Focus of course is on the concepts, models, and methods for implementation of evidence-based nursing practice at both individual clinician and system levels. Students will learn to design, implement and evaluate processes and programs at the practice and organizational level to improve healthcare outcomes. Leadership attributes necessary to lead change in practice will be discussed. Factors that facilitate and impede implementing and sustaining evidence-based practice are considered.

Prerequisite: NURS 70630; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70640 ADVANCED LEADERSHIP IN HEALTHCARE 3 Credit Hours

Advanced competencies of the doctoral-prepared advanced practice nurse for transformational leadership in healthcare to improve patient and population health outcomes are addressed. Five key leadership competencies including creating and leading change; self-knowledge; strategic vision; interpersonal communication; and organizational effectiveness are presented with examples and case studies. Transcending themes of ethics, research, interprofessional collaboration, creativity, and insuring accountability are addressed throughout the course. Students conduct a self-assessment, and develop and implement individualized action plans for advanced competency in interprofessional healthcare leadership.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70641 EXECUTIVE LEADERSHIP IN NURSING 3 Credit Hours

This course prepares the nurse to serve at the highest level of healthcare organizations. Students will be challenged to develop communication skills that lead to effective interprofessional collaboration across the health care system, design and oversee dynamic practice environments, develop skills to analyze and address complex organizational situations, influence organizational decisions, and lead change through innovation and evidence-based practice to enhance patient/client outcomes while ensuring organizational financial integrity.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70650 ORGANIZATIONAL SYSTEMS 3 Credit Hours

Building on the skills in Advanced Leadership for Healthcare Providers, students will gain an understanding of organizational culture and management structures that contribute to the design and delivery of healthcare. Economic, political and cultural aspects of organizational systems will be discussed.

Prerequisite: NURS 70640; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70651 ADVANCED LEGAL, REGULATORY AND POLICY CONSIDERATIONS FOR NURSE 3 Credit Hours

This course focuses on legal, regulatory, and policy considerations that impact health care delivery. Theory and application are integrated and focus the student on preparing to assume an executive-level doctor of nursing practice role.

Prerequisite: NURS 60020; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70670 QUALITY IMPROVEMENT IN HEALTHCARE DELIVERY 3 Credit Hours

Focus on the design, implementation and evaluation of quality and patient safety initiatives to improve healthcare delivery at the individual patient and system levels. Data necessary to support quality initiatives will be considered as well as policy, legal and ethical implications.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70680 POPULATION HEALTH 3 Credit Hours

Students will explore care delivery models and strategies for health promotion and disease prevention in individuals, aggregates and populations. Gaps in care and healthcare access will be explored, including social, cultural, economic, and policy and political barriers. The role of genomics in healthcare delivery of populations will be discussed. Students will develop skills to design and evaluate health promotion and disease prevention programs.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70685 HEALTHCARE FINANCE AND ECONOMIC POLICY 3 Credit Hours

Students will gain an understanding of healthcare finance, economics and policy on healthcare delivery systems. The impact of current healthcare laws-policies (Affordable Care Act, HCAHPS, and other care delivery and reimbursement strategies) will be discussed. The DNP prepared nurses' role in patient advocacy and policy development will be discussed. Student will gain an understanding of cost-benefit analyses and creating budgets to support the design, implementation and sustainability of healthcare delivery initiatives.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70686 APPLIED ECONOMIC AND FINANCIAL PRINCIPLES FOR THE NURSE EXECUTIVE 3 Credit Hours

Students apply economic, financial principles and the impact of regulation to the development, evaluation and monitoring of health care delivery systems and practice. Theory and application are integrated and focus the student on preparing to assume an executive-level doctor of nursing practice role.

Prerequisite: NURS 70651; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70710 HISTORY AND PHILOSOPHY OF NURSING SCIENCE 2 Credit Hours

This course examines the nature and metaphysics and epistemology and the influence of contemporary Eastern and Western philosophies on the developing epistemology of disciplinary nursing knowledge.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

NURS 70711 SCIENTIFIC WRITING 2 Credit Hours

This courses covers how to conduct several types of literature reviews. Students will conduct a literature review relevant to their research interest, synthesize the literature, identify gaps, and write a synthesis of the literature. Ethical issues and authorship considerations are discussed.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

NURS 70712 RESEARCH DESIGN FUNDAMENTALS 2 Credit Hours

The course focuses on learning fundamental methodological concepts and tools that enable an understanding of research problems and serve as a basis to conduct quantitative and qualitative research. There is emphasis on linking theory and research models to research questions, hypotheses and designs.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

NURS 70713 ADVANCED STATISTICS I 2 Credit Hours

This course focuses on learning introductory descriptive, parametric and non-parametric statistical models. Students learn how to enter, clean, and handle missing data, as well as perform analyses using SPSS. Expected outcomes are a conceptual understanding of statistical models covered in the course, interpretation of output of statistical analyses, and communication of findings in oral and written work.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

NURS 70714 LEADERSHIP FOR NURSING SCIENCE 3 Credit Hours

This course focuses on the development of the nurse scientist as a leader across health care and higher educational systems, as well as in influencing and formulating healthcare policy.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70715 THEORY CONSTRUCTION AND DEVELOPMENT IN NURSING 3 Credit Hours

This course examines strategies for theory development including logical-empirical-deductive and inductive approaches. Emphasis will be on elements and strategies used in theory building.

Prerequisite: NURS 70710; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70716 INNOVATION AND INTERVENTION RESEARCH 3 Credit Hours

The course is designed to introduce innovation and intervention research. The first part of the course will include the development of an innovative measurable intervention resulting in testing the intervention fidelity and usability analysis. The overall goal is to experience the development of an innovative intervention as a small project during the course.

Prerequisite: NURS 70712 and NURS 70713; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70718 ROLES AND EVALUATION 3 Credit Hours

To prepare individuals in their role as an academician in nursing and promote the transmission of science through mentorship and service. This course prepares individuals for the role as nursing faculty. This course also addresses social, legal and ethical issues in nursing education especially related to creating a sense of belonging and addressing structural inequities.

Prerequisite: Doctoral standing.

Pre/corequisite: NURS 70710 and NURS 70715.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70739 RESEARCH IN HEALTH DISPARITIES 3 Credit Hours

This course focuses on the definition, principles, and concepts for health disparities research and minority health outcomes. The goal is to explore the different government agencies that lay the groundwork for the development of the science related to health disparities. In this course, the student will understand some of the social determinants that cause, sustain or mitigate health disparities and how the knowledge will translate into interventions in reducing these disparities.

Prerequisite: NURS 70712, NURS 70713 and NURS 70715; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70740 ADVANCED STATISTICS II 3 Credit Hours

This course provides in-depth knowledge of regression, general linear model, and exploratory factor analysis statistical models. Course outcomes include a conceptual understanding of these models and the ability to conduct and interpret output of statistical analyses and communicate findings in oral and written work. Knowledge of SPSS is required.

Prerequisite: NURS 70713; and doctoral standing.

Schedule Type: Lecture

Grade Mode: Standard Letter

NURS 70741 ADVANCED STATISTICS III 3 Credit Hours

This course focuses on more advanced statistical models used in nursing, including but not limited to, confirmatory factor analysis, path analysis and structural equation modeling. Course outcomes are a conceptual understanding of these models and ability to interpret output of statistical analyses and communicate findings in oral and written work.

Prerequisite: NURS 70740; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70742 ADVANCED QUALITATIVE METHODS FOR HEALTH SCIENCES 4 Credit Hours

Selected qualitative research methods used to study nursing phenomena. Students analyze the following with regard to nursing phenomena: philosophical bases; design, sampling, recruitment, data collection and analysis; evaluation of rigor; and human subjects and ethical issues for major qualitative methods.

Prerequisite: NURS 70710 and NURS 70712; and doctoral standing.

Pre/corequisite: NURS 70715.

Schedule Type: Lecture

Contact Hours: 4 lecture

Grade Mode: Standard Letter

NURS 70743 ADVANCED QUANTITATIVE METHODS FOR HEALTH SCIENCES 4 Credit Hours

This course extends knowledge of quantitative research designs for nursing and focuses on cross-sectional, cohort, and case control studies, and clinical trials. Advanced knowledge of measurement, sampling, data collection and methods to improve quantitative design rigor is covered. There is emphasis on application of course content to a selected research question or hypothesis.

Prerequisite: NURS 70710, NURS 70712 and NURS 70715; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 4 lecture

Grade Mode: Standard Letter

NURS 70744 PROPOSAL DEVELOPMENT 3 Credit Hours

In this course, students critically evaluate existing literature to develop persuasive and methodologically sound arguments addressing at least one critical gap for nursing science. Focus is on study design, scope and feasibility of projects that culminate in a dissertation proposal first draft.

Prerequisite: NURS 70742 and NURS 70743; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Satisfactory/Unsatisfactory-IP

NURS 70753 DATA SCIENCE AND NURSING 3 Credit Hours

This course provides the student a rigorous understanding of informatics at the doctoral level that includes big data with a focus on electronic medical record (EMR) data. Students will learn to identify the principles of health informatics and application. The EMR and other big data sources will be examined to determine patient health outcomes statistically. The goal is to determine the appropriate measurable constructs and analyze the statistically significance for overall patient health outcomes.

Prerequisite: NURS 70712 and NURS 70740; and doctoral standing.

Pre/corequisite: NURS 70741.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70791 VARIABLE CONTENT SEMINAR: EMERGING ISSUES IN NURSING SCIENCE AND RESEARCH 3 Credit Hours

(Repeatable for credit) This seminar course will examine in-depth current scientific trends and emerging topics in nursing research.

Prerequisite: NURS 70742 and NURS 70743; and doctoral standing.

Schedule Type: Seminar

Contact Hours: 3 lecture

Grade Mode: Standard Letter

NURS 70795 SPECIAL TOPICS IN NURSING 2-6 Credit Hours

(Repeatable for credit) Study of important topics in nursing practice, research on the profession. Offering in response to existing interests and opportunities.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 2-6 lecture

Grade Mode: Standard Letter

NURS 70796 INDIVIDUAL INVESTIGATION IN NURSING 1-3 Credit Hours

(Repeatable for credit) Individual enrollment for independent study in nursing carried out by student under supervision of a doctoral faculty member.

Prerequisite: Doctoral standing.

Schedule Type: Individual Investigation

Contact Hours: 1-3 other

Grade Mode: Standard Letter

NURS 70798 RESEARCH IN NURSING 2-5 Credit Hours

(Repeatable for credit) Research activities are carried out by a student under faculty supervision, including but not limited to, data collection, coding, entry and analysis, inter-professional teamwork and preparation and submission of research presentations and manuscripts.

Prerequisite: NURS 70742; and doctoral standing.

Pre/corequisite: NURS 70743.

Schedule Type: Research

Contact Hours: 6-15 other

Grade Mode: Satisfactory/Unsatisfactory

NURS 80199 DISSERTATION I 15 Credit Hours

(Repeatable for credit) Independent doctoral research for the dissertation under faculty supervision. Registration of at least two semesters is required, continuing until completion of 30 credit hours. Akron 8200:899.

Prerequisite: Admission to doctoral candidacy; and doctoral standing.

Schedule Type: Dissertation

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory-IP

NURS 80299 DISSERTATION II 15 Credit Hours

(Repeatable for credit) Continuing registration of research, after initial 30 hours of Dissertation I.

Prerequisite: 30 hours of NURS 80199; and doctoral standing.

Schedule Type: Dissertation

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory-IP

Admission Requirements

- Master's degree in nursing or a doctorate in nursing practice from an accredited nursing program
- Minimum 3.000 graduate GPA on a 4.000-point scale
- Official transcript(s) of all previous graduate coursework¹
- Active, unrestricted registered nurse license in the state in which practicum hours will be completed
- Résumé or curriculum vitae
- Goal statement (no more than 250 words) describing reasons for seeking the certificate in the identified specialty and professional goals
- Syllabi of all courses to be considered for transfer in the gap analysis

- Three letters of reference from health care professionals or faculty members
- English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions to waive) by earning one of the following:²
 - Minimum 79 TOEFL iBT score
 - Minimum 6.5 IELTS score
 - Minimum 58 PTE score
 - Minimum 110 DET score

¹ Transcript(s) must indicate completion of graduate-level courses in advanced pathophysiology, advanced pharmacology and advanced health assessment, with a minimum B grade earned in each course. Applicants who do not meet the grade requirement for advanced pathophysiology, advanced pharmacology and advanced health assessment may be considered for a conditional admission.

For applicants who have not practiced as an advanced practice registered nurse within the two-year period preceding application to the certificate, completion of graduate-level courses in advanced pathophysiology, advanced pharmacology and advanced health assessment must not be greater than five years old at the time of the student's first semester of course registration in the certificate.

² International applicants who do not meet the above test scores may be considered for conditional admission.

Program Learning Outcomes

Graduates of this program will be able to:

1. Meet standards for advanced professional distinction.
2. Assume an advanced role in nursing and for leadership and career advancement.
3. Communicate, integrate and apply advanced nursing knowledge and skills to provide evidence-based, culturally sensitive nursing care and promote quality outcomes in nursing and healthcare.

Full Description

The Adult/Adolescent Sexual Assault Nurse Examiner graduate certificate provides registered nurses the specialized training necessary to be certified as a sexual assault nurse examiner (SANE) for adult and adolescent patients. A SANE provides comprehensive care to victims of sexual assault or abuse. In addition, they conduct a forensic examination and may provide expert testimony if a case goes to trial.

Nurses receive their SANE certification through the International Association of Forensic Nurses, Commission on Forensic Nursing Certification. To be certified, nurses with a minimum of two years of full-time experience must have completed a minimum of 40 hours of sexual assault education; worked under the supervision of an expert (e.g., SANE-certified nurse); performed enough sexual assault exams to demonstrate clinical competency; and successfully passed a certification test.

The certificate's didactic courses will be offered on-ground and online at the Kent Campus, and the practicum experiences will be conducted at the Sexual Assault Evidence Collection and Care Facility of Cleveland Clinic Akron General.

Accreditation

The B.S.N. degree in Nursing at Kent State University is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

New Students

Traditional Admission

Admission to the Nursing major is selective; the process is competitive, and acceptance is never guaranteed. Prospective applicants must have completed:

- High school level mathematics, biology and chemistry.
- In addition, students must have achieved one of the following:
 - Minimum 2.700 overall high school GPA (on a 4.000-point scale); and a minimum 22 ACT composite or a minimum 1100 SAT score; or
 - Minimum 3.0 overall high school GPA (on a 4.000-point scale).

Early Admission

Early admission students are granted admission to the professional nursing sequence as new students provided they meet the early admission criteria and maintain the progression requirements. Students must signify they want to be considered for early admission and agree to declare Kent State as their college of choice. The early admission

program has a limited number of seats, with an emphasis on students who can enhance the College of Nursing's mission to improve healthy living in a diverse, changing society.

Transfer Students

Traditional Admission

Admission to the Nursing major requires a minimum 2.750 overall GPA and completion of 12 college credit hours from an institutional-accredited college or university.

Transfer students who have successfully completed a minimum 12 credit hours at Kent State University will be evaluated on their Kent State overall GPA only, *along with the prerequisite criteria for admission into the Professional Nursing Sequence.*

Direct Admission

Admission to the Professional Nursing Sequence requires meeting prerequisite criteria. Students who have failed out of another nursing program are not eligible for admission to Kent State's B.S.N. degree.

Transfer students from another accredited B.S.N. degree who have completed at least one laboratory or clinical course must have achieved the following for admission to Kent State's B.S.N. degree:

- Minimum 3.200 overall GPA in all college-level coursework
- Minimum 2.750 GPA for the required (or equivalent) science courses in Kent State's B.S.N. degree: BSCI 21010 and BSCI 21020 and BSCI 20021 (or BSCI 30171) and CHEM 10050 (or CHEM 10055 or CHEM 10060)
- Minimum C grade in the following prerequisite courses:
 - Anatomy and Physiology (BSCI 21010 and BSCI 21020)
 - Microbiology (BSCI 20021 or BSCI 30171)
 - Genetics (BSCI 30050 or BSCI 30156)
 - Chemistry (CHEM 10050, CHEM 10055 or CHEM 10060)
 - Math (MATH 10040 or MATH 10041)
- Good academic standing at current college or university

Students who want to be considered for direct admission to Kent State's B.S.N. program must complete the Direct Admission Request.

Admission to the Accelerated Second Degree Concentration

Admission to the Accelerated Second Degree concentration requires a completed bachelor's degree with a minimum 2.750 overall GPA. Students who have failed out of a nursing program are not eligible to apply to the Accelerated Second Degree concentration. Accelerated students must have all college-level core and nursing prerequisite courses complete:

- Anatomy and Physiology (BSCI 21010 and BSCI 21020)
- Microbiology (BSCI 20021 or BSCI 30171)
- Chemistry (CHEM 10050, CHEM 10055 or CHEM 10060)
- Human Growth and Development (NURS 20950)
- Minimum 2.750 overall GPA and minimum 2.750 science GPA
- Minimum C grade in all science and mathematics courses

International Students

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions

to waive) by earning a minimum 71 TOEFL iBT score, minimum 6.0 IELTS score, minimum 47 PTE score or minimum 100 DET score, or by completing the ELS level 112 Intensive English Program. For more information on international admission visit the admissions website for international students.

Progression Requirements

- All students in the B.S.N. degree must have a minimum 2.000 overall GPA each semester to continue in the program; failure to achieve this GPA each semester will result in not permitted to continue in the program.
- All students in the B.S.N. degree must have earned a minimum C grade in each science course required in the B.S.N. curriculum. All required biology and chemistry courses must be successfully completed with a minimum C grade to graduate with the B.S.N. degree.
- Students in the traditional (no concentration) and Accelerated Second Degree concentration must have a minimum C grade in each of the sophomore nursing courses to progress to the junior nursing sequence.
- Students in the traditional (no concentration) program must have a minimum C grade in each of the junior nursing courses (NURS 30010, NURS 30020 and NURS 30035) to progress to the senior nursing sequence.
- All students must have a minimum C grade in each of the senior nursing courses (NURS 40005, NURS 40010, NURS 40020, NURS 40030, NURS 40045 and NURS 40872) to progress and graduate.
- Students in the Accelerated Second Degree and LPN and Allied Health concentrations may take junior- and senior-level courses concurrently as specified by their curriculum.
- Students in the traditional (no concentration) program may take a maximum of two clinical courses each semester.
- Students in the Accelerated Second Degree and LPN and Allied Health concentrations are permitted to take three clinical courses each term, as specified by their curriculum.
- Students in the Accelerated Second Degree and LPN and Allied Health concentrations who do not earn a minimum C grade in any nursing courses will no longer be permitted to take three clinical courses in a semester.

Professional Nursing Sequence

Students are eligible to apply to the Professional Nursing Sequence during the semester in which they anticipate completing or have completed 30 credit hours. Admission to the Professional Nursing Sequence is based on overall GPA and science GPA. Students who completed required prerequisite science courses while in the College Credit Plus (CCP) program may elect to repeat prerequisite science courses to be used in the calculation of the science GPA.

