

PALEONTOLOGY - MINOR

College of Sciences and Humanities
 Department of Earth Sciences
 www.kent.edu/earth-sciences

About This Program

The Paleontology minor provides a comprehensive understanding of paleontology and its interdisciplinary nature. You will gain hands-on experience in the field and the lab while studying a diverse range of topics, including paleobotany, paleoecology and vertebrate paleontology. With the knowledge and skills acquired from this program, you will be well equipped for careers in the field of paleontology or any related field. Enroll now and uncover the secrets of the past.  - In person
- **Location:**
 - Kent Campus
 - Stark Campus

Admission Requirements

Admission to this minor is selective, open only to students who have a minimum 2.000 overall Kent State University GPA. No Kent State University GPA is required if the student is a first semester freshman or transfer student admitted in good standing.

Program Requirements

Code	Title	Credit Hours
Minor Requirement		
ESCI 11042	EARTH AND LIFE THROUGH TIME (KBS)	3
ESCI 11043	EARTH AND LIFE THROUGH TIME LABORATORY (KBS) (KLAB)	1
ESCI 34061	PRINCIPLES OF PALEONTOLOGY	4
Minor Electives, choose from the following:		6-7
ANTH 18630	HUMAN EVOLUTION (KBS)	
ANTH 48810	HUMAN PALEONTOLOGY	
BSCI 30050	HUMAN GENETICS	
BSCI 30275	LOCAL FLORA (ELR)	
BSCI 40163	EVOLUTION	
BSCI 40556	VERTEBRATE ZOOLOGY	
ESCI 41079	ALL ABOUT DINOSAURS	
ESCI 41085	MASS EXTINCTIONS: CAUSES AND CONSEQUENCES	
ESCI 44070	SEDIMENTOLOGY AND STRATIGRAPHY	
ESCI 44072	MARINE PROCESSES	

ESCI 44074	PALEOCEANOGRAPHY	
Minimum Total Credit Hours:		14

Graduation Requirements

Minimum Minor GPA	Minimum Overall GPA
2.000	2.000

- Minimum 6 credit hours in the minor must be upper-division coursework (30000 and 40000 level).
- Minimum 6 credit hours in the minor must be outside of the course requirements for any major or other minor the student is pursuing.
- Minimum 50 percent of the total credit hours for the minor must be taken at Kent State (in residence).

Full Description

The Paleontology minor prepares students to integrate concepts in geology and biology to address issues in conservation paleobiology, historical and current causes of extinctions and evolutionary patterns on geological scales. Scientific knowledge about paleontology is used to inform different areas of formal study such as biological sciences, conservation biology, anthropology, environmental studies, geography and museum and natural history education.

Students in the minor gain broad knowledge of paleobiology and the interplay between the geosphere and the biosphere over geologic time as well as in the Anthropocene. Competencies focus on evolutionary processes over geologic time applied to the interpretation of modern and historic floras and faunas and communication about these issues to policymakers and the public.
