English as a Second Language Center before entering their program. For more information, visit the admissions website for international students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Current Kent State and Transfer Students: Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and earned a minimum 2.000 overall Kent State GPA to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

Transfer students visit the admissions website for transfer students for more information.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Students may be required to meet certain criteria to progress in their program. Any progression requirements will be listed on the program's Coursework tab

- ¹ Students who have successfully completed BSCI 11010/BSCI 11020 or BSCI 21010/BSCI 21020 may use those courses in place of ATTR 25057/ATTR 25058 and EXSC 25057/EXSC 25058.
- ² Students who have successfully completed MATH 12022 or PSYC 21621 may use those courses in place of EXSC 35068.
- ³ EXSC 45065 is strongly recommended for students in the Strength and Conditioning concentration. Students in the Exercise Specialist concentration are required to take both courses; one will fulfill major requirements and the other will fulfill concentration requirements.
- ⁴ A minimum C grade must be earned to fulfill writing-intensive requirement.
- ⁵ If students complete the American Civic Literacy requirement by taking HIST 12061, the course will apply to the Kent Core Humanities category. If they complete it with POL 10101, the course will apply to the general electives.
- ⁶ Students are strongly encouraged to meet with faculty advisor when selecting electives. For students in the Pre-Physical/Occupational Therapy/Podiatric Medicine concentration, a maximum 6 credit hours from the Doctor of Podiatric Medicine degree can be used to fulfill general electives for students admitted to the combined bachelor's/doctoral degree program.

Program Learning Outcomes

Graduates of this program will be able to:

1. Master the scientific and theoretical concepts of physiology critical to an entry-level exercise scientist.
2. Apply the knowledge, skills and abilities needed to assess, motivate and prescribe exercise or strength and conditioning as appropriate for an entry-level exercise scientist.
3. Utilize statistical methods to analyze and interpret data applicable to the exercise science field

Full Description

The Bachelor of Science degree in Exercise Science comprises four concentrations:

- The **Exercise Physiology** concentration prepares students for graduate school in exercise physiology or health care professions.
- The **Exercise Specialist** concentration enables students to prepare for work in the clinical setting, ranging from a career in wellness to cardiac rehabilitation.
- The **Pre-Physical/Occupational Therapy/Podiatric Medicine** concentration prepares students for subsequent graduate school

in these areas. The pre-podiatric medicine track is designed to be a combined program with Kent State University's College of Podiatric Medicine. Successful completion of this program, however does not guarantee acceptance into the Doctor of Podiatric Medicine degree. Please see the Podiatric Medicine doctoral program in the catalog for more information about the application process and acceptance criteria.

- The **Strength and Conditioning** concentration is designed to assist those that wish to pursue a career in the field of strength and conditioning. This may include working with all levels of athletes in a strength and conditioning facility.

The goal of the program is to prepare competent entry-level Exercise Science professionals in the cognitive (knowledge), psychomotor (skills), and affective (abilities) learning domains. Individual course content, objectives, and assessments are structured to achieve this larger goal.