Students must meet all the following requirements to be eligible for admission to the Professional Nursing Sequence:

- Minimum 2.750 overall GPA
- Minimum 2.750 GPA in the required sciences:
 - BSCI 21010
 - BSCI 21020
 - BSCI 20021 or BSCI 30171
 - CHEM 10050 or CHEM 10055 or CHEM 10060
- Minimum C grade in each of the prerequisite courses:
 - BSCI 21010
 - BSCI 21020
 - BSCI 20021 or BSCI 30171
 - CHEM 10050 or CHEM 10055 or CHEM 10060
 - MATH 10040 or MATH 10041
- Candidates who meet the admission criteria for the Professional Nursing Sequence will be selected using a holistic admission process including the individual's personal experiences, attributes and metrics.

Professional Nursing Sequence for LPN and Allied Health Concentration

Students in the LPN and Allied Health concentration will need to complete all core and prerequisite coursework to be admitted to the Professional Nursing Sequence. Admission is competitive and is never guaranteed.

Admission checklist for the Professional Nursing Sequence for students in the LPN and Allied Health concentration:

- Students are eligible to make application during the semester in which they anticipate completing, or have completed the core courses, along with:
 - UC 10001
 - MATH 10040 or MATH 10041 or NURS 31010 or PH 30002 or PSYC 21621
 - SOC 12050 or SOC 22778

Program Learning Outcomes

Graduates of this program will be able to:

1. Meet educational eligibility requirements to take the registered nurse licensing examination (National Certification and Licensure Exam).
2. Acquire competencies based on professional standards to assume the role of the professional nurse and for career advancement, including graduate studies.
3. Provide equitable evidence-based care to diverse populations as a member of a diverse, interprofessional team.

Full Description

The Bachelor of Science in Nursing degree in Nursing prepares practitioners for professional nursing, helps them understand their role in society and prepares them for graduate study. The program emphasizes professional knowledge, skills and compassionate nursing practices. Students begin with courses that demonstrate the core foundations of the nursing profession and its historical roots. The capstone preceptorship exposes students to research and professional-practice concepts that will ensure their abilities to be nurse leaders and healthcare advocates.

Throughout the curriculum, students study life-span and cultural diversity issues while applying evidence-based practice to their profession.

The Nursing major includes the following optional concentrations:

- The **Accelerated Second Degree** concentration is for students who hold a bachelor's degree and wish to pursue the B.S.N. degree in an accelerated manner.
- The **LPN and Allied Health** concentration is a bridge program designed to meet the unique demands of licensed practical nurses, paramedics, respiratory therapists, physical therapy assistants, occupational therapy assistants, field/combat medics and emergency medical technicians.

Professional Licensure Disclosure

This program is designed to prepare students to sit for applicable licensure or certification in Ohio. If you plan to pursue licensure or certification in a state other than Ohio, please review state educational requirements for licensure or certification and contact information for state licensing boards at Kent State's website for professional licensure disclosure.

Program Learning Outcomes

Graduates of this program will be able to:

1. Develop and implement systems-focused care and innovative strategies to promote positive, sustainable health and fiscal outcomes across the healthcare continuum.
2. Provide population-focused, advanced nursing care to diverse populations within a variety of settings based on evidence, ethics, theory and professional standards.
3. Provide leadership and interprofessional collaboration to plan, implement and evaluate programs of care delivery to improve outcomes for individuals, populations and aggregates.
4. Synthesize and translate evidence for implementation and dissemination for equitable, evidence-based and inclusive healthcare outcomes.

Full Description

The Doctor of Nursing Practice degree in Nursing is the terminal degree for nurses who want to advance their knowledge of nursing practice, gain leadership and technology skills and become clinical scholars. Students develop leadership skills to affect health outcomes for individuals and populations by translating scientific evidence into clinical interventions, managing healthcare systems and collaborating with other health care providers.

The Nursing major comprises the following concentrations:

- The **Executive Nurse** concentration prepares nurse leaders for the role of nurse executive at the highest level of healthcare administration.
- The **Systems Leadership** concentration prepares advanced practice and clinical experts to lead interprofessional teams focused on evidence-based practice, quality improvement and translational research.

Program Learning Outcomes

Graduates of this program will be able to:

1. Meet standards for advanced practice certification or other advanced professional distinction.
2. Demonstrate competencies based on professional standards to assume advanced roles in nursing, and for leadership and career advancement, including doctoral study.

3. Communicate, integrate and apply advanced nursing knowledge and skills to provide equitable, evidence-based, inclusive nursing care and promote quality outcomes in nursing and health care.

Dual Degree with Master of Business Administration

Students have the opportunity to complete a dual degree program with the M.B.A. degree in Business Administration and the M.S.N degree in Nursing. A separate application must be submitted for each program. Students can view admission requirements for each program on their respective catalog page.

The M.B.A./M.S.N. dual degree is for experienced nurses whose career goals include assuming middle or executive management positions in health services agencies or in health-related companies, or who are interested in starting their own businesses. It combines the strengths of advanced nursing preparation with the practical management knowledge needed to develop significant leadership capabilities.

¹ MGMT 68051 is required for students who have not worked a minimum of two years, full-time, since obtaining their bachelor's degree.

Full Description

The Master of Science in Nursing degree meets the educational eligibility requirements for national certification in the respective area of study. The degree program can be completed in four to five semesters (two full academic years) for full-time students. Part-time students typically take three to four years to complete the program. Completion of a thesis is optional.

The Nursing major comprises the following concentrations:

- The **Adult Gerontology Acute Care Nurse Practitioner** concentration allows students to attain advanced practice nursing competencies in providing evidence-based care to adults and older adults with complex acute and chronic illnesses. Clinical experiences occur in a variety of acute care settings, including general medical care, emergency care, critical care and specialty practice. Through clinical practicums, students provide direct patient care in collaboration with a team of health professionals to diagnose and treat patients across the continuum of health care services.
- The **Adult Gerontology Clinical Nurse Specialist** concentration fosters acquisition of the needed competencies to care for patients spanning the entire adult to older-adult spectrum. Class and clinical experiences focus on providing advanced nursing care across the health continuum, from wellness to acute care. Students develop competencies across the three spheres of impact: patient/direct care, nurses/nursing practice and organizations/systems.
- The **Adult Gerontology Primary Care Nurse Practitioner** concentration allows students to develop advanced practice nursing competencies in health promotion, risk detection, illness prevention and management of acute and chronic illnesses in adults and older adults. Clinical experiences involve direct care in collaboration with other health professionals to maximize the effectiveness of community and health care system services. Clinical practicums include primary care offices, such as internal medicine and family practice clinics, managed care offices, emergency departments, free clinics and long-term care and occupational health settings.
- The **Family Nurse Practitioner** concentration allows students to acquire advanced practice nursing competencies to provide continuity of health care to persons across the life span, as well as to maximize the effectiveness of community and health care system services through collaboration with other health professionals. Clinical experiences are offered in a variety of ambulatory care settings and specialty clinics in primary care offices, including family practice, internal medicine, managed care offices, emergency departments, long-term care facilities and academic and occupational health settings.

- The **Nurse Educator** concentration allows students to develop in-depth knowledge and expertise in selected areas of nursing practice and the role of the nurse educator. Emphasis of the nurse educator role focuses on best practices in curriculum development, instruction and evaluation that prepare students for teaching within a variety of learning environments in academic and staff professional development settings. Students engage in individualized practicum experiences where they apply content learned throughout the graduate curriculum in both their area of nursing practice and the nurse educator role.
- The **Nursing Administration and Health Systems Leadership** concentration integrates management, leadership and nursing knowledge for students to develop skills and competencies in administration, systems leadership and advanced nursing.
- The **Pediatric Primary Care Nurse Practitioner** concentration focuses on health promotion, illness prevention, risk identification and acute and chronic care of infants, children and adolescents in the primary care setting. Practicum experiences take place in outpatient primary care and specialty settings; the experiences offer the opportunity for students to provide individualized and culturally competent advanced practice nursing care to children within the context of their families.
- The **Psychiatric Mental Health Nurse Practitioner** concentration builds on core advanced practice nursing knowledge. The program focuses on knowledge and skill development in mental health assessment and diagnostic reasoning, prescribing and medication management and advanced therapeutic modalities such as individual, group and family psychotherapy.
- The **Women's Health Nurse Practitioner** concentration prepares students to provide the highest level of primary nursing care for women involving health promotion and disease prevention. Students gain competency in advanced nursing management of common acute and chronic conditions. Students practice in direct care and in collaboration with other health care professionals. Practicum experiences foster development of clinical judgment and primary care skills through faculty mentorship and clinical preceptors in a variety of ambulatory care settings and specialty clinics.

Professional Licensure Disclosure

This program is designed to prepare students to sit for applicable licensure or certification in Ohio. If you plan to pursue licensure or certification in a state other than Ohio, please review state educational requirements for licensure or certification and contact information for state licensing boards at Kent State's website for professional licensure disclosure.

The Nurse Educator and Nursing Administration and Health Systems Leadership concentrations have an optional licensure that is not required in any state.

 - Minimum 110 DET score

¹ A bachelor's degree in a closely related health field may be considered if the applicant has a master's degree in nursing or a D.N.P. degree from an accredited program. A master's degree in a closely related field may

be considered if the applicant has a bachelor's degree in nursing from an accredited program.

² International applicants who do not meet the above test scores may be considered for conditional admission.

Guidelines for the Essay

- Applicants should begin their essay with the "why" for pursuing the Ph.D. degree in Nursing and the "how" this degree will help them achieve their research and professional goals.
 - Introduce the population or phenomenon of interest that will be investigated.
- In the body of the essay, applicants should explain why they are interested in this population and/or phenomenon and how their work will impact or advance science in that area.
 - Consider including scientific gaps and significance in that area of research.
 - Elucidate the effect the research will have on the health outcomes of the proposed population or on those who are affected by the phenomenon on interest.
 - Indicate how the work may reflect diversity, equity and inclusion in the area of research.
- In the closing paragraph, applicants should provide one to two key aspects of their research and propose ways to disseminate their scientific discovery.

NURS 80199 DISSERTATION I ² 30

Minimum Total Credit Hours for Post-Baccalaureate Students 90

Minimum Total Credit Hours for Post-Master's Students 73

¹ Elective courses support the student's research interest and are selected with the approval of the student's academic advisor.

The courses will supplement the student's program of study in a substantive area of research or specific method of research, including advanced statistical approaches, or assist the student with career goals following graduation.

² Each doctoral candidate, upon admission to candidacy, must register for NURS 80199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for Dissertation I, and thereafter NURS 80299, each semester, until all requirements for the degree have been met.

Candidacy Examination

At the conclusion of coursework, students sit for the candidacy examination. The examination provides the basis for evaluation of the student's readiness for completing the dissertation. Students must successfully pass candidacy and a proposal defense before beginning dissertation work.

Progression Requirements

- Students who do not earn a minimum B grade in a course must repeat it and cannot take other courses that require that course as a prerequisite until the course is successfully retaken. Students who do not earn a minimum B grade in the second attempt may be dismissed from the Ph.D. degree.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
-	3.000

- Minimum B grade required in all courses to earn the Ph.D. degree.
- Passage of the candidacy examination
- Submission and successful defense of a dissertation

Students with a D.N.P. degree may receive permission to have coursework waived if supported by the appropriate and recent coursework; however, maximum 12 credit hours may transfer to the Ph.D.. The waiver of each specific course will be determined by the relevant academic department. These students may graduate with less than 72 credit hours but no fewer than 60 total credit hours.

Program Learning Outcomes

Graduates of this program will be able to:

1. Generate new knowledge that contributes to the advancement of health, healthcare and nursing science.
2. Disseminate advances in scientific knowledge.
3. Use collaborative, interdisciplinary and innovative approaches to advance nursing science.
4. Assume leadership roles in healthcare and education as researchers, educators and advanced clinicians.
5. Serve as stewards of the diversity within the body of knowledge for the discipline of nursing.

Program Learning Outcomes

Graduates of this program will be able to:

1. Acquire competencies based on professional standards to assume the role of the professional nurse and for career advancement, including graduate studies.
2. Apply the nursing process in providing evidence-based, culturally sensitive care to promote health and adaptation of individuals, families, groups and communities.

Full Description

The Bachelor of Science in Nursing degree in Nursing for Registered Nurses is for registered nurses (RN) with a diploma or associate degree who are seeking an accredited bachelor's degree in nursing. The completer program is offered fully online for part- and full-time students. Expert faculty and administrators work closely with students to equip them to meet the future challenges of professional nursing and influence the future of health care.

Student may apply early to the M.S. degree in Health Informatics and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

Clinical Education (CLI)

CLI 80200 STANDARDIZED PATIENTS ROTATION 1 Credit Hour

Offers second year students the opportunity to interview standardized patients and receive feedback on their patient interviewing and history recording skills which prepares them to function competently in a doctor/patient encounter. Some students find that interviewing patients comes naturally, while for others it is more a learned skill. The standardized patients are actors who have been coached to simulate actual patients so accurately that the simulation could possibly fool even a skilled clinician.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory

Contact Hours: 4 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80311 WOUND CARE 4 Credit Hours

The clinical rotation provides students with an opportunity to become exposed to the clinical practice of wound care. Students have a unique opportunity to be involved in wound care patient management, which is an essential part of podiatric medical practice. Students develop skills in wound care patient management as well as communication skills. Students also develop cognitive reasoning skills so as to accurately diagnose comorbid conditions and develop treatment plans appropriate for each patient. Students are exposed to a variety of wound pathology during this clinical wound care rotation. A combination of physician-guided patient care and nursing lead discussion groups allow students to be exposed to many topics related to the essentials of wound patient management. Students are able integrate knowledge already gained in the classroom with clinical medicine.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clerkship

Contact Hours: 24 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80312 FOOT AND ANKLE SURGERY I 4 Credit Hours

This rotation is designed as a well-rounded surgical experience involving all appropriate settings, including the surgical clinic, the hospital, the operating room and academic conferences.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clerkship

Contact Hours: 24 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80313 FOOT AND ANKLE SURGERY II 4 Credit Hours

This rotation is designed as a well-rounded surgical experience involving all appropriate settings, including the surgical clinic, the hospital, the operating room and academic conferences.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clerkship

Contact Hours: 24 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80315 SURGICAL SKILLS WORKSHOP 4 Credit Hours

Provides students with the knowledge and hands-on training pertaining to the physical skills that are necessary to perform surgery of the foot and ankle. An effort is made to correlate didactic information learned in the classroom with the rationale behind why many surgical procedures are performed. Adequate demonstration of surgical skills are provided along with practice time and constructive performance feedback.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory

Contact Hours: 16 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80320 RADIOLOGY ROTATION 4 Credit Hours

Clinical rotations function by adapting and applying classroom information to real life, "hands-on" situations. A majority of foot complaints necessitate the taking and the reading of radiographs. As specialists of the foot and ankle, podiatrists are in a unique situation in being able to take and interpret radiographs in their own offices. Radiographic analysis is therefore an integral component of podiatric medical education. The Radiology/Medical Imaging rotation focuses on those skills commonly performed by the podiatrist. This includes positioning and developing radiographs along with recognizing the most common pedal pathologies.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory

Contact Hours: 16 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80351 PODIATRIC MEDICINE/BIOMECHANICS (EUCLID) 4 Credit Hours

Gives students the opportunity to perform primary foot and ankle care under the supervision of the clinical faculty. Students learn basic podiatric palliative care techniques on patients, as well as how to record the findings in the medical record. Students are evaluated on their ability to present the case history, treat the patient and properly record their findings. Students receive clinical conferences on a variety of podiatric medical topics with practical exams in many areas. Two months are spent at the Cleveland Foot and Ankle Institute. One month is spent at the Cleveland VA Hospital. This rotation also provides the student with the opportunity for observation and practice of examination skills required in performing a musculoskeletal and biomechanical evaluation. This involves the development of skill in obtaining a biomechanical/musculoskeletal history, arthrometric evaluation, visual gait analysis and musculoskeletal examination to include muscle strength testing, flexibility and range of motion. The student is also taught, and provided opportunities for practice, various methods of obtaining and evaluating proper biomechanical cast impressions of the feet for the purpose of fabricating orthotic devices. Emphasis in this rotation is on the practice and refinement of clinical evaluation and manual skills.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory

Contact Hours: 16 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80352 PODIATRIC MEDICINE/BIOMECHANICS (INDEPENDENCE) 4 Credit Hours

Gives students the opportunity to perform primary foot and ankle care under the supervision of the clinical faculty. Students learn basic podiatric palliative care techniques on patients, as well as how to record their findings in the medical record. Students are evaluated on their ability to present the case history, treat the patient and properly record their findings. Students receive clinical conferences on a variety of podiatric medical topics, with practical exams in many areas. Two months are spent at the Cleveland Foot and Ankle Institute. One month is spent at the Cleveland VA Hospital. Schedule Type: Clinical Laboratory

Contact Hours: 16 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80365 PRIMARY CARE/VETERANS ADMINISTRATION 4 Credit Hours

This is a one-month rotation at a veteran's health care facility, which emphasizes the skills necessary to function effectively in government health care facilities.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory

Contact Hours: 16 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80370 HISTORY AND PHYSICAL ROTATION 4 Credit Hours

The history and physical rotation is a one month experience in one of the several area hospitals, which is designed to provide experience in history and physical examinations. Each rotation site will provide the same core experiences, (based on the goals and objectives), in patient assessment techniques (i.e., history and physical examination), the understanding of disease processes and management strategies. In addition to the core experiences, each rotation site may add additional exposures and training.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory

Contact Hours: 16 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80380 SIMULATED PATIENTS I 4 Credit Hours

Clinical course offered as part of the core clinical rotations in the third year. Covers general medicine rotation, simulated patients interactions and clinical skills exam exposure.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory

Contact Hours: 4 other

Grade Mode: Satisfactory/Unsatisfactory-IP

CLI 80381 SIMULATED PATIENTS II 4 Credit Hours

Clinical course offered as part of the core clinical rotations in the third year. Covers general medicine rotation, simulated patients interactions and clinical skills exam exposure.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory

Contact Hours: 4 other

Grade Mode: Satisfactory/Unsatisfactory-IP

CLI 80443 SENIOR CLINICAL ROTATION 4 Credit Hours

The senior clinical rotation is designed to maximize student-learning opportunities in a clinical setting. This rotation will take place at the Cleveland Foot & Ankle clinics (Midtown and Independence locations) as well as Cleveland-area Department of Veterans' Affairs locations. Students are assigned to one or more locations for the month.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory, Clerkship

Contact Hours: 40 lecture

Grade Mode: Satisfactory/Unsatisfactory

CLI 80460 CLERKSHIP ROTATION I 4 Credit Hours

Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clerkship

Contact Hours: 4 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80465 CLERKSHIP ROTATION II 4 Credit Hours

CLI 80487 CLERKSHIP ROTATION VIII 4 Credit Hours

Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences. This is an elective rotation that is available in the event that students wish to gain additional experience in a clinical setting prior to graduation.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clerkship

CLI 80490 CLERKSHIP VII 4 Credit Hours

Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experience members of the health care team in Cleveland and around the country. Office and hospital based programs available in almost every state, offer a diversity of clinical experiences. Students are expected to participate in a minimum of five months of external rotations during their fourth year, but are given the opportunity to add elective clerkship rotations. An orientation is conducted and a complete handbook of information is provided to the third year student to assist in this important educational process. This is an elective rotation that is available in the event that students wish to gain additional experience in a clinical setting prior to graduation.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Clinical Laboratory

Contact Hours: 10 other

Grade Mode: Satisfactory/Unsatisfactory

CLI 80521 SENIOR MEDICINE ROTATION I 4 Credit Hours

One month external rotation at an area hospital. Students are instructed in skills, values and knowledge necessary to perform a complete medical history and physical.

Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.

Schedule Type: Clinical Laboratory

Contact Hours: 48 other

Grade Mode: Satisfactory/Unsatisfactory-IP

CLI 80522 SENIOR MEDICINE ROTATION II 4 Credit Hours

One-month external rotation at an area hospital. Students are instructed in skills, values and knowledge necessary to perform a complete medical history and physical.

Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.

Schedule Type: Clinical Laboratory

Contact Hours: 48 other

Community Medicine (CMD)

CMD 80326 PUBLIC HEALTH ADMINISTRATION 3 Credit Hours

Public health administration comprises efforts to improve the health of communities. This course provides an overview for public health administration and practice, including organization, law, legislative relations, financing, workforce issues, leadership, and surveillance.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

CMD 80327 HEALTHCARE LAW AND REGULATION 3 Credit Hours

Healthcare is one of the most heavily regulated industries in the United States. In order to contain spiraling costs, the federal and state governments are focusing on the individual provider conduct in the context of fraud, waste and abuse scrutiny. This course covers the underlying theories behind healthcare law and regulations as well as the specific provisions affecting the organization, delivery, and payment of primary health services. Administrators and clinicians will gain a basic understanding of the regulatory environment and provisions impacting their practice.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

General Medicine (GMD)

GMD 80121 PHYSICAL ASSESSMENT AND DIAGNOSIS 3 Credit Hours

Physiology and physical assessment are coordinated to allow students to integrate the underlying physiologic processes with physical diagnostic findings. Physiologic is a study of the basic concepts of normal organ and organ system function. Emphasis is placed on regulatory functions of each organ or system as well as the contribution of each to the whole body homeostasis. Physical diagnosis combines the patient's symptoms and signs to arrive at a diagnosis of disease. Focus is on total body examination using the traditional processes of inspection, palpation, percussion and auscultation.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Laboratory, Lecture

Contact Hours: .73 lecture, 2.27 lab

Grade Mode: Standard Letter

GMD 80205 INTEGRATIVE PHYSICAL DIAGNOSIS FOR INTERNAL MEDICINE 1 Credit Hour

This is an elective course designed to integrate physical assessment in preparation for training in the internal medicine specialties. This course prepares podiatric medical students to better evaluate patient concerns by symptom, utilize and improve their physical diagnostic skills, and optimize preparation for clinical training experiences in the internal medicine specialties. The course emphasizes concepts and integrates knowledge from traditional science disciplines in the context of clinical application.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Satisfactory/Unsatisfactory

GMD 80216 SECOND YEAR MEDICINE I 4 Credit Hours

Course will provide students a background in general medicine, including cardiovascular, pulmonary, renal, metabolic, hematologic, gastrointestinal, rheumatologic, immunologic and infectious diseases. The information gained by the student will enable the podiatric student to be better prepared for Parts I - III boards, a vital participant in their third- and fourth-year medicine rotations and prepare the student for success in their residency.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 4 lecture

Grade Mode: Standard Letter

GMD 80217 SECOND YEAR MEDICINE II 4 Credit Hours

Course will provide students with a background in general medicine, including cardiovascular, pulmonary, renal, metabolic, hematologic, gastrointestinal, rheumatologic, immunologic, and infectious diseases. The information gained by the student will enable the podiatric student to be better prepared for Parts I - III boards, a vital participant in their third- and fourth-year medicine rotations and prepare the student for success in their residency.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 4 lecture

Grade Mode: Standard Letter

GMD 80314 NEUROLOGY 2 Credit Hours

A comprehensive study of neurological diseases that are pertinent to treatment of the podiatric patient. Includes etiologies, diagnosis and treatment of the neurological diseases.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

GMD 80315 DERMATOLOGY 2 Credit Hours

Series of lectures on dermatologic manifestations of systemic diseases. Includes the etiology, diagnosis, treatment and management of dermatologic disorders.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

GMD 80316 MEDICINE I 4 Credit Hours

The podiatric physician is an integral part of the medical team. The podiatric physician must be able to recognize systemic medical problems that manifest in the lower extremity and interface with other health care professionals for optimal patient care. The podiatric medical/surgical resident must be able to diagnose and treat all medical diseases under the direction of an attending physician in each individual specialty, as does any other medical resident in post graduate training. Medicine GMD 80316 and GMD 80326 are divided into 8 blocks of internal medicine specialties including cardiovascular/pulmonary medicine, endocrinology, hematology/oncology, nephrology, infectious disease, rheumatology/immunology, gastrointestinal medicine, and emergency medicine. GMD 80316 emphasizes Cardiovascular/pulmonary medicine, endocrinology, infectious disease, and rheumatology/immunology. This course prepares podiatric medical students to enter clinical training experiences in the internal medicine specialties. The course emphasizes concepts and integrates knowledge from traditional science disciplines in the context of clinical application.

Prerequisite: None.

Schedule Type: Lecture

GMD 80326 emphasizes emergency medicine, Nephrology, Hematology/Oncology, and Gastrointestinal medicine. This course prepares podiatric medical students to enter clinical training experiences in the internal medicine specialties. The course emphasizes concepts and integrates knowledge from traditional science disciplines in the context of clinical application.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 4 lecture

Grade Mode: Standard Letter

GMD 80327 BEHAVIORAL MEDICINE 1 Credit Hour

Behavioral medicine is a series of lectures on major topics in the area including mood and anxiety disorders, alcoholism, substance abuse, psychoses and pain management. The presentations relate the relevance to the practice of podiatry.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

GMD 80328 WOMEN'S HEALTH 1 Credit Hour

Seminar covering important areas unique to women including pregnancy, contraception, infertility, cardiovascular health, osteoporosis and menopause.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Satisfactory/Unsatisfactory

Podiatric Biomechanics/Orthopedics (ORT)

ORT 80131 BIOMECHANICS I 3 Credit Hours

Biomechanics is a comprehensive course, which stresses normal gait and foot function. Abnormalities in gait of foot mechanics are related to foot pathology.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ORT 80325 SPORTS MEDICINE 2 Credit Hours

Sports Medicine is a comprehensive course. Students gain an understanding of running biomechanics, shoe gear construction and evaluation, and the incidence, etiology, pathomechanics, evaluation and treatment of many lower extremity sports pathologies.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

Preclinical Sciences (PCS)

PCS 80001 COMPREHENSIVE BASIC SCIENCE I 1 Credit Hour

This course will be required for all Pathway I students. Pathway I students are defined as students who fail APMLE Part I on the first attempt and are preparing to take it for the second time. Students who do not take APMLE Part I on the first attempt will be also be required to take this course.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Satisfactory/Unsatisfactory

PCS 80002 COMPREHENSIVE BASIC SCIENCE II 5 Credit Hours

This course will be required for all Pathway II students. Pathway II students are defined as students who fail APMLE Part I on the first and second attempts and are preparing to take it for the third and final time. Eligible students who do not sit for APMLE Part I the first time offered and who fail on their first attempt will be required to take this course as well.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 5 other

Grade Mode: Satisfactory/Unsatisfactory

PCS 80109 HUMAN ANATOMY 6 Credit Hours

The macroscopic anatomy of the upper limb, thorax, abdomen, head and neck, pelvis and perineum of the human body is described, utilizing audiovisual teaching aids and full cadaver dissection. The course is taught using a regional approach, with emphasis on structural and functional relationships. The laboratory instruction includes cadaver dissection supplemented with anatomical prosections, as well as cross-sectional anatomy and computerized educational material.

Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.

Schedule Type: Laboratory, Lecture, Combined Lecture and Lab

Contact Hours: 4 lecture, 4 lab

Grade Mode: Standard Letter

PCS 80110 EMBRYOLOGY 2 Credit Hours

This course will cover the major events and processes involved in normal and abnormal embryologic development of the major body organs and systems.

Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

PCS 80112 CELL AND TISSUE 5 Credit Hours

Histology is the study of the microscopic organization of the human body. Reciprocal relationships between normal structural features and their functions are emphasized. Macromolecules, organelles, cells, fundamental body tissues and organs are compared and contrasted. Light microscopic preparations are examined in laboratories, which are closely correlated with lecture topics.

Prerequisite: Student must be enrolled in the podiatric medicine program.

Schedule Type: Laboratory, Lecture

Contact Hours: 3 lecture, 1 lab, 1 other

Grade Mode: Standard Letter

PCS 80113 STAYING ALIVE 5 Credit Hours

The study of the physical and chemical properties of the major constituents of cells and body fluids. This includes structures, functions and biochemical mechanisms involved in the biosynthesis, utilization and degradation of amino acids, carbohydrates, lipids, proteins and nucleic acids. Also included are enzyme kinetics, bioenergetics, cellular communication, nutrition and biochemistry of specialized tissues and fluids.

Prerequisite: Student must be enrolled in the podiatric medicine program.

Schedule Type: Lecture

Contact Hours: 3 lecture, .5 lab, 1.5 other

Grade Mode: Standard Letter

PCS 80118 MEDICAL GENETICS 2 Credit Hours

This course provides basic principles of human genetics dealing with genetic variations and anomalies that impact medical practice. Molecular genetics, cytogenetics, genomics, and population genetics will be reviewed.

Prerequisite: Student must be enrolled in the podiatric medicine program.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

PCS 80119 HUMAN ANATOMY AND EMBRYOLOGY 8 Credit Hours

The human upper limb, head and neck, thoracic, abdominal and pelvic anatomy is explored through lecture, audiovisual aids and cadaver dissection. The material is presented in a regional approach, with emphasis on structural and functional relationships, and is correlated with cadaver dissection. In addition, early events in human embryology are presented and discussed followed by coverage of regional and system-based events during embryological and fetal development. Anatomical and embryological topics are correlated throughout the course.

Prerequisite: Student must be enrolled in the podiatric medicine program.

Schedule Type: Combined Lecture and Lab

Contact Hours: 6 lecture, 4 lab

Grade Mode: Standard Letter

PCS 80121 NEUROMUSCULAR SYSTEMS 5 Credit Hours

Neuromuscular Systems covers the microanatomy, structures, pathways, connections, biochemistry and physiology of the nervous and muscular (both skeletal and smooth) systems. Students must be first year podiatric students taking Spring semester courses. Students must be first year podiatric students taking Spring semester courses.

Prerequisite: Student must be enrolled in the podiatric medicine program.

Schedule Type: Lecture

Contact Hours: 5 lecture

Grade Mode: Standard Letter

PCS 80122 CARDIOVASCULAR SYSTEM 3 Credit Hours

Cardiovascular System covers the microanatomy, structures, biochemistry and physiology of the heart, blood vascular and lymphatic systems. Students must be first year podiatric students taking Spring semester courses.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PCS 80123 RENAL AND RESPIRATORY SYSTEMS 3 Credit Hours

Renal and Respiratory Systems covers the microanatomy, structures, pathways, connections, biochemistry and physiology of the renal and respiratory systems. Students must be first year podiatric students taking Spring semester courses. Pre/corequisites: None Corequisites: None

Prerequisite: Student must be enrolled in the Podiatric Medicine program.

Schedule Type: Lecture

Contact Hours: 45 lecture, 0 lab, 0 other

Grade Mode: Standard Letter

PCS 80124 LOWER EXTREMITY ANATOMY 8 Credit Hours

Lower extremity anatomy presents the detailed macroscopic anatomy of the lower limb. The course is augmented with radiographs, MRI, surface anatomy and cross sectional studies. The course includes an introduction to basic concepts of podiatric medicine, surgery and biomechanics. Laboratory instruction includes a detailed dissection of the lower limb, supplemented with computerized educational materials and study of natural bone specimens.

Prerequisite: Student must be enrolled in the podiatric medicine program.

Schedule Type: Laboratory, Lecture

Contact Hours: 4 lecture, 4 lab

Grade Mode: Standard Letter

PCS 80128 MEDICAL MICROBIO/IMMUNOLOGY 6 Credit Hours

This course will introduce the student to the basic concepts, characteristics and techniques used in the study of the clinically significant microbic groups: viruses, bacteria, fungi, and protozoa. The structure, metabolism, genetics, control and laboratory techniques of each microbic group will be described. The roles and outcomes of these organisms in producing manifestations of human infection and disease will be investigated. This course will also introduce the student to the molecular, cellular and organismal mechanisms responsible for the human immune response system. Laboratory will provide hands on experience in staining, cultivation, identification, sensitivity testing, and immunologic techniques.

Prerequisite: Student must be enrolled in the podiatric medicine program.

Schedule Type: Combined Lecture and Lab

Contact Hours: 5 lecture, 1 lab

Grade Mode: Standard Letter

PCS 80218 HUMAN SYSTEMS PATHOLOGY I 8 Credit Hours

The study of disease with emphasis on epidemiology, pathogenesis, natural history, morphologic appearance and relationship to clinical manifestation. Emphasis is placed on basic cellular pathologic processes (injury, inflammation and repair, neoplasia), and description of diseases organized by organ system. An introduction to the concepts of clinical decision making through the use of case studies and current clinical literature will be emphasized.

Prerequisite: Student must be enrolled in the podiatric medicine program.

Schedule Type: Lecture

Contact Hours: 8 lecture

Grade Mode: Standard Letter

PCS 80219 PHARMACOLOGY AND THERAPEUTICS I 4 Credit Hours

Historically, the clinician was responsible for information about the sources, physical and chemical properties, compounding and dispensing of drugs. Today the practitioner's responsibility requires the rational clinical use of therapeutic agents for the prevention, diagnosis, and treatment of disease based on an understanding of pharmacological principles. This course is designed to prepare practitioners to prescribe for maximum benefit and to recognize the clinical ramifications of concomitant drug therapy.

Prerequisite: Student must be enrolled in the podiatric medicine program.

Schedule Type: Lecture

Contact Hours: 4 lecture

Grade Mode: Standard Letter

PCS 80228 HUMAN SYSTEMS PATHOLOGY II 8 Credit Hours

The study of disease with emphasis on epidemiology, pathogenesis, natural history, morphologic appearance and relationship to clinical manifestation. Podiatric Medicine (PMD)

PMD 80113 MEDICAL ETHICS 1 Credit Hour

The focus of the medical ethics curriculum is to provide a foundation in ethical analysis, augment knowledge of contemporary bioethics issues, and offer experience applying ethical reasoning to clinical cases. The goal of this course is to promote discussion of the ethical responsibilities of a doctor to their patients.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

PMD 80114 PRINCIPLES OF MEDICAL RESEARCH 1 Credit Hour

It is important for a podiatric physician to have developed the ability to read and interpret the medical literature. This requires a fundamental understanding of biostatistics, epidemiology, and research design. This course provides a framework for the development of an evidence-based methodology to patient care.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

PMD 80117 PODIATRY, PROFESSIONALISM AND SOCIETY I 1 Credit Hour

The subject matter is relevant but nontraditional in nature with respect to classic medical education. Some of the topics covered are sometimes considered "soft topics" covering a wide range of subjects that podiatric medical students encounter in their personal, academic and professional careers. Students will participate in discussions and projects on ethics, socio-behavior and issues, and practice related topics such as professionalism, communication, empathy, and time and financial management. Other topics related to the National Board Examinations, personal health, and team-based healthcare system will also be covered. Ultimately, students will develop a more unique level understanding and appreciation of the above referenced themes as they advance their learning. An emphasis on academic and personal wellness in the first year of podiatric medical school is the focus of this course.

Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Satisfactory/Unsatisfactory

PMD 80132 LOW EXTREMITY ASSESSMENT AND DIAGNOSIS 2 Credit Hours

A comprehensive approach to physical examination, which combines the patient's symptoms and the physical signs to arrive at a diagnosis of disease. It is accomplished by training students in the methods of history taking and physical examination. The course focuses on lower extremity examination. The traditional processes of inspection, palpation, percussion and auscultation are emphasized.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

PMD 80133 INTRODUCTION MEDICAL IMAGING 1 Credit Hour

Podiatric physicians are fully licensed to order, perform and interpret radiologic studies of the foot and ankle. As operators of ionizing x-ray equipment, all practitioners must undergo basic training in x-ray physics, image control and quality assurance, safety and patient positioning. These four building blocks comprise the foundation of this course in fundamentals.

Prerequisite: Student must be enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

PMD 80211 PODIATRIC MEDICINE I 2 Credit Hours

This is a core course designed to present the 2nd year student with the full spectrum of pathology, which he or she will encounter during his or her clinical training and later in private practice. Topics include infectious disease, wound care, rheumatology, vascular medicine, and the diabetic foot. The student will be instructed in the evaluation of foot and ankle pathology including signs, symptoms, and differential diagnosis. Laboratory and radiographic evaluation will be discussed when appropriate. The student will also be instructed in the treatment alternatives available in each case.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

PMD 80221 PODIATRIC MEDICINE II 2 Credit Hours

This is a core course designed to present the 2nd year student with the full spectrum of pathology, which he or she will encounter during his or her clinical training and later in private practice. Topics include infectious disease, wound care, peripheral neuropathy, vascular medicine, and the diabetic foot. The student will be instructed in the evaluation of foot and ankle pathology including signs, symptoms, and differential diagnosis. Laboratory and radiographic evaluation will be discussed when appropriate. The student will also be instructed in the treatment alternatives available in each case.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

PMD 80222 PODIATRIC MEDICAL SKILLS 2 Credit Hours

Podiatric Medical Skills is a practical course, which includes strapping and padding, instrument dexterity, local anesthetic injection, nail avulsion technique, blood glucose finger stick, handheld Doppler exam, fitting for diabetic shoes, arthrometric examination and casting for orthoses. Students are taught the indications and proper application of adhesive bandages and splints for the prevention of injury, control of foot function and treatment of injuries to the foot and lower extremity. Padding is the treatment of foot pathology by redistribution of weight, stress and friction. Students are taught how to relieve acute and chronic pathologies of the foot through the use of various padding materials, or prefabricated pads. Students also gain an understanding of the theory of pad placement. Students are taught the proper techniques for performing toenail avulsions, blood glucose finger sticks, and using the handheld Doppler. Students are taught the proper methods of fitting for diabetic shoes, performing a foot and ankle arthrometric examination and casting methods for foot orthoses.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Laboratory

Contact Hours: 2 lab

Grade Mode: Satisfactory/Unsatisfactory

PMD 80317 PODIATRY, PROFESSIONALISM AND SOCIETY III 1 Credit Hour

The subject matter is functionally relevant but nontraditional in nature with respect to classic medical education. Topics cover a wide range of subjects that podiatric medical students encounter in their academic and professional careers. Students will participate in discussions and projects on ethics, socio-behavior, and practice related topics such as professionalism, communication, and time and financial management. Other topics related to personal health and the changing healthcare system will also be covered. Ultimately, students will develop a more unique level understanding and appreciation of the above referenced themes as they advance their learning. The content will be relevant to the third year podiatric medical school student.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Satisfactory/Unsatisfactory

PMD 80318 PEDIATRICS 2 Credit Hours

Pediatrics is a comprehensive course, which introduces general pediatric pathologic processes, pediatric H&P, and emphasizes the incidence, etiology, pathomechanics, evaluation and treatment of common lower extremity pathology in children.

Prerequisite: This course has prerequisites of successful completion of all 1st and 2nd year curriculum in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

PMD 80396 INDEPENDENT STUDY 5 Credit Hours

Independent study in Podiatric Medicine.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Individual Investigation

Contact Hours: 5 other

Grade Mode: Satisfactory/Unsatisfactory

PMD 80417 PODIATRY, PROFESSIONALISM AND SOCIETY IV 4 Credit Hours

The subject matter is functionally relevant but nontraditional in nature with respect to classic medical education. Topics cover a wide range of subjects that podiatric medical students encounter in their academic and professional careers. Students will practice self-directed learning while preparing for graduation. There will be discussions and projects in various areas such as ethics, social behavior, as well as practice related topics such as professionalism, communication, business, and courtroom law/malpractice. Other topics related to personal health and the changing healthcare system will also be covered. Ultimately, students will develop a more unique level understanding and appreciation of the above referenced themes as they finalize their DPM degree program. The content will be relevant to the fourth year podiatric medical school student.

Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.

Schedule Type: Lecture

Contact Hours: 4 lecture

Grade Mode: Satisfactory/Unsatisfactory

PMD 80495 ST PODIATRIC GEN MED 1-4 Credit Hours

(Repeatable for maximum 8 credit hours) The special topics course is to sample new offerings on various topics.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 1-4 lecture

Grade Mode: Standard Letter

Podiatric Surgery (SUR)

SUR 80221 INTRODUCTION TO PODIATRIC SURGERY 2 Credit Hours

This course is designed to provide the 2nd year podiatric medical student with a comprehensive understanding of the basic and fundamental principles and techniques of surgery, with emphasis on wound healing, closure techniques, hemostasis, lower extremity tourniquets and basic surgical procedures. Surgical and hospital protocol, charting, instrumentation and injection techniques are taught in this course, along with basic forefoot surgery, including nail disorders, soft tissue, skin tumors and digital surgery. The use of local anesthetic agents including indications, classification, pharmacology, adverse reactions (and treatment of such reactions) and injection techniques will be discussed. In addition, the course provides an orientation to operating room protocol, allowing students to master necessary techniques of asepsis, gowning, gloving and surgical scrubbing. Introduction to these skills will be taught in weekly workshops in the surgical skills lab.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

SUR 80313 PODIATRIC SURGERY 2 Credit Hours

A comprehensive working knowledge of common deformities of the foot is essential to the podiatric physician in providing comprehensive care of patients. This course provides the 3rd year podiatric medical student with the knowledge of surgical management of patients and their foot deformities. The course includes material on the etiology, clinical and radiographic evaluation, indications and contraindications, as well as postoperative considerations and care. These courses discuss the surgical management of deformities of the foot, ankle and lower leg and include surgical complications. In addition, several lectures are dedicated to special topics, such as AO/ASIF Fixation, Bio-materials, Arthroscopic surgical procedures and reconstructive foot and ankle procedures. Weekly skills workshops will be held in the surgical skills laboratory. Emphasis is placed on current and prevailing concepts and techniques employed by the podiatric physician.

Prerequisite: Enrolled in the college of podiatric medicine.

Schedule Type: Lecture

Contact Hours: 2 lecture

Grade Mode: Standard Letter

SUR 80323 PODIATRIC SURGERY 2 Credit Hours

A comprehensive working knowledge of common deformities of the foot is essential to the podiatric physician in providing comprehensive care of patients. This course provides the 3rd year podiatric medical student with the knowledge of surgical management of patients and their foot deformities. The course includes material on the etiology, clinical and radiographic evaluation, indications and contraindications, as well as postoperative considerations and care. These courses discuss the surgical management of deformities of the foot, ankle and lower leg and include surgical complications. SUR 80325 TRAUMATOLOGY 2 Credit Hours

The purpose of the course is to provide the 3rd year podiatric medical students with a broad overview and appreciation of the major trauma areas of the foot, including the midfoot, rearfoot, ankle and lower leg. A strong effort is made to correlate the mechanical, surgical, physiologic and anatomic principles of surgery with emphasis on their implications and applications in major reconstructive surgery and the management of the trauma patient who presents with foot and or ankle trauma. Surgical procedures for the management of specific trauma situations will be discussed, as well as indications, contraindications, and post-operative management. An overall view of the trauma patient as viewed in a Level I trauma center will also be included as this is a major responsibility for the podiatric physician treating the trauma patient.

Prerequisite: Enrolled in the college of podiatric medicine.

Admission Requirements

Kent State's College of Podiatric Medicine participates in the American Association of Colleges of Podiatric Medicine Application Service (AACPMAS). Candidates to Kent State's D.P.M. degree apply and submit materials to AACPMAS.

- Minimum 90 semester credit hours (or minimum 135 quarter hours) of undergraduate coursework, including the following prerequisites:
 - 6 semester credit hours (or 9 quarter credit hours) of English
 - 8 semester credit hours (or 12 quarter credit hours) **each** of biology, physics, organic chemistry and general/inorganic chemistry¹
- Official transcript(s)
- Medical College Admission Test (MCAT)² or Dental Admission Test (DAT) scores
- Two letters of recommendation:
 - one letter from a faculty member, advisor or composite letter from a pre-medical advisory committee
 - one a letter from a doctor of podiatric medicine or other medical professional
- Interview
- English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions to waive) by earning one of the following:³
 - Minimum 94 TOEFL iBT score
 - Minimum 7.0 IELTS score
 - Minimum 65 PTE score
 - Minimum 120 DET score

Nearly all of entering D.P.M. students will have earned a bachelor's or advanced degree prior to matriculation; however, students may be granted admission with the required undergraduate coursework (90 semester credit hours or 135 quarter credit hours) and prerequisites completed.

See the policy on Technical Standards and Essential Requirements for Student Education in the College of Podiatric Medicine.

¹ All science coursework must include labs, when applicable. In addition, the following classes are recommended: biochemistry, histology, anatomy and physiology, neurobiology and microbiology.

² Scores must be within three years of the application date. Candidates may apply to the D.P.M. degree before taking the MCAT; however, the college will not be able to take final admissions action until official MCAT scores are received by the application service (AACPMAS). Candidates should plan on taking the MCAT no later than May of the year they plan to matriculate.

³ International applicants who do not meet the above test scores will not be considered for admission.

Application Deadline

• Fall Semester

- Final deadline: June 30

Applications will not be accepted after this deadline.

- ¹ Students take 1 credit hour of CLI 80200 in either fall or spring semester.
- ² Students take 36 credit hours of third-year clinical in either fall or spring semester and follow a class rotation.
- ³ Students are separated into groups with a different rotation each month. Students are permitted to take one clerkship month off as an elective month. CLI 80486 and CLI 80487 are elective clerkship rotations available to students who wish to gain further clinical experience on top of the required six clerkship rotations. Please note, once a student registers for these electives, the required minimum total credit hours for the student will increase by 4 credit hours for each elective. PMD 80495 may be available for students to take as an elective on top of the program requirements.
- ⁴ For the fourth-year clinical, students take courses not taken during their third-year summer term.

Program Notes

- Students placed in Pathway I (due to one failure on the American Podiatric Medical Licensing Examination, APMLE Part I) are required to take PCS 80001, increasing the minimum total credit hours by 5 credit hours. Students not taking APMLE Part I on the first attempt are also required to take this course.
- Students placed in Pathway II (due to two failures on the American Podiatric Medical Licensing Examination, APMLE Part I) are required to take PCS 80002, increasing the minimum total credit hours by 5 credit hours. Students not taking APMLE Part I on the second attempt are also required to take this course.
- GMD 80205 is an elective open to all second-year students. Please note, once students register for this course, the required minimum number of credit hours increases by one credit hour.

Progression Requirements

Students whose first semester of coursework in the D.P.M. degree is fall 2016 or later are required to meet the following minimum overall GPA during the first and second year:

- 2.500 overall GPA at the end of first year, fall semester
- 2.500 overall GPA at the end of first year, spring semester
- 2.500 overall GPA at the end of first year, summer term
- 2.500 overall GPA at the end of second year, fall semester
- 2.400 overall GPA at the end of second year, spring semester

Students falling below the minimum overall GPA following their first year (fall, spring and summer) or their second year (fall semester) are required to participate in mandatory academic counseling. Students below the minimum 2.400 overall GPA at the end of their second year (spring semester) will be academically dismissed with the right to appeal for reinstatement, provided that the student has not previously been dismissed (academic or otherwise) from the College of Podiatric Medicine.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
-	2.400

A candidate for the degree of Doctor of Podiatric Medicine must have:

- Maintained satisfactory academic performance with no grade below a C or S (satisfactory)

- Demonstrated clinical competence through completion of the performance objectives
- Been verified as being in good disciplinary standing
- Satisfactorily completed all academic requirements, including all courses, clinical rotations and externship/clerkship program requirements, and the required Observed Structured Clinical Examination (OSCE)
- Fulfilled all responsibilities and financial obligations to the college and university
- Demonstrated moral and mental competency to practice podiatric medicine
- Taken and passed the American Podiatric Medical Licensing Examination (APMLE) Part I, and have taken (APMLE) Part II and released the score reports to the college

Attendance at the graduation ceremony is required for the degree. To be eligible for graduation in May, candidates must have met all of the above requirements by the conclusion of their fourth-year summer term.

All students must successfully complete the graduation requirements within six academic years of their initial matriculation. Exceptions for students with extenuating circumstances must have the approval of the Council on Podiatric Medical Education (CPME).

There is no contract stated or implied, between the college and the students that a degree will be conferred at any stated time, or at all.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate the ability to recall and apply current and emerging knowledge of human structure, function, development, pathology, pathophysiology and psychosocial development to patient care.
2. Provide effective patient-centered care that is compassionate and appropriate for prevention and treatment of medical conditions, which promotes overall health with special emphasis on the lower extremity.
3. Demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families and health professionals.
4. Demonstrate professionalism in medicine.
5. Apply scientific methods and utilize clinical and translational research to further the understanding of contemporary podiatric medicine and its application to patient care.
6. Demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call on other resources to provide optimal and cost-effective health care.
7. Demonstrate an understanding of common societal problems (e.g., issues of addiction or abuse) and their impact on patients.

Full Description

The Doctor of Podiatric Medicine degree prepares students for the podiatric medicine field. The podiatric physician is a health professional who is involved with examination, prevention, diagnosis and treatment of foot disorders by physical, medical and surgical means. A podiatric medicine doctor is trained to detect the signs of systemic disease which

may appear first in the lower extremity, such as diabetes or circulatory disorders. When such diagnoses are made, the podiatric physician consults with the patient's family doctor concerning the systemic disease.

A career in podiatric medicine can include the areas of primary care, surgery, orthopedics, sports medicine, geriatrics and pediatrics.

Podiatric Medicine students have the opportunity to combine the D.P.M. degree with either the Master of Business Administration or Master of Public Health degree and double count courses toward both degrees.

Mission of the College

The mission of the College of Public Health is to advance public health by preparing leaders, scientists and practitioners to collaborate with community partners in conducting impactful research and practice to solve public health challenges.

Kent State University's College of Public Health was established in 2009 to educate and prepare students to meet the current and projected shortage of public health professionals in Ohio and the nation. It is one of only two schools of public health in Ohio and the first to offer a Bachelor of Science in Public Health degree. In addition to the bachelor's degree, the college also offers Master of Public Health degrees in Biostatistics, Epidemiology and Public Health; a Master of Science degree in Clinical Epidemiology; a Doctor of Philosophy degree; graduate certificates in Clinical Research, Healthcare Compliance and LGBTQ+ Public Health; and combined bachelor's/master's degree programs. The academic programs integrate theory and practice to equip graduates with the knowledge and skills to address and solve the health challenges of the 21st century. Faculty engage in innovative research that seeks answers to some of society's most challenging public health issues. Partners include local health departments, community organizations, health care institutions and businesses; those partnerships provide students with applied practical experiences in public health.

Biostatistics (BST)

BST 50196 INDIVIDUAL INVESTIGATION IN BIOSTATISTICS 1-3 Credit Hours

(Repeatable for maximum 6 credits) Individual graduate investigation or research in areas related to biostatistics.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Individual Investigation

Contact Hours: 1-3 other

Grade Mode: Standard Letter-IP

BST 52019 BIOSTATISTICS IN PUBLIC HEALTH 3 Credit Hours

Provides students with an understanding of basic statistical methods in public health research, as well as the skills to perform and interpret basic statistical procedures. Students learn how to use statistical analysis software to analyze real data from public health-related studies. They then learn how to interpret the analysis and present the results to public health professionals and educated lay audiences. Includes lab component that enhances student awareness and informed usage of the statistical software SAS for public health analysis. Students learn how to input, read, store, export and modify data in SAS and be able to use common SAS procedures to analyze public health data and conduct independent SAS programming.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

BST 60010 USING R IN PUBLIC HEALTH 1 Credit Hour

(Slashed with BST 70010) Students learn the role of the computing software R for data analyses. The course covers the basics of R including how to organize and clean data and how to display data visually. Students understand how to perform descriptive and inferential statistics using R.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

BST 60011 USING SAS IN PUBLIC HEALTH 1 Credit Hour

(Slashed with BST 70011) Students learn the role of the computing software SAS for data analyses. The course covers the basics of SAS, including importing data, organizing and cleaning the data and using different procedures. Students understand how to perform descriptive and inferential statistics using SAS.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

BST 60012 USING EXCEL IN PUBLIC HEALTH 1 Credit Hour

(Slashed with BST 70012) An introduction to using Excel in the field of public health. Students learn the skills to analyze and present data, including using formulas, pivot tables, graphs and the data analysis toolpak.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

BST 60191 VARIABLE CONTENT SEMINAR IN BIOSTATISTICS 1-3 Credit Hours

(Repeatable for credit) Seminar on current and important topics in biostatistics. Subject matter varies depending on the topic.

Prerequisite: Graduate standing.

Schedule Type: Seminar

Contact Hours: 1-3 other

Grade Mode: Standard Letter

BST 60192 APPLIED PRACTICE EXPERIENCE IN BIOSTATISTICS 3,6 Credit Hours

(Repeatable for credit) Observational and participation in public health activities of a public health agency, hospital or other approved organization. The student completes the field experience with joint supervision from the university and approved organization or agency.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Practical Experience

Contact Hours: 9-18 other

Grade Mode: Satisfactory/Unsatisfactory-IP

BST 60195 SPECIAL TOPICS IN BIOSTATISTICS 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) Special topics to sample new offerings on topics in biostatistics.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

BST 60292 APPLIED PRACTICE EXPERIENCE IN BIOSTATISTICS II 1 Credit Hour

Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization.

Students complete the field experience with joint supervision from the university and an approved organization or agency.

Prerequisite: BST 60192; and graduate standing; and special approval.

Schedule Type: Practical Experience

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory

BST 62020 DATA MANAGEMENT AND LOGIC USING SAS® SOFTWARE 3 Credit Hours

(Slashed with BST 82020) This course introduces graduate students to SAS® software, reading external data into SAS software, use of SAS data step, basic SAS functions, logical data steps for data management, and different SAS procedures for creating summary reports, graphical displays, and conducting basic statistical analysis using the SAS software. SAS Lab sessions are designed to mimic real time challenges working with different kinds of data and learn how to meet such challenges. By the end of the course, students will achieve competency in proper and efficient use of SAS software.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

BST 63012 SURVIVAL ANALYSIS IN PUBLIC HEALTH 3 Credit Hours

Introduction in survival analysis for graduate students in public health. Covers survival functions, hazard rates, types of censoring and truncation. Methods of focus include life tables, Kaplan-Meier plots, log-rank tests, Cox regression models and parametric survival models. Inference for recurrent event and competing risks models are also covered.

Prerequisite: BST 52019 and 63014; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

BST 63013 EXPERIMENTAL DESIGNS IN PUBLIC HEALTH RESEARCH 3 Credit Hours

Introduces students to experimental research methods, in public health settings. First introduces a number of quasi-experimental and experimental study designs, then identifies a number of statistical methods that can be used to draw correct causal inferences from the study.

Prerequisite: BST 52019 and 63014; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

BST 63014 APPLIED REGRESSION ANALYSIS OF PUBLIC HEALTH DATA 3 Credit Hours

(Slashed with BST 83014) Focuses on developing student proficiency in building and evaluating various regression models for public health studies. Topics covered include exploratory and descriptive methods, simple and multiple linear regression models, predictor selection, binary and multinomial logistic regression models, survival analysis, repeated measures and generalized linear models.

Prerequisite: BST 52019; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

BST 70010 USING R IN PUBLIC HEALTH 1 Credit Hour

(Slashed with BST 60010) Students learn the role of the computing software R for data analyses. The course covers the basics of R including how to organize and clean data and how to display data visually. Students understand how to perform descriptive and inferential statistics using R.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

BST 70011 USING SAS IN PUBLIC HEALTH 1 Credit Hour

(Slashed with BST 60011) Students learn the role of the computing software SAS for data analyses. The course covers the basics of SAS, including importing data, organizing and cleaning the data and using different procedures. Students understand how to perform descriptive and inferential statistics using SAS.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

BST 70012 USING EXCEL IN PUBLIC HEALTH 1 Credit Hour

(Slashed with BST 60012) An introduction to using Excel in the field of public health. Students learn the skills to analyze and present data, including using formulas, pivot tables, graphs and the data analysis toolpak.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

BST 73011 MULTIVARIATE ANALYSIS IN PUBLIC HEALTH 3 Credit Hours

Multivariate statistical methods are designed to evaluate more than one variable at a time. An application-oriented introduction to essential multivariate statistical methods used in public health. Topics covered include matrix theory, data screening and preliminary analyses, multivariate normal distributions, multivariate versions of the general linear model (MANOVA, multivariate multiple regression, MANCOVA), discrimination and classification, canonical correlation analysis, and methods of analyzing covariance and correlation structures (principal components and factor analysis). Also introduces and explores methods of handling missing data.

Prerequisite: BST 52019; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

BST 82020 DATA MANAGEMENT AND LOGIC USING SAS® SOFTWARE 3 Credit Hours

(Slashed with BST 62020) This course introduces graduate students to SAS® software, reading external data into SAS software, use of SAS data step, basic SAS functions, logical data steps for data management, and different SAS procedures for creating summary reports, graphical displays, and conducting basic statistical analysis using the SAS software. BST 83013 EXPERIMENTAL DESIGNS IN PUBLIC HEALTH RESEARCH
3 Credit Hours

Designed to introduce students to experimental research methods, in public health settings. First introduces a number of quasi-experimental and experimental study designs, then identifies a number of statistical methods that can be used to draw correct causal inferences from the study. Students are expected to develop two research proposals, first using quasi-experimental then an experimental design and develop a statistical analysis plan for each study.

Prerequisite: BST 52019; and BST 63014 or 83014; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

BST 83014 APPLIED REGRESSION ANALYSIS OF PUBLIC HEALTH DATA
3 Credit Hours

(Slashed with BST 63014) Focuses on developing student proficiency in building and evaluating various regression models for public health studies. Topics covered include exploratory and descriptive methods, simple and multiple linear regression models, predictor selection, binary and multinomial logistic regression models, survival analysis, repeated measures and generalized linear models.

Prerequisite: BST 52019; and doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

Environmental Health Sciences (EHS)

EHS 50060 PUBLIC HEALTH LABORATORY METHODS
3 Credit Hours

(Slashed with PH 40060) Course introduces the student to the fundamental theory and hands on use to track specimen collection and laboratory analysis. Environmental specimens are examined for their public health importance using classical and modern techniques. Students learn classical laboratory methods and their modern use in the laboratory environment. Examples include culture and microscopic identification of microorganisms, identification of disease vectors, detection of newborn disease and detection of terrorism agents.

Prerequisite: BSCI 30140 or CHEM 10062 or CHEM 10971 or PH 30006; and graduate standing.

Schedule Type: Combined Lecture and Lab

Contact Hours: 2 lecture, 1 lab

Grade Mode: Standard Letter

EHS 50109 LABORATORY SAFETY AND HYGIENE
3 Credit Hours

(Cross-listed with PH 40109) Basic introduction to laboratory safety, chemical hygiene, and biosafety. Includes the research compliance programs of institutions (IBC, IACUC, IRB, RSC) and the OSHA Chemical Hygiene Standard requirements and program responsibilities. General lab safety concepts are reviewed, along with chemical handling and storage, fumehoods and ventilation, hazardous waste disposal, radiation safety, and lab design. Basic principles of biosafety are covered, BSL 1-4 levels, biosafety cabinets, select agents, bloodborne pathogens, NIH Guidelines, biosecurity and animal use.

Prerequisite: Graduate standing.

Schedule Type: Field Experience, Lecture

Contact Hours: 2.67 lecture, .33 other

Grade Mode: Standard Letter

EHS 50196 INDIVIDUAL INVESTIGATION IN ENVIRONMENTAL HEALTH SCIENCES
1-3 Credit Hours

(Repeatable for maximum 6 credits) Individual graduate investigation or research in areas related to environmental health sciences.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Individual Investigation

Contact Hours: 1-3 other

Grade Mode: Standard Letter-IP

EHS 52018 ENVIRONMENTAL HEALTH CONCEPTS IN PUBLIC HEALTH
3 Credit Hours

Provides a comprehensive overview of the core topics in environmental health as related to public health.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EHS 52100 CLIMATE CHANGE AND POPULATION HEALTH
3 Credit Hours

(Slashed with PH 42100) This course reviews evidence on the rigorous scientific consensus confirming global warming and the mechanisms underlying climate change, with a focus on adverse population health impacts. Increases in the frequency and intensity of extreme weather events including heatwaves, tropical cyclones and severe storms create hazardous conditions including flooding, drought, wildfires, increases in vector-borne diseases, food and nutrition shortages, human displacement and mental health issues. Populations at increased risk are identified along with a consideration of climate ethics, justice and public health approaches used to address the population health effects. Strategies for abatement through injury and disease prevention, climate risk communication and strategies for mitigation including green energy and energy conservation are examined.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EHS 53009 EMERGING ENVIRONMENTAL HEALTH ISSUES AND RESPONSE
3 Credit Hours

Provides an overview of emerging environmental health issues that will impact the public's health.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EHS 53012 OCCUPATIONAL SAFETY AND HEALTH
3 Credit Hours

Survey of major concepts and issues relating health and safety in the workplace. Emphasis is on the application of public health principles and decision-making practices used by various worker populations for the prevention of injury and disease on the job. This course will cover protective equipment, hazardous conditions, environmental toxins, risk assessment, prevention science approaches and workplace health promotion.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EHS 53014 BUILT ENVIRONMENT AND PUBLIC HEALTH 3 Credit Hours

(Slashed with PH 43013) The impact of the built environment on human health is an issue of global importance. The focus of this course is on preventing disease and injury while improving the health of populations by looking “upstream” at the built environment or those settings designed, created and maintained by human efforts. Population health effects of community design are explored through scientific literature, and include transportation, land use, parks and green space in the context of physical activity, food environments, air and water quality, injury prevention, social capital and health equity. Students examine and use population health tools to assess the built environment and develop strategies for creating sustainable healthy places through multidisciplinary collaboration, research and policy that promotes the health of the public.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EHS 60191 VARIABLE CONTENT SEMINAR IN ENVIRONMENTAL HEALTH SCIENCES 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) Seminar on current and important topics in environmental health sciences. Subject matter varies depending on the topic.

Prerequisite: Graduate standing.

Schedule Type: Seminar

Contact Hours: 1-3 other

Grade Mode: Standard Letter

EHS 60192 PRACTICUM EXPERIENCE IN ENVIRONMENTAL HEALTH SCIENCES 3,6 Credit Hours

Observational and participation in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and approved organization or agency.

Prerequisite: Graduate standing and special approval.

Schedule Type: Practical Experience

Contact Hours: 9-18 other

Grade Mode: Satisfactory/Unsatisfactory-IP

EHS 60195 SPECIAL TOPICS IN ENVIRONMENTAL HEALTH SCIENCES 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) Special topics to sample new offerings on topics in environmental health sciences.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

EHS 60292 APPLIED PRACTICE EXPERIENCE IN ENVIRONMENTAL HEALTH SCIENCES II 1 Credit Hour

(Repeatable for credit) Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and an approved organization or agency.

Prerequisite: EHS 60192; and graduate standing; and special approval.

Schedule Type: Practical Experience

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory

EHS 63010 APPLIED RISK ASSESSMENT 3 Credit Hours

Introduces the student to environmental and occupational hazards, assessing the risks associated with hazard exposure. Standard principles of risk assessment are emphasized including methods of hazard identification and regulation, quantitative exposure measurement, dose and toxicity relationships and risk management. Analysis of public policy regulatory guidance and health advisory watchdog recommendations are evaluated.

Prerequisite: EPI 52017; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EHS 63011 APPLICATION OF RISK ANALYSIS IN ENVIRONMENTAL HEALTH 3 Credit Hours

Students are introduced to methods in risk analysis that are applied by U.S. federal, state, and local agencies in their assessment of chemical toxicants. Linkages between risk assessment, risk management, and risk communication will be studied as components of this process, along with issues and controversies in the analysis of environmental health risks.

Prerequisite: EPI 52017; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

Epidemiology (EPI)

EPI 50013 CLINICAL EPIDEMIOLOGY BASICS 3 Credit Hours

(Slashed with PH 40013) Course develops an understanding of clinical research, good clinical practices, research environments and methods used in clinical research. Students gain an understanding of the use of clinical investigation, from the product development stage to the application of investigations in contract research organization. Ethical implications and regulatory issues are examined.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 50014 CLINICAL TRIALS MANAGEMENT 3 Credit Hours

(Slashed with PH 40014) Course examines the good clinical practices guidelines. Students learn how to conduct and manage clinical trials; understand clinical trials data; develop instruments and protocols; recognize quality control and data issues; know approaches to recruitment, retention and participant assessment; identify adverse events and measurement of response variables; and acquire skill in study close-out procedures.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 50015 SCIENTIFIC WRITING FOR CLINICAL RESEARCH 3 Credit Hours

(Cross-listed with PH 40015) Course provides students the tools to develop proficiency in scientific reading, to conduct presentations and to demonstrate skill in scientific writing, with the goal of preparing clinical researchers to be able to communicate findings to the science community and the general population. Course includes an examination of the science literature in clinical trials research.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 50017 PHARMACOEPIDEMIOLOGY 3 Credit Hours

(Cross-listed with PH 40017) Introduction to the field of pharmacoepidemiology, which uses epidemiology methods to understand medication use and distribution at the population level. Course examines risk-benefit and epidemiology approaches to examining medication use and therapeutic trials. Drug and device manufacturing to market are explored.

Prerequisite: BST 52019 and EPI 52017; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 50018 REGULATORY AFFAIRS IN CLINICAL RESEARCH 3 Credit Hours

(Slashed with PH 40018) Course provides the tools for students to develop an understanding of the researcher and organization responsibility in research and development of clinical trials products. Students understand regulations from the government and industry, privacy concerns, liability and ethical issues related to clinical trials research. Examples from the field are explored in detail.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 50196 INDIVIDUAL INVESTIGATION IN EPIDEMIOLOGY 1-3 Credit Hours

(Repeatable for maximum 6 credits) Individual graduate investigation or research in areas related to epidemiology.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Individual Investigation

Contact Hours: 1-3 other

Grade Mode: Standard Letter-IP

EPI 52010 UNDERSTANDING THE COVID-19 PANDEMIC 3 Credit Hours

(Slashed with PH 42010) In this course, students examine the various aspects of the ongoing coronavirus pandemic. They learn foundational information in epidemiology, virology and immunology, and examine the emergence and spread of SARS-CoV-2. They learn about responses to the epidemic, including policies aimed at slowing spread, and examine aspects of diagnostics and vaccine development relevant to controlling the spread of the virus.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 52017 FUNDAMENTALS OF PUBLIC HEALTH EPIDEMIOLOGY 3 Credit Hours

(Slashed with EPI 72017) Introduces principles, methods and application of epidemiology. Covers the history of epidemiology, concepts of disease causation and prevention, measures of disease frequency and excessive risk, epidemiologic study designs, causal inference, outbreak investigation and screening. Provides experience with calculation of rate standardization; measures of disease frequency, association and impact; and sensitivity and specificity of screening tests. Highlights applications of epidemiology to understanding of disease etiology, transmission, pathogenesis and prevention; evaluation and public policy development.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 52028 METHODS OF EVIDENCE BASED PUBLIC HEALTH 3 Credit Hours

(Slashed with EPI 72028) Explores tools and techniques used to quantitatively determine the effectiveness of public health interventions in the social sciences.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 53089 PLAGUES THAT SHAPED THE WORLD 3 Credit Hours

(Slashed with EPI 73089) (Cross-listed with PH 43089) Course examines the Bubonic plague, HIV/AIDS, Ebola and pandemic influenza outbreaks to introduce students to the fundamentals of public health, establishing epidemiological principles that explain how plagues erupt and propagate, decimate populations and alter cultures. Inherent in the course's discussion are the social determinants that fuel plague outbreaks and slow recovery. Examples of emerging infectious diseases and threats of bioterrorism are discussed as new plagues for which creative solutions are still required. Students take city excursions and a field trip to assess cultural changes resulting from historical plagues.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 60191 VARIABLE CONTENT SEMINAR IN EPIDEMIOLOGY 1-3 Credit Hours

(Repeatable for credit) (Slashed with EPI 80191) Seminar on current and important topics in epidemiology. Subject matter varies depending on the topic.

Prerequisite: Graduate standing.

Schedule Type: Seminar

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

EPI 60192 APPLIED PRACTICE EXPERIENCE IN EPIDEMIOLOGY 3,6 Credit Hours

(Repeatable for credit) Observational and participation in public health activities of a public health agency, hospital or other approved organization. Students complete a field experience with joint supervision from the university and approved organization or agency.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Practical Experience

Contact Hours: 3-18 other

Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 60195 SPECIAL TOPICS IN EPIDEMIOLOGY 1-3 Credit Hours

(Repeatable for a maximum 6 credit hours) (Slashed with EPI 80195) Special topics to sample new offerings on topics in epidemiology.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

EPI 60292 APPLIED PRACTICE EXPERIENCE IN EPIDEMIOLOGY II 1 Credit Hour

(Repeatable for credit) Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and an approved organization or agency.

Prerequisite: EPI 60192; and graduate standing.

Schedule Type: Practical Experience

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory

EPI 63014 EPIDEMIOLOGY OF CHRONIC DISEASES 3 Credit Hours
(Slashed with EPI 83014) With a life course approach to chronic disease epidemiology, this course focuses on cardiovascular, respiratory, cerebrovascular diseases and cancer. Health and disease are addressed from a multicausal perspective, which includes individual behaviors; psychosocial issues; and sociodemographic, biological and physiological factors. Time points for prevention and intervention are identified.

Prerequisite: EPI 52017; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 63015 EPIDEMIOLOGY OF INFECTIOUS DISEASES 3 Credit Hours

(Slashed with EPI 83015) Surveys the history, principles, methods and practice of infectious disease epidemiology, by (1) defining and understanding infectious disease epidemiology surveys, (2) collecting and measuring surveillance data, (3) interpreting epidemiology data and (4) predicting evidence-based outcomes. Primarily a course in epidemiology, students learn some infectious disease microbiology as well.

Prerequisite: EPI 52017; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 63016 PRINCIPLES OF EPIDEMIOLOGIC RESEARCH 3 Credit Hours

(Slashed with EPI 83016) Course builds upon EPI 52017 to explore deeper the concepts and methods in epidemiologic research. Reviews the measures of disease frequency; association and impact; epidemiologic reasoning and causal inference; and methods and techniques for designing, implementing, analyzing and interpreting various epidemiologic study designs. Discusses advantages and limitations of various study designs. Explores threats to validity, precision and generalizability of epidemiologic studies.

Prerequisite: BST 52019 and EPI 52017; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 63017 EPIDEMIOLOGICAL ANALYSIS 3 Credit Hours

(Slashed with EPI 83017) Provides practical instruction in the analysis and interpretation of data from various epidemiologic study designs, including cross-sectional, case-control and cohort studies. Reviews statistical concepts and epidemiologic studies designs; outlines a strategy for data analysis; and reviews relevant methodologic issues and applies stratified analysis methods and multivariable regression models to the studies. Develops an understanding of the underlying principles and assumptions, practical application and correct interpretation of the epidemiologic results. Provides hands-on experience on the application of epidemiologic analysis methods and presentation of the results.

Prerequisite: BST 52019 and BST 63014 and EPI 52017 and EPI 63016; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 63018 OBSERVATIONAL DESIGNS FOR CLINICAL RESEARCH 3 Credit Hours

(Slashed with EPI 83018) Course provides students the skills to design, conduct and perform clinical epidemiology studies using an observational design. Students understand major concepts of clinical research, develop clinical research questions, and solve clinical research problems. Topics include study design, risk, causation, exposures, bias, measurement and validity and disease prognosis.

Prerequisite: BST 52019 and EPI 52017; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 63019 EXPERIMENTAL DESIGNS FOR CLINICAL RESEARCH 3 Credit Hours

(Slashed with EPI 83019) Principles of experimental designs as they apply to clinical research and clinical trials are presented at an intermediate level. Students understand randomized control trial designs and alternative designs. Study methodology, including randomization and blinding techniques, is covered. Topics include evidence-based medicine; risk prediction and risk scores; instruments and measurement; data issues; and recruitment, retention and adherence.

Prerequisite: EPI 63018; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 63020 ADVANCED EPIDEMIOLOGY AND CLINICAL RESEARCH METHODS 3 Credit Hours

(Slashed with EPI 83020) This advanced course focuses on why particular methods, study designs or approaches are used in particular investigative scenarios in clinical research. Students develop an advanced understanding and application of epidemiology methods in clinical research.

Prerequisite: EPI 63018 and EPI 63019; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 63021 ETHICAL ISSUES IN PUBLIC HEALTH AND CLINICAL RESEARCH 3 Credit Hours

(Slashed with EPI 83021) Introduces students to historical and contemporary ethical issues that arise during public health and clinical or biomedical research studies. Broadly covers human subjects research, the responsible conduct of research and the good clinical practice guidelines.

Prerequisite: EPI 52017; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 63034 LONGITUDINAL DATA ANALYSIS 3 Credit Hours

(Slashed with EPI 73034) Statistical techniques for analyzing longitudinal, or repeated measures, data. Focuses primarily on application of the various statistical models covered, with direct application illustrated using standard statistical software. Topics covered include univariate and multivariate analysis of variance for repeated measures, mixed-effects models (HLM or multilevel models), covariance pattern models, generalized estimating equations (GEE), mixed-effects logistic regression models and missing data in longitudinal studies.

Prerequisite: BST 52019 and BST 63014; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 63192 RESEARCH PRACTICUM IN CLINICAL EPIDEMIOLOGY 1-3 Credit Hours

(Repeatable for credit) Research practicum allows students to gain hands-on experience conducting research in a clinical setting, such as a hospital or other approved organization. Students complete the experience under the supervision of a field preceptor and faculty member.

Prerequisite: Graduate standing.

Schedule Type: Practical Experience

Contact Hours: 3-9 other

Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 63199 THESIS I 2-6 Credit Hours

Student must register for a total of 6 credit hours in the program. Student may register for 2 to 6 hours in a single semester

Prerequisite: Graduate standing.

Schedule Type: Masters Thesis

Contact Hours: 2-6 other

Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 63299 THESIS II 2 Credit Hours

Thesis students must continue registration in Thesis II each semester until all degree requirements are met.

Prerequisite: EPI 63199; and graduate standing.

Schedule Type: Masters Thesis

Contact Hours: 2 other

Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 72017 FUNDAMENTALS OF PUBLIC HEALTH EPIDEMIOLOGY 3 Credit Hours

(Slashed with EPI 52017) Introduces principles, methods and application of epidemiology. Covers the history of epidemiology, concepts of disease causation and prevention, measures of disease frequency and excessive risk, epidemiologic study designs, causal inference, outbreak investigation and screening. Provides experience with calculation of rate standardization; measures of disease frequency, association and impact; and sensitivity and specificity of screening tests. Highlights applications of epidemiology to understanding of disease etiology, transmission, pathogenesis and prevention; evaluation and public policy development.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 72028 METHODS OF EVIDENCE BASED PUBLIC HEALTH 3 Credit Hours

(Slashed with EPI 52028) Explores tools and techniques used to quantitatively determine the effectiveness of public health interventions in the social sciences.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 73025 EMERGING ISSUES IN INFECTIOUS DISEASE EPIDEMIOLOGY 3 Credit Hours

Investigates global emerging and reemerging infectious diseases. Students evaluate root causes of infectious disease emergence and predict outcomes. Data from primary literature is used to predict alternate outcomes. Specific disease models are used to evaluate and compare prevention, treatment and eradication strategies.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 73026 DESIGN AND IMPLEMENTATION OF HEALTH SURVEYS 3 Credit Hours

Covers survey design, variable construction, survey administration and data collection methods, variable coding and manipulation and data analysis. Students understand sampling methods and sample size. Large health surveys are discussed. Students gain practical experience through design and implementation of a health survey, which can be used to facilitate dissertation research or a publication.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 73027 BIOLOGICAL BASIS OF PUBLIC HEALTH 3 Credit Hours

Integrates the sciences of biology and molecular biology into the principles and practice of public health. Implicit in this course are learning objectives that establish the ecology of infectious disease, the impact of vaccines in disease prevention, and the role of environmental toxins on human health and disease. Additionally, students propose policy, regulations and legislation designed to protect human health within the realm of personalized medicine.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

EPI 73034 LONGITUDINAL DATA ANALYSIS 3 Credit Hours

(Slashed with EPI 63034) Statistical techniques for analyzing longitudinal, or repeated measures, data. Focuses primarily on application of the various statistical models covered, with direct application illustrated using standard statistical software. Topics covered include univariate and multivariate analysis of variance for repeated measures, mixed-effects models (HLM or multilevel models), covariance pattern models, generalized estimating equations (GEE), mixed-effects logistic regression models and missing data in longitudinal studies.

EPI 80191 VARIABLE CONTENT SEMINAR IN EPIDEMIOLOGY 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) (Slashed with EPI 60191)
Seminar on current and important topics in epidemiology. Subject matter varies depending on the topic.

Prerequisite: Doctoral standing.

Schedule Type: Seminar

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

EPI 80195 SPECIAL TOPICS IN EPIDEMIOLOGY 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) (Slashed with EPI 60195)
Special topics to sample new offerings on topics in epidemiology.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

EPI 80196 INDIVIDUAL INVESTIGATION IN EPIDEMIOLOGY 1-3 Credit Hours

Individual graduate investigation or research in areas related to epidemiology.

Prerequisite: Doctoral Standing; and special approval.

Schedule Type: Individual Investigation

Contact Hours: 3-9 other

Grade Mode: Standard Letter-IP

EPI 80198 DIRECTED RESEARCH IN EPIDEMIOLOGY 1-15 Credit Hours

(Repeatable for credit) Directed research or individual investigation in an area of interest and with the guidance of a Kent State faculty member.

Prerequisite: Doctoral standing; and special approval.

Schedule Type: Individual Investigation, Research

Contact Hours: 1-15 other

Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 80199 DISSERTATION I 15 Credit Hours

(Repeatable for credit) Registration for two semesters required, first semester dissertation work begins and continues until completion of Dissertation II and 30 hours of total dissertation work.

Prerequisite: Doctoral standing; and special approval.

Schedule Type: Dissertation

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 80299 DISSERTATION II 15 Credit Hours

(Repeatable for credit) Second course of dissertation sequence completing requirement of with 30 total hours of dissertation work.

Prerequisite: EPI 80199; and doctoral standing; and special approval.

Schedule Type: Dissertation

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 83014 EPIDEMIOLOGY OF CHRONIC DISEASES 3 Credit Hours

(Slashed with EPI 63014) With a life course approach to chronic disease epidemiology, this course focuses on cardiovascular, respiratory, cerebrovascular diseases and cancer. Health and disease are addressed from a multicausal perspective, which includes individual behaviors; psychosocial issues; and sociodemographic, biological and physiological factors. Health Policy and Management (HPM)

HPM 50110 INTRODUCTION TO PUBLIC MENTAL HEALTH 3 Credit Hours

(Slashed with PH 40110) This course provides a broad overview of mental health from a public health perspective. The course is an introduction to population-based (or population-level) approaches to addressing mental health and supporting wellness. More specifically, the course discusses mental health from a public health perspective, including discussion of non-clinical interventions and programs designed to improve mental health and wellness of populations.

HPM 63013 SEX: A WICKED PUBLIC HEALTH PROBLEM 3 Credit Hours

Wicked problems is a term developed in the 1970s by systems thinkers and planners, Horst Rittel and Melvin Webber (1973), to describe complex social problems that are resistant to solution. The term has recently been applied to public health issues that have proven to be difficult to address and resistant to mitigation. Sexual and reproductive health behaviors, attitudes and cultural norms often produce problems at the individual and population levels that meet the criteria for designation as wicked problems. Effectively addressing these kinds of problems requires a correct understanding and application of public health principles and practices.

Grade Mode: Standard Letter

PH 30106 ENVIRONMENTAL TOXICOLOGY 3 Credit Hours

Basic toxicological principles applied to studies of environmental health are surveyed. Basic concepts of toxicological testing, dose response, animal and other models, dose curves, LD50's, risk assessment, threshold theories, classifications of harmful effects, environmental pathways, metabolism and elimination are reviewed. Biological effects and the effect of select toxins on body systems are reviewed. Major groups of toxins and their effects are reviewed. Toxin behavior in air, water, wastewater, soil and environmental media are studied.

Prerequisite: PH 30006.

Schedule Type: Laboratory, Lecture

Contact Hours: 2.8 lecture, .2 lab

Grade Mode: Standard Letter

PH 30110 HAZARDOUS MATERIALS MANAGEMENT 3 Credit Hours

Covers the use of hazardous materials. Emphasis is on the safe management of hazardous materials in the workplace and community, their procurement, storage, regulation, pollution problems, use, release, clean up, disposal, and their control, to prevent workplace and community health and safety problems.

Prerequisite: PH 30006.

Schedule Type: Field Experience, Lecture

Contact Hours: 2.67 lecture, .33 lab

Grade Mode: Standard Letter

PH 30195 SPECIAL TOPICS IN PUBLIC HEALTH 1-3 Credit Hours

(Repeatable for credit) Subject varies depending on the emerging issue.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

PH 32005 EMERGING ISSUES IN COMMUNITY HEALTH 3 Credit Hours

Provides students with exposure to touchstone issues in public health programming that have social and behavioral science implications. Topics reflect emergent priority areas and are expected to vary from semester to semester. Examples of current, emerging issues that may be covered include the Healthy People 2020 initiative, leading health indicators, role of CDC, state and local health departments and NGOs in promoting health behaviors, program recruitment, retention, evaluation and generalization challenges, ethical issues including informed consent and voluntary change, funding challenges for prevention programs, grant writing exposure, role of politics in public health programming, evidenced-based practices and practice-based evidence.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 34001 PUBLIC HEALTH INTERVENTIONS I 3 Credit Hours

Provides an overview of the planning and development of public health interventions including environmental, social, and behavioral public health issues from a social-ecological perspective, with attention to evidence-based, theoretical, and ethical approaches.

Prerequisite: PH 30005.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 34002 PUBLIC HEALTH INTERVENTIONS II 3 Credit Hours

Provides an overview of public health intervention implementation, evaluation, and sustainability, with examples of public health interventions in practice and exploration into the future of public health interventions.

Prerequisite: PH 34001.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 35001 COMMUNITY-BASED PUBLIC HEALTH PRACTICE (ELR) 3 Credit Hours

Course focuses on the fundamentals of applying community engagement, organization, and development principles to create successful community public health interventions. Addresses work in at-risk and diverse communities using methods optimal for public health practice, including public health ethics, faith-based initiatives in community health, community health assessment and measurement methods, coalition building, and frameworks for developing health policy. Will also review the basic principles of health-related non-profit organization management and support.

Prerequisite: None.

Schedule Type: Lecture, Practical Experience

Contact Hours: 3 lecture

Grade Mode: Standard Letter

Attributes: Experiential Learning Requirement

PH 35005 ADVOCACY AND ACTIVISM IN PUBLIC HEALTH 3 Credit Hours

Public health advocacy and activism are areas of increasing importance for those in public health at both national and international levels because they offer more direct approaches to achieve lasting social and political change. This course provides a foundation to the theory, evidence-base and strategies that can be harnessed to bring about change to improve the lives and health of populations, and explains how activism has an essential role in public health policy and practice.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 35010 RACISM: A PUBLIC HEALTH CRISIS 3 Credit Hours

Across the US, an increasing number of communities have declared racism as a public health crisis. This declaration is not based on an isolated incident, rather, it is the acknowledgement that racism is structural and has been embedded within the institutional policies and societal norms that are present in our everyday lives. This course will: Recognize racism in the US as a significant cause of poor health, disease, and persistent dis-ease among Black Americans; Explore the relationship between racism and health through a historic accounting of social, political, economic, and environmental conditions post-slavery through current events; and, identify how, research, and advocacy can address anti-Black racism and promote health equity.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture, 0 lab, 0 other

Grade Mode: Standard Letter

PH 40000 PUBLIC HEALTH PROFESSIONAL PRACTICE III 1 Credit Hour

Professional development course designed to launch graduates into the workforce or graduate school. The career portfolio, resume, and cover letters will be finalized. Interviewing and application skills will be developed. Working with a College of Public Health career counselor students will develop job search strategies and begin the application process. Students continuing their education in a graduate program will work on application materials.

Prerequisite: PH 30000; and senior standing.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

PH 40013 CLINICAL EPIDEMIOLOGY BASICS 3 Credit Hours

(Slashed with EPI 50013) Course develops an understanding of clinical research, good clinical practices, research environments and methods used in clinical research. Students gain an understanding of the use of clinical investigation, from the product development stage to the application of investigations in contract research organization. Ethical implications and regulatory issues are examined.

Prerequisite: PH 20001.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 40014 CLINICAL TRIALS MANAGEMENT 3 Credit Hours

(Slashed with EPI 50014) Course examines the good clinical practices guidelines. Students learn how to conduct and manage clinical trials; understand clinical trials data; develop instruments and protocols; recognize quality control and data issues; know approaches to recruitment, retention and participant assessment; identify adverse events and measurement of response variables; and acquire skill in study close-out procedures.

Prerequisite: PH 40013.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 40015 SCIENTIFIC WRITING FOR CLINICAL RESEARCH 3 Credit Hours

(Cross-listed with EPI 50015) Course provides students the tools to develop proficiency in scientific reading, to conduct presentations and to demonstrate skill in scientific writing, with the goal of preparing clinical researchers to be able to communicate findings to the science community and the general population. Course includes an examination of the science literature in clinical trials research.

Prerequisite: ENG 21011 or HONR 10297.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 40017 PHARMACOEPIDEMIOLOGY 3 Credit Hours

(Cross-listed with EPI 50017) Introduction to the field of pharmacoepidemiology, which uses epidemiology methods to understand medication use and distribution at the population level. Course examines risk-benefit and epidemiology approaches to examining medication use and therapeutic trials. Drug and device manufacturing to market are explored.

Prerequisite: PH 40013 and PH 40014.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 40018 REGULATORY AFFAIRS IN CLINICAL RESEARCH 3 Credit Hours

(Slashed with EPI 50018) Course provides the tools for students to develop an understanding of the researcher and organization responsibility in research and development of clinical trials products. Students understand regulations from the government and industry, privacy concerns, liability and ethical issues related to clinical trials research. Examples from the field are explored in detail.

Prerequisite: PH 40013 and PH 40014.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 40060 PUBLIC HEALTH LABORATORY METHODS 3 Credit Hours

(Slashed with EHS 50060) Course introduces the student to the fundamental theory and hands on use to track specimen collection and laboratory analysis. Environmental specimens are examined for their public health importance using classical and modern techniques. Students learn classical laboratory methods and their modern use in the laboratory environment. Examples include culture and microscopic identification of microorganisms, identification of disease vectors, detection of newborn disease and detection of terrorism agents.

Prerequisite: BSCI 30140 or CHEM 10062 or CHEM 10971 or PH 30006.

Schedule Type: Combined Lecture and Lab

Contact Hours: 2 lecture, 1 lab

Grade Mode: Standard Letter

PH 40089 GLOBAL HEALTH IMMERSION: GENEVA, SWITZERLAND (DIVG) (ELR) 1-3 Credit Hours

(Repeatable for credit) Participants explore a number of health concerns, policies and challenges with global importance and implications.

Students investigate current global health policies and themes, and become familiar with the major players in global health including governmental and nongovernmental organizations and multinational agencies. Presentations are given by experts currently working in various regions of the world to solve such pressing global problems as HIV/AIDS, post-war trauma, tuberculosis, refugee health, non-communicable disease prevention and environmental contamination.

Prerequisite: PH 10001 and PH 10002; and junior standing; and special approval.

Schedule Type: International Experience, Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter-IP

Attributes: Diversity Global, Experiential Learning Requirement

PH 40092 INTERNATIONAL HEALTH PRACTICUM (ELR) 3-6 Credit Hours

(Repeatable for credit) A supervised internship in global/international health.

Prerequisite: PH 10002; and junior or senior standing.

Schedule Type: Practical Experience

Contact Hours: 10-20 other

Grade Mode: Satisfactory/Unsatisfactory

Attributes: Experiential Learning Requirement

PH 40100 VECTOR-BORNE AND ZONOTIC DISEASES 3 Credit Hours

Presents a broad overview of major considerations related to human health and the vector-borne diseases transmitted by rodents and arthropods (insects and arachnids). Control measures, including rodent control, local mosquito control programs, and integrated pest management (IPM) concepts with safe pesticide use are reviewed. Application of FIFRA regulations are presented. An overview of issues associated with zoonotic diseases transmitted by animals, such as rabies, and their control are also included. Vector and reservoir relationships are explored.

Prerequisite: PH 30006.

Schedule Type: Field Experience, Lecture

Contact Hours: 2.67 lecture, .33 other

Grade Mode: Standard Letter

PH 40109 LABORATORY SAFETY AND HYGIENE 3 Credit Hours

(Crosslisted with EHS 50109) Basic introduction to laboratory safety, chemical hygiene, and biosafety. Includes the research compliance programs of institutions (IBC, IACUC, IRB, RSC) and the OSHA Chemical Hygiene Standard requirements and program responsibilities. General lab safety concepts are reviewed, along with chemical handling and storage, fumehoods and ventilation, hazardous waste disposal, radiation safety, and lab design. Basic principles of biosafety are covered, BSL 1-4 levels, biosafety cabinets, select agents, bloodborne pathogens, NIH Guidelines, biosecurity and animal use.

Prerequisite: PH 30006.

Schedule Type: Field Experience, Lecture

Contact Hours: 2.67 lecture, .33 other

Grade Mode: Standard Letter

PH 40110 INTRODUCTION TO PUBLIC MENTAL HEALTH 3 Credit Hours

(Slashed with HPM 50110) This course provides a broad overview of mental health from a public health perspective. The course is an introduction to population-based (or population-level) approaches to addressing mental health and supporting wellness. More specifically, the course discusses mental health from a public health perspective, including discussion of non-clinical interventions and programs designed to improve mental health and wellness of populations.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 40191 SEMINAR IN PUBLIC HEALTH 1-3 Credit Hours

(Repeatable for credit) Seminar on current and important topics in public health. Subject matter varies depending on topic.

Prerequisite: None.

Schedule Type: Seminar

Contact Hours: 1-3 other

Grade Mode: Standard Letter

PH 40195 SPECIAL TOPICS IN PUBLIC HEALTH 1-3 Credit Hours

(Repeatable for credit) Subject varies depending on the emerging issue.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

PH 40196 INDIVIDUAL INVESTIGATION IN PUBLIC HEALTH 1-3 Credit Hours

(Repeatable for maximum 6 credits) Individual undergraduate investigation or research on specific public health issues.

Prerequisite: Junior or senior standing; and special approval.

Schedule Type: Individual Investigation

Contact Hours: 1-3 other

Grade Mode: Standard Letter

PH 41000 ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT 3 Credit Hours

Entails leadership and management principles in environmental and occupational health and safety (EOHS), and helps students develop skills needed to become an effective supervisor. Issues such as regulatory structure, program and community planning, policy development, budgeting, staffing and staff development, strategic planning, training, professionalism and assessment are reviewed. Board development, dealing with difficult people and situations, legal, social, political, and economic effects on EOHS programs are dealt with. Related issues such as ethics, human resources, workers comp, court appearances, media relations and communications are reviewed.

Prerequisite: PH 30006 and 30102 and 30105 and 30106; and senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 41092 FIELD EXPERIENCE IN MEETING THE BASIC HEALTH AND HUMAN NEEDS (ELR) 3 Credit Hours

(Repeatable for credit) Provides practical skills in simple, affordable appropriate technologies that can offer solutions for meeting basic health and human needs in the developing world at the household and community levels. Technologies are organized into five modules: 1) food, agriculture, and nutrition; 2) water and sanitation; 3) alternative household energy; 4) primary health care; and 5) community development needs and resource assessment. All five modules cover appropriate technologies that while meeting the basic needs have significant impact on health of the individuals and communities. Principles of participatory community development and sensitivity to cross-cultural, gender, and ecological issues are emphasized throughout the training.

Prerequisite: Special approval.

Schedule Type: Field Experience

Contact Hours: 8 other

Grade Mode: Satisfactory/Unsatisfactory

Attributes: Experiential Learning Requirement

PH 42010 UNDERSTANDING THE COVID-19 PANDEMIC 3 Credit Hours

(Slashed with EPI 52010) In this course, students examine the various aspects of the ongoing coronavirus pandemic. They learn foundational information in epidemiology, virology and immunology, and examine the emergence and spread of SARS-CoV-2. They learn about responses to the epidemic, including policies aimed at slowing spread, and examine aspects of diagnostics and vaccine development relevant to controlling the spread of the virus.

Prerequisite: Junior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 42092 ENVIRONMENTAL, OCCUPATIONAL, HEALTH AND SAFETY INTERNSHIP (ELR) 4-6 Credit Hours

The purpose of the environmental and occupational health and safety internship is to supplement the student in-class learning experiences with practical hand-on skills and work practice experiences that helps them develop the environmental competencies required for success in the field.

Prerequisite: Junior or senior standing; and special approval.

Schedule Type: Practical Experience

Contact Hours: 13.33-20 other

Grade Mode: Satisfactory/Unsatisfactory-IP

Attributes: Experiential Learning Requirement

PH 42100 CLIMATE CHANGE AND POPULATION HEALTH 3 Credit Hours

(Slashed with EHS 52100) This course reviews evidence on the rigorous scientific consensus confirming global warming and the mechanisms underlying climate change, with a focus on adverse population health impacts. Increases in the frequency and intensity of extreme weather events including heatwaves, tropical cyclones and severe storms create hazardous conditions including flooding, drought, wildfires, increases in vector-borne diseases, food and nutrition shortages, human displacement and mental health issues. Populations at increased risk are identified along with a consideration of climate ethics, justice and public health approaches used to address the population health effects. Strategies for abatement through injury and disease prevention, climate risk communication and strategies for mitigation including green energy and energy conservation are examined.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 43013 BUILT ENVIRONMENT AND PUBLIC HEALTH 3 Credit Hours

(Slashed with EHS 53014) The impact of the built environment on human health is an issue of global importance. The focus of this course is on preventing disease and injury while improving the health of populations by looking "upstream" at the built environment or those settings designed, created and maintained by human efforts. Population health effects of community design are explored through scientific literature, and include transportation, land use, parks and green space in the context of physical activity, food environments, air and water quality, injury prevention, social capital and health equity. Students examine and use population health tools to assess the built environment and develop strategies for creating sustainable healthy places through multidisciplinary collaboration, research and policy that promotes the health of the public.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 43014 PUBLIC HEALTH AND MASS INCARCERATION 3 Credit Hours

This course will examine incarceration using a public health lens. Students will examine the epidemiology of mass incarceration in the U.S., infectious and chronic diseases of those incarcerated, incarceration as a self-sustaining epidemic with generations of imprisonment, access to health care of those behind bars and on release, and the contagion of punishment including collateral damage to children, families and neighborhoods. The course will conclude with a public health model for ending mass incarceration.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 43089 PLAGUES THAT SHAPED THE WORLD (DIVG) (ELR) 3 Credit Hours

(Slashed with EPI 53089 and and EPI 73089) Course examines the Bubonic plague, HIV/AIDS, Ebola and pandemic influenza outbreaks to introduce students to the fundamentals of public health, establishing epidemiological principles that explain how plagues erupt and propagate, decimate populations and alter cultures. Inherent in the course's discussion are the social determinants that fuel plague outbreaks and slow recovery. Examples of emerging infectious diseases and threats of bioterrorism are discussed as new plagues for which creative solutions are still required. Students take city excursions and a field trip to assess cultural changes resulting from historical plagues.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

Attributes: Diversity Global, Experiential Learning Requirement

PH 43092 INTERNSHIP IN CLINICAL TRIALS RESEARCH (ELR) 3-6 Credit Hours

The internship will place students in a clinical trials setting (e.g., contract research organization, hospital, or academic setting) where they can gain hands on experience conducting clinical trials and clinical research. The internship is 300 hours and can be taken in the last one to two semesters. The purpose of the internship is to provide the student with practical experiences that will make them marketable for a position in clinical research upon graduation.

Prerequisite: PH 40013 and PH 40014.

Schedule Type: Practical Experience

Contact Hours: 3-6 other

Grade Mode: Satisfactory/Unsatisfactory

Attributes: Experiential Learning Requirement

PH 44000 HEALTH DISPARITIES (DIVD) (WIC) 3 Credit Hours

Understanding the factors involved in health disparities at the national and global level, and the impact of health disparities on public health.

Prerequisite: ENG 21011 or HONR 10297; and 15 credit hours of public health courses; and junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

Attributes: Diversity Domestic, Writing Intensive Course

PH 44003 ENVIRONMENTAL HEALTH ISSUES IN LOW- AND MIDDLE-INCOME COUNTRIES 3 Credit Hours

Covers the important environmental health issues of concerns in low- and middle-income countries and appropriate intervention strategies. Topics include clean drinking water and sanitation, indoor air pollution, outdoor air pollution, environmental management, sustainability and health.

Prerequisite: Public health or anthropology major; and junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 44004 GLOBAL HEALTH IMMERSION: LATIN AMERICA 3 Credit Hours

The principal objective of this summer intersession course is to immerse students into the history, culture and public health systems of Latin American countries Colombia Ecuador. Students will have the opportunity to visit major cities, i.e., Cali, Colombia, and Quito, Ecuador, rural areas, and well-known tourist destinations (Cartagena, Colombia, Otavalo, Ecuador). Students will gain an understanding of current scientific research on tropical diseases of local public health relevance, such as malaria. The course will focus on the basic biology of disease, mechanisms of transmission (epidemiology), and efforts to develop vaccines against malaria. The course is designed primarily for sophomores, juniors and seniors who are public health, nursing, or biological science majors. Master's level students will also be accepted. Knowledge of basic Spanish language is useful but not necessary.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 44005 LEGAL ASPECTS OF HEALTH SERVICES MANAGEMENT 3 Credit Hours

Provides an overview of legal and regulatory essentials in health services management. Provides a historical perspective on legal aspects of health care as well as an introduction to law, tort law, criminal aspects, contracts, civil procedure and trial practice as related to health care. Students examine how liability impacts corporate structures, health departments and health care professionals and examine issues related to patient consent, legal reporting requirements, labor relations and patient rights.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 44010 PUBLIC HEALTH PLANNING AND FINANCE 3 Credit Hours

Introduces students to business planning of health services. Students obtain skills in public health financial decision-making, including general principles of public health accounting, budgeting and financial planning.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 44015 PUBLIC HEALTH MANAGEMENT 3 Credit Hours

Provides an overview of management and leadership concepts, principles and practice as applied to public health management. Students learn basic skills in team-building, developing board relationships, strategic planning, fiscal management, marketing, conflict resolution and negotiation in healthcare management. Coursework integrates principles of ethics and professionalism, effective communication, managing complex and culturally diverse workplaces and the changing role of public health managers.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 44020 PUBLIC HEALTH ETHICS IN PRACTICE, POLICY AND RESEARCH 3 Credit Hours

Provides an introduction to public health ethics, including the key foundations, concepts and frameworks for evaluating ethical issues in the public health setting.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 44025 PRINCIPLES OF PUBLIC HEALTH LEADERSHIP 3 Credit Hours

Designed to introduce students to skill-sets and leadership practices necessary for successful public health leadership, with an emphasis on leading positive and sustainable change in real world situations. It also familiarizes students with key aspects of partnership building and advocacy for the purposes of improving health. Particular skills include coalition/partnership development, health advocacy, team building, mentoring and leadership.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

PH 44092 INTERNSHIP IN PUBLIC HEALTH (ELR) 3-6 Credit Hours

(Repeatable for credit) Capstone internship experience in a public health setting under the supervision of a site preceptor and university supervisor. Students gain experience in public health work.

Prerequisite: Senior standing; and special approval.

Schedule Type: Practical Experience

Contact Hours: 3-6 other

Grade Mode: Satisfactory/Unsatisfactory

Attributes: Experiential Learning Requirement

PH 45092 SERVICE LEARNING PRACTICUM IN COMMUNITY-BASED PUBLIC HEALTH (ELR) 3 Credit Hours

This course is designed to provide an opportunity for students to engage in a variety of public health settings under the supervision of faculty. The practicum experience is focused on developing skills needed to implement change to improve population health, providing a setting in which students may integrate and apply the skills and knowledge acquired through their coursework. Students will be exposed to some of the benefits and challenges encountered by public health professionals on a routine basis.

Prerequisite: Junior or senior standing.

Corequisite: PH 35001.

Schedule Type: Lecture, Practical Experience

Contact Hours: 1 lecture, 6 other

Grade Mode: Standard Letter

Attributes: Experiential Learning Requirement

PH 49000 CAPSTONE EXPERIENCE IN PUBLIC HEALTH (ELR) 3 Credit Hours

Case studies of various strategies used in addressing various public health issues are discussed within an evaluative framework.

Prerequisite: 21 credit hours of public health courses; and junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

Attributes: Experiential Learning Requirement

PH 60172 PRACTICUM SEMINAR IN PUBLIC HEALTH 1 Credit Hour

(Repeatable 6 times for credit) Seminar component of the Practicum Experience; course must be taken at the same time as the Practicum Experience; students prepare a final portfolio and seminar presentation integrating theory and practice.

Prerequisite: Graduate standing.

Corequisite: PH 60192.

Schedule Type: Lecture

Contact Hours: 1 other

Grade Mode: Satisfactory/Unsatisfactory-IP

PH 60192 PRACTICUM EXPERIENCE 5 Credit Hours

(Repeatable for credit) Observational and participation in public health activities of a public health agency, hospital or other approved organization. The student completes the field experience with joint supervision from the university and approved organization or agency.

Prerequisite: Graduate standing.

Corequisite: PH 60172.

Schedule Type: Practical Experience

Contact Hours: 20 other

Grade Mode: Satisfactory/Unsatisfactory-IP

PH 61199 INTEGRATIVE LEARNING EXPERIENCE 1 Credit Hour

Students complete an integrative learning experience that demonstrates a synthesis of foundational and concentration competencies. Students, in consultation with faculty, select foundational and concentration-specific competencies appropriate to the student's educational and professional goals.

Prerequisite: 30 credit hours of Biostatistics (BST) or Environmental Health Sciences (EHS) or Epidemiology (EPI) or Health Policy and Management (HPM) or Social and Behavioral Sciences (SBS) courses; and graduate standing.

Schedule Type: Project or Capstone

Contact Hours: 1 other

Grade Mode: Satisfactory/Unsatisfactory-IP

PH 80199 DISSERTATION I 15 Credit Hours

(Repeatable for credit) Registration for two semesters required, first semester dissertation work begins and continues until completion of 30 hours.

Prerequisite: Doctoral standing.

Schedule Type: Dissertation

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory-IP

PH 80299 DISSERTATION II 15 Credit Hours

(Repeatable for credit) Continuing registration required of doctoral students who have completed the initial 30 hours of dissertation and continuing until degree requirements are met.

Prerequisite: Doctoral standing.

Schedule Type: Dissertation

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory-IP

Social and Behavioral Sciences (SBS)

SBS 50196 INDIVIDUAL INVESTIGATION IN SOCIAL AND BEHAVIORAL SCIENCES 1-3 Credit Hours

(Repeatable for credit) Individual graduate investigation or research in areas related to social and behavioral sciences.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Individual Investigation

Contact Hours: 1-3 other

Grade Mode: Standard Letter-IP

SBS 54634 SOCIAL DETERMINANTS OF HEALTH BEHAVIORS 3 Credit Hours

Overviews the social determinants of health and the dynamic interplay between individual behaviors and community structures (systems orientation) including public policy, social and built environments, commercial messages, access to services, cultural norms, psychosocial hazards, and poverty both as causal effects that either provide opportunity or constraints to health. Also examines systems approaches to preventing public health threats from issues including substance use (alcohol, tobacco and other drugs), physical inactivity, poor dietary practices, unsafe sexual behaviors, violence and injury, and mental health.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 60002 QUANTITATIVE METHODS IN SOCIAL AND BEHAVIORAL SCIENCES 3 Credit Hours

Introduces basic quantitative methods used in social and behavioral scientific research. First we focus on the measurement of socio-behavioral phenomena and the relationship between measurement and statistics. Next, we examine the interrelated roles of scientific theory and the design of socio-behavioral research studies. Last, we focus on building appropriate multiple linear regression and or analysis of variance statistical models to provide valid analysis of data collected in socio-behavioral research.

Prerequisite: BST 52019; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 60020 PROGRAM EVALUATION II: APPLICATION IN THE REAL WORLD 3 Credit Hours

(Slashed with SBS 80020) This course provides students with a more in-depth examination of program evaluation for public health professionals and the opportunity to apply their evaluation knowledge and skills to an existing health intervention. The content will delve deeply into formative and summative evaluation—including theoretical underpinnings, professional standards, research design and data collection and analysis. Students will be required to apply this knowledge to a selected program and produce an evaluation proposal acceptable for submission to a funding agency.

Prerequisite: HPM 63011; and graduate standing.

Schedule Type: Seminar

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 60021 SOCIAL AND BEHAVIORAL SCIENCE THEORIES 3 Credit Hours

Examines fundamental social and behavioral science theoretical frameworks that explain health behaviors with an emphasis on application through universal prevention approaches to inform both research and program evaluation designs.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 60030 CODING FOR QUALITATIVE RESEARCH 1 Credit Hour

(Slashed with SBS 80030) The purpose of this course is to provide students with a brief but thorough overview of the basic process of coding text-based, unstructured data for qualitative research projects. Focus is on coding for descriptive or basic qualitative research.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 15 lecture

Grade Mode: Standard Letter

SBS 60040 TRANSCRIBING INDIVIDUAL AND GROUP INTERVIEWS FOR QUALITATIVE RESEARCH 1 Credit Hour

(Slashed with SBS 80040) The purpose of this course is to provide students an overview of, and applied practice in transcribing audio-recorded interview data as preparation for qualitative analysis techniques.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 15 lecture

Grade Mode: Standard Letter

SBS 60191 VARIABLE CONTENT SEMINAR IN SOCIAL AND BEHAVIORAL SCIENCES 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) Seminar on current and important topics in social and behavioral sciences. Subject matter varies depending on the topic.

Prerequisite: Graduate standing.

Schedule Type: Seminar

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

SBS 60192 APPLIED PRACTICE EXPERIENCE IN SOCIAL AND BEHAVIORAL SCIENCES 3,6 Credit Hours

(Repeatable for credit) Observational and participation in public health activities of a public health agency, hospital or other approved organization. The student completes the field experience with joint supervision from the university and approved organization or agency.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Practical Experience

Contact Hours: 9-18 other

Grade Mode: Satisfactory/Unsatisfactory-IP

SBS 60195 SPECIAL TOPICS IN SOCIAL AND BEHAVIORAL SCIENCES 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) Special topics to sample new offerings on topics in social and behavioral sciences.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

SBS 60292 APPLIED PRACTICE EXPERIENCE IN SOCIAL AND BEHAVIORAL SCIENCES II 1 Credit Hour

(Repeatable for credit) Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and an approved organization or agency.

Prerequisite: SBS 60192 and graduate standing.

Schedule Type: Practical Experience

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory

SBS 63008 GRANT WRITING IN SOCIAL AND BEHAVIORAL SCIENCES 3 Credit Hours

Students learn the basics of grant writing for federal and non-federal funding agencies with a particular emphasis on the components of most proposals for funding. This includes rationale for seeking funds, collaborations with community organizations, and working with consultants and subcontractors. Participants also learn about the basic sections of grant writing such as specific aims and hypotheses, developing a literature review, background and significance, research design and methodology, developing a budget and conducting research with human subjects. Participants have an opportunity to write sample grant proposals, learn about the review and scoring process and post-award grant management.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 63010 QUALITATIVE METHODS FOR PUBLIC HEALTH RESEARCH 3 Credit Hours

(Slashed with SBS 83010) In this course, students will be guided through exploration of the uses and value of qualitative approaches to research with humans through a combination of resource review and guided applied practice. Students will be provided with information about various methodologies that comprise qualitative inquiry, and will engage in practice efforts to analyze provided data, and to assess the quality of research reports.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 63011 QUALITATIVE DATA ANALYSIS 3 Credit Hours

(Slashed with SBS 83011) Students will be introduced to the process and goals of qualitative data analysis relevant to research design and study purpose, and will be provided opportunities to conduct coding and other types of analysis of qualitative data using both computer assisted and manual processes. Students will focus on descriptive or generic approaches for both qualitative and mixed methods research. Students will additionally learn about and be provided opportunities for guided practice in quality control measures that include creation of an audit trail, "member checking," composition of analytic memos, and other forms of researcher initiated documentation.

Prerequisite: SBS 63010 or special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 63030 SEMINAR IN SOCIAL AND BEHAVIOR SCIENCES 3 Credit Hours

Explores case studies in the social and behavioral sciences on topics that address the leading health indicators including substance use (alcohol, tobacco and other drugs), obesity (physical activity and nutrition), HIV and STIs, mental health, injury, immunization and access to health care, and social determinants of health.

Prerequisite: Graduate standing.

Schedule Type: Seminar

Contact Hours: 3 other

Grade Mode: Standard Letter

SBS 64600 EMERGING ISSUES IN LGBTQ+ PUBLIC HEALTH PRACTICE 3 Credit Hours

This course is an overview of emerging issues and their related challenges in the field of LGBTQ+ public health practice. In particular, this course focuses on emerging LGBTQ+ public health issues, with special emphasis on several current public health topics. Lectures, reading assignments, videos, assignments and individual projects are used to introduce students to the diversity and complexity of emerging public health issues and challenges associated with addressing emerging public health issues.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 64630 SEXUAL ORIENTATION AND GENDER IDENTITY IN PUBLIC HEALTH PRACTICE 3 Credit Hours

This course introduces students to the diverse concepts of sexual orientation and gender identity through the lens of public health practice.

The course prepares public health leaders and clinical practitioners to think critically about the unique health concerns and inherent systems of homophobia and heterosexism that negatively impact the health of the LGBTQ+ community and how to navigate LGBTQ+ public health practice to make positive community health change. Lectures, reading assignments, videos, assignments and individual projects are used to introduce students to the diversity and complexity of emerging public health issues and the challenges associated with addressing emerging public health issues.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 64700 COMMUNITY-BASED SUBSTANCE ABUSE PREVENTION FOR PUBLIC HEALTH PROFESSIONALS 3 Credit Hours

This course provides foundational knowledge for substance abuse prevention. In addition, this course enhances the knowledge and skills of public health professionals to enable them to implement evidence-based substance use prevention interventions and policies. The primary emphasis is on evidence-based interventions, policies and implementation quality and sustainability.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 64701 COMMUNITY-BASED PUBLIC HEALTH IMPLEMENTATION SYSTEMS 3 Credit Hours

This course focuses on public health prevention science and its application to the implementation of substance use interventions. The content focuses on community systems for addressing substance use problems that affect whole communities. These community systems incorporate evidence-based prevention interventions at various levels of influence within a socio-ecological perspective. Students will examine the development of community organizations that come together to address specific problems, and how they network and integrate with existing organizations that provide community services. The content draws from the International Standards on Drug Use Prevention that were published by the United Nations Office on Drugs and Crime (2013; 2015) and the European Drug Prevention Quality Standards published by the European Monitoring Centre on Drugs and Drug Addiction (2011). Primary emphasis is on evidence-based interventions and policies and on implementation quality and sustainability.

Prerequisite: SBS 64700; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 65010 RACISM: A PUBLIC HEALTH CRISIS 3 Credit Hours

Across the US, an increasing number of communities have declared racism as a public health crisis. This declaration is not based on an isolated incident, rather, it is the acknowledgement that racism is structural and has been embedded within the institutional policies and societal norms that are present in our everyday lives. This course will: Recognize racism in the US as a significant cause of poor health, disease, and persistent dis-ease among Black Americans; Explore the relationship between racism and health through a historic accounting of social, political, economic, and environmental conditions post-slavery through the current events of 2020; and, identify how, research, and advocacy can address anti-Black racism and promote health equity.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 73018 THEORIES OF PREVENTION SCIENCE 3 Credit Hours

Provides a background and theoretical review of prevention science as a multi-disciplinary field focusing on systematic inquiry on health behaviors including substance use (alcohol, tobacco and other drugs), physical activity, dietary practices, mental health, violence and injury and sexual behaviors.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 73019 EVALUATION RESEARCH METHODS IN PREVENTION SCIENCE 3 Credit Hours

This course examines the methods used by prevention science researchers to determine the effectiveness of public health programs. Focus is on advanced formative, process, impact and outcome evaluation methods. Qualitative and quantitative analysis techniques used for assessing program process and effects are discussed in the context of research evaluation.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 73020 ADVANCED RESEARCH METHODS IN PREVENTION SCIENCE 3 Credit Hours

Focuses primarily on advanced quantitative methods in the application of prevention science.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 80020 PROGRAM EVALUATION II: APPLICATION IN THE REAL WORLD 3 Credit Hours

(Slashed with SBS 60020) This course provides students with a more in-depth examination of program evaluation for public health professionals and the opportunity to apply their evaluation knowledge and skills to an existing health intervention. The content will delve deeply into formative and summative evaluation—including theoretical underpinnings, professional standards, measurement, research design and data collection and analysis. Students will be required to apply this knowledge to a selected program and produce an evaluation proposal acceptable for submission to a funding agency.

Prerequisite: HPM 63011; and doctoral standing.

Schedule Type: Seminar

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 80030 CODING FOR QUALITATIVE RESEARCH 1 Credit Hour

(Slashed with SBS 60030) The purpose of this course is to provide students with a brief but thorough overview of the basic process of coding text-based, unstructured data for qualitative research projects. Focus is on coding for descriptive or basic qualitative research; other methodologies are reviewed based on student needs.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 15 lecture

Grade Mode: Standard Letter

SBS 80040 TRANSCRIBING INDIVIDUAL AND GROUP INTERVIEWS FOR QUALITATIVE RESEARCH 1 Credit Hour

(Slashed with SBS 60040) The purpose of this course is to provide students an overview of, and applied practice in transcribing audio-recorded interview data as preparation for qualitative analysis techniques, using both content-focused and conversation-analytic approaches.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 15 lecture

Grade Mode: Standard Letter

SBS 80100 EMERGING ISSUES IN PREVENTION SCIENCE 3 Credit Hours

Survey of relevant challenges and issues facing prevention science researchers.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 80191 VARIABLE CONTENT SEMINAR IN SOCIAL AND BEHAVIORAL SCIENCES 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) Seminar on current and important topics in social and behavioral sciences. Subject matter varies depending on the topic.

Prerequisite: Doctoral standing.

Schedule Type: Seminar

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

SBS 80195 SPECIAL TOPICS IN SOCIAL AND BEHAVIORAL SCIENCES 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) Special topics to sample new offerings on topics in social and behavioral sciences.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

SBS 80196 INDIVIDUAL INVESTIGATION IN SOCIAL AND BEHAVIORAL SCIENCES 1-3 Credit Hours

Individual graduate investigation or research in areas related to social and behavioral sciences.

Prerequisite: Doctoral standing; and special approval.

Schedule Type: Individual Investigation

Contact Hours: 3-9 other

Grade Mode: Standard Letter-IP

SBS 80198 DIRECTED RESEARCH IN PREVENTION SCIENCE 1-15 Credit Hours

(Repeatable for credit) Directed research or individual investigation for doctoral students.

Prerequisite: Doctoral standing.

Schedule Type: Research

Contact Hours: 1-15 other

Grade Mode: Standard Letter

SBS 80199 DISSERTATION I 15 Credit Hours

(Repeatable for credit) Registration for two semesters required, first semester dissertation work begins and continues until completion of Dissertation II and 30 hours of total dissertation work.

Prerequisite: Doctoral standing; and special approval.

Schedule Type: Dissertation

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory-IP

SBS 80299 DISSERTATION II 15 Credit Hours

(Repeatable for credit) Second course of dissertation sequence completing requirement of with 30 total hours of dissertation work.

Prerequisite: SBS 80199; and special approval.

Schedule Type: Dissertation

Contact Hours: 15 other

Grade Mode: Satisfactory/Unsatisfactory-IP

SBS 83010 QUALITATIVE METHODS FOR PUBLIC HEALTH RESEARCH 3 Credit Hours

(Slashed with SBS 63010) In this course, students will be guided through exploration of the uses and value of qualitative approaches to research with humans through a combination of resource review and applied practice. Students will be provided with information about various methodologies that comprise qualitative inquiry, and will engage in practice efforts to gather, process, and analyze data, and to assess the quality of research reports.

Prerequisite: Doctoral standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

SBS 83011 QUALITATIVE DATA ANALYSIS 3 Credit Hours

(Slashed with SBS 63011) Students will be introduced to the process and goals of qualitative data analysis relevant to research design and study purpose, and will be provided opportunities to conduct coding and other types of analysis of qualitative data using both computer assisted and manual processes. Qualitative approaches potentially considered in this course include grounded theory, phenomenology, descriptive or generic approaches, content analysis, mixed methods, and others depending on needs and interests of students in the class. Students will additionally learn about and practice quality control measures that include creation of an audit trail, "member checking," composition of analytic memos, and other forms of researcher initiated documentation.

Prerequisite: SBS 83010; and doctoral standing.

- Applied practice experience placement at an approved public health agency under the guidance of a qualified preceptor (150 or 300 contact hours).
- Final portfolio/report and a presentation integrating theory and practice.
- Participation in at least one approved interprofessional education event (IPE); IPE requires students to participate at a specific time/date to be determined in consultation with the student's advisor.
- No more than one-half of a graduate student's coursework may be taken in 50000-level courses.
- Grades below C are not counted toward completion of requirements for the degree.

Program Learning Outcomes

Graduates of this program will be able to:

Evidence-based Approaches to Public Health

1. Apply epidemiological methods to the breadth of settings and situations in public health practice.
2. Select quantitative and qualitative data collection methods appropriate for a given public health context.
3. Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate.
4. Interpret results of data analysis for public health research, policy or practice.

Public Health and Health Care Systems

1. Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings.
2. Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels.

Planning and Management to Promote Health

1. Assess population needs, assets and capacities that affect communities' health.
2. Apply awareness of cultural values and practices to the design or implementation of public health policies or programs.
3. Design a population-based policy, program, project or intervention.
4. Explain basic principles and tools of budget and resource management. Select methods to evaluate public health programs.

Policy in Public Health

1. Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence.

2. Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes.
3. Advocate for political, social or economic policies and programs that will improve health in diverse populations.
4. Evaluate policies for their impact on public health and health equity.

Leadership

1. Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making.
2. Apply negotiation and mediation skills to address organizational or community challenges.

Communication

1. Select communication strategies for different audiences and sectors.
2. Communicate audience-appropriate public health content, both in writing and through oral presentation.
3. Describe the importance of cultural competence in communicating public health content.

Interprofessional Practice

1. Perform effectively on interprofessional teams.

Systems Thinking

1. Apply systems thinking tools to a public health issue.

Full Description

The Master of Public Health degree in Biostatistics prepares students in the quantitative science of health data collection, storage, retrieval, analysis and interpretation. Graduates are equipped to use statistical methods to design and analyze health-related surveys and experiments for improving health. The college's faculty research interests include applying biostatistical analysis to understand critical health problems.

Graduates in biostatistics are in demand at hospitals, pharmaceutical companies, state and local health departments, federal health agencies and biotechnology companies to analyze the effectiveness of new drugs and interventions, identify risk factors for disease and develop effective prevention strategies.

Clinical Epidemiology - M.S.

College of Public Health
www.kent.edu/publichealth

About This Program

The Master of Science degree in Clinical Epidemiology is a STEM-designated advanced degree that prepares students in the epidemiological and biostatistical methods related to clinical trials and clinical research. Students learn advanced methods of observational and experimental study designs and are able to understand disease prevention, development, prognosis and treatment. In addition, students master and are able to apply good clinical practices, clinical trial design and management, statistical analysis, study monitoring, pharmaceutical research and regulations related to clinical research.

Full Description

The Clinical Research graduate certificate is a flexible program that is designed for students with different goals and needs for advancing their understanding of clinical research methods. Students in the program choose from courses in research methods, biostatistics or health policy and have the option to complete a research practicum. This certificate is appropriate for a wide range of individuals, including clinicians who need advanced training in research methods and those who are seeking credentials to move into clinical research positions.

Students may apply the courses in the certificate toward a graduate degree in the College of Public Health.

- Minimum 50 percent of the total credit hours for the minor must be taken at Kent State (in residence).

Program Learning Outcomes

Graduates of this program will be able to:

1. Address the basic concepts, methods and tools of public health data collection, use and analysis and why evidence-based approaches are an essential part of public health practice.
2. Address the socio-economic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities.

Full Description

The Environmental Health Sciences for Natural Science Majors minor is intended for students who have a strong interest or curricular focus in a natural science major. This includes students in a variety of majors including, but not limited to, biology, chemistry, geology, geography, physics, botany and zoology. The minor provides students with

foundational concepts in environmental health as it relates to the broad field of public health.

Students who complete the required coursework and have 30 credit hours of coursework in specific public health areas, biology, chemistry, physics, geology, math or statistics can pursue a Registered Environmental Health Specialist (REHS) career path in State of Ohio agencies to become a Registered Environmental Health Specialist (REHS), and are well equipped to enter the workforce in a variety of career paths.

- No more than one-half of a graduate student's coursework may be taken in 50000-level courses.
- Grades below C are not counted toward completion of requirements for the degree.

Program Learning Outcomes

Graduates of this program will be able to:

Evidence-based Approaches to Public Health

1. Apply epidemiological methods to the breadth of settings and situations in public health practice.
2. Select quantitative and qualitative data collection methods appropriate for a given public health context.
3. Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate.
4. Interpret results of data analysis for public health research, policy or practice.

Public Health and Health Care Systems

1. Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings.
2. Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels.

Planning and Management to Promote Health

1. Assess population needs, assets and capacities that affect communities' health.
2. Apply awareness of cultural values and practices to the design or implementation of public health policies or programs.
3. Design a population-based policy, program, project or intervention.
4. Explain basic principles and tools of budget and resource management. Select methods to evaluate public health programs.

Policy in Public Health

1. Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence.
2. Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes.
3. Advocate for political, social or economic policies and programs that will improve health in diverse populations.
4. Evaluate policies for their impact on public health and health equity.

Leadership

1. Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making.
2. Apply negotiation and mediation skills to address organizational or community challenges.

Communication

1. Select communication strategies for different audiences and sectors.
2. Communicate audience-appropriate public health content, both in writing and through oral presentation.
3. Describe the importance of cultural competence in communicating public health content.

Interprofessional Practice

1. Perform effectively on interprofessional teams.

Systems Thinking

1. Apply systems thinking tools to a public health issue.

Full Description

The Master of Public Health degree in Epidemiology prepares students to analyze the distribution and determinants of disease, disabilities and death in populations. Graduates are able to apply quantitative and qualitative methods to investigate disease outbreaks, determine causal relationships between environmental and biological factors and conduct studies to project health trends in populations. Students benefit from public health faculty research agendas in immigrant and refugee health, chronic disease, cancer and infectious disease epidemiology.

Career opportunities for graduates include research positions in universities, medical schools and pharmaceutical companies; disease prevention specialists in hospitals; and surveillance managers in state and local health departments.

Health Services Administration - Minor

College of Public Health

www.kent.edu/publichealth

About This Program

3. Describe the how technology informs lifespan learning.
4. Explain evaluation methods, e-Health, decision support, and database systems as important information technologies for supporting healthcare decision-making.

5. Identify innovative technologies that have the potential to inform and transform public health.

Full Description

The Health and Technologies and Informatics minor provides students with knowledge and skills in public health and information technology. Students who are interested in public health face new challenges and opportunities with technology. Conversely, students in other fields related to technology are often presented with challenges and opportunities related to public health. Drawing on an interdisciplinary focus of public health, education, communication, geography, information, and educational technology, students increase their skill set for practice in an information-intensive health care environment.

Students in this minor will gain knowledge on how information technology is used to organize and analyze health records, health information databases and trends in technology to improve healthcare outcomes. For students with natural science, communication, business, computer, or information technology degrees, the minor courses will expose them to the uniqueness and complexity of work processes in public health and healthcare.

Full Description

The Healthcare Compliance graduate certificate provides the training necessary to enter this growing field where compliance professionals design and implement comprehensive programs to identify potential risk areas, develop policies, train staff, evaluate effectiveness and conduct investigations.

Healthcare spending accounts for approximately 19 percent of the entire U.S. economy. Unfortunately, some of that money is misspent in the form of fraud, waste and abuse. Federal and state governments continue to increase their scrutiny of healthcare organizations through a maze of complex law and regulations touching every part of the organization. The field of healthcare compliance is emerging as a response to these challenges.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

State Licensure in an allied health field ¹

or

Concentration Electives:

Public Health (PH) Electives, choose from the following (6 credit hours):

PH 20010	INTRODUCTION TO PUBLIC HEALTH INFORMATICS	
PH 30015	UNITED STATES HEALTH CARE SYSTEM	
PH 34001	PUBLIC HEALTH INTERVENTIONS I	
PH 34002	PUBLIC HEALTH INTERVENTIONS II	
PH 40013	CLINICAL EPIDEMIOLOGY BASICS	

PH 40014	CLINICAL TRIALS MANAGEMENT	
PH 44005	LEGAL ASPECTS OF HEALTH SERVICES MANAGEMENT	
PH 44010	PUBLIC HEALTH PLANNING AND FINANCE	
PH 44015	PUBLIC HEALTH MANAGEMENT	
PH 44020	PUBLIC HEALTH ETHICS IN PRACTICE, POLICY AND RESEARCH	
PH 44025	PRINCIPLES OF PUBLIC HEALTH LEADERSHIP	
Science Electives, choose from the following (6 credit hours):		
BSCI 11010	FOUNDATIONAL ANATOMY AND PHYSIOLOGY I (KBS) (KLAB)	
BSCI 11020	FOUNDATIONAL ANATOMY AND PHYSIOLOGY II (KBS) (KLAB)	
BSCI 20021	BASIC MICROBIOLOGY	
or BSCI 30171	GENERAL MICROBIOLOGY	
BSCI 21020	ANATOMY AND PHYSIOLOGY II	
BSCI 21010	ANATOMY AND PHYSIOLOGY I (KBS) (KLAB)	
BSCI 30050	HUMAN GENETICS	
or BSCI 30156	ELEMENTS OF GENETICS	
CHEM 10050	FUNDAMENTALS OF CHEMISTRY (KBS)	
or CHEM 10055	MOLECULES OF LIFE (KBS)	
or CHEM 10060	GENERAL CHEMISTRY I (KBS)	
HED 14020	MEDICAL TERMINOLOGY	
NURS 20950	HUMAN GROWTH AND DEVELOPMENT FOR HEALTH PROFESSIONALS	
NUTR 23511	SCIENCE OF HUMAN NUTRITION (KBS)	
PSYC 11762	GENERAL PSYCHOLOGY (DIVD) (KSS)	
SOC 12050	INTRODUCTION TO SOCIOLOGY (DIVD) (KSS)	
Additional Requirements (courses do not count in major GPA)		
Mathematics Elective, choose from the following:		3-5
CS 10051	COMPUTER SCIENCE PRINCIPLES (KMCR)	
MATH 10041	INTRODUCTORY STATISTICS (KMCR)	
MATH 10051	QUANTITATIVE REASONING (KMCR)	
MATH 10771	BASIC MATHEMATICAL CONCEPTS I PLUS (KMCR)	
MATH 10772	MODELING ALGEBRA PLUS (KMCR)	
MATH 10775	ALGEBRA FOR CALCULUS PLUS (KMCR)	
MATH 11008	EXPLORATIONS IN MODERN MATHEMATICS (KMCR)	
MATH 11009	MODELING ALGEBRA (KMCR)	
MATH 11010	ALGEBRA FOR CALCULUS (KMCR)	
MATH 11012	INTUITIVE CALCULUS (KMCR)	
MATH 11022	TRIGONOMETRY (KMCR)	
MATH 12002	ANALYTIC GEOMETRY AND CALCULUS I (KMCR)	
MATH 12011	CALCULUS WITH PRECALCULUS I (KMCR)	
MATH 12012	CALCULUS WITH PRECALCULUS II (KMCR)	
MATH 14001	BASIC MATHEMATICAL CONCEPTS I (KMCR)	
MATH 14002	BASIC MATHEMATICAL CONCEPTS II (KMCR)	
Kent Core Basic Sciences (must include one laboratory)		6-7
Kent Core Additional		6
General Electives (total credit hours depends on earning 120 credit hours, including 39 upper-division credit hours)		29
Minimum Total Credit Hours:		56

¹ At their time of admission, a student must submit a copy of their state licensure to an academic advisor in the College of Public Health. State licensure must be valid through the student's graduation term.

University Requirements

All students in a bachelor's degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Flashes 101 (UC 10001)	1 credit hour
Course is not required for students with 30+ transfer credits (excluding College Credit Plus) or age 21+ at time of admission.	
Diversity Domestic/Global (DIVD/DIVG)	2 courses
Students must successfully complete one domestic and one global course, of which one must be from the Kent Core.	
Experiential Learning Requirement (ELR)	varies
Students must successfully complete one course or approved experience.	
Kent Core (see table below)	36-37 credit hours
Writing-Intensive Course (WIC)	1 course
Students must earn a minimum C grade in the course.	
Upper-Division Requirement	39 credit hours
Students must successfully complete 39 upper-division (numbered 30000 to 49999) credit hours to graduate.	
Total Credit Hour Requirement	120 credit hours

Kent Core Requirements

Kent Core Composition (KCMP)	6
Kent Core Mathematics and Critical Reasoning (KMCR)	3
Kent Core Humanities and Fine Arts (KHUM/KFA) (min one course each)	9
Kent Core Social Sciences (KSS) (must be from two disciplines)	6
Kent Core Basic Sciences (KBS/KLAB) (must include one laboratory)	6-7
Kent Core Additional (KADL)	6
Total Credit Hours:	36-37

Program Learning Outcomes

Graduates of this program will be able to:

1. Overview of Public Health: Address the history and philosophy of public health as well as its core values, concepts and functions across the globe and in society.
2. Role and Importance of Data in Public Health: Address the basic concepts, methods and tools of public health data collection, use and analysis, and why evidence-based approaches are an essential part of public health practice.
3. Identifying and Addressing Population Health Challenges: Address the concepts of population health and the basic processes,

approaches and interventions that identify and address the major health-related needs and concerns of populations.

4. **Human Health:** Address the underlying science of human health and disease, including opportunities for promoting and protecting health across the life course.
5. **Determinants of Health:** Address the socio-economic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities.
6. **Project Implementation:** Address the fundamental concepts and features of project implementation, including planning, assessment and evaluation.
7. **Overview of the Health System:** Address the fundamental characteristics and organizational structures of the U.S. health system as well as the differences in systems in other countries.
8. **Health Policy, Law, Ethics and Economics:** Address the basic concepts of legal, ethical, economic and regulatory dimensions of health care and public health policy and the roles, influences and responsibilities of the different agencies and branches of government.
9. **Health Communications:** Address the basic concepts of public health-specific communication, including technical and professional writing, and the use of mass media and electronic technology.

Full Description

The Bachelor of Science in Public Health degree in Public Health broadly prepares students to enter the workforce as a public health professional or to enter an advanced program of study. Students explore the five disciplines of public health: biostatistics, environmental health, epidemiology, health policy and management and the social and behavioral sciences through general coursework.

The Public Health major comprises the following concentrations:

- The **Allied Health** concentration seeks to augment the career portfolio of the allied health professional or aspiring student. Students who are interested in a generalist focus in public health or interested in moving to a professional degree (accelerated nursing) or technical allied health degree (respiratory care, radiologic technology, occupational/physical therapy assisting, etc.) are encouraged to pursue this path. Students may currently hold or may be actively pursuing a state licensure in an allied health field and may be eligible to receive a maximum 12 credit hours of upper-division credit for their prior experience and demonstrated competency in select areas. Students without a state licensure may still pursue this concentration but will complete 12 hours of coursework in allied health-specific areas. Students in this concentration will be exposed to broad areas of public health including epidemiology, biostatistics, environmental health, global health and health policy; thus, preparing students to meet the increased demands for a trained and educated public health workforce.
- The **Clinical Trials Research** concentration focuses on training students in the epidemiology methods used in clinical research. The curriculum provides students a thorough understanding of the management of research studies; the scientific literature related to drugs, medical devices and other new therapies; and the federal regulations related to conducting clinical trials. Students are prepared to design and answer research questions, collect and manage data and communicate research findings to both scientific and lay audiences. An internship experience provides necessary experience in a clinical research setting. Potential places of employment for

graduates include hospitals, contract research organizations, medical schools and pharmaceutical companies where graduates assist with and manage clinical research studies.

- The **Community Health Outreach and Development** concentration focuses on identifying and exploring ways to influence the multi-level determinants of population health and health behaviors, from a perspective that prioritizes health equity and social justice. Approaches focus on community- and system-level strategies to promote health and healthy behaviors among populations and eliminate health disparities through media, policy and education initiatives. Career options include the public sector, social services, non-profit agencies and other community-based health promotion and advocacy efforts. Graduates are prepared to assist with developing, implementing and coordinating public health interventions that promote community health and organize diverse communities around issues related to health and health behavior.
- The **Global Health** concentration educates students in identifying and working to address the critical public health and human needs of diverse, underserved and vulnerable populations locally and globally. Students learn the need for multidisciplinary (biological and social sciences) approaches and cooperation to address the major global public health problems. In addition, they have the opportunity to focus on a specific aspect of global health, e.g. HIV/AIDS, health policy, health disparities, health education, environmental health, nutrition. Graduates are prepared to work at entry-level positions in public health with local, regional, national or international public health agencies in both public and private sectors. Students who pursue this concentration are required to participate in a study abroad experience and complete four courses (at the elementary and intermediate levels) of either Arabic, Chinese, French, Russian or Spanish
- The **Health Services Administration** concentration establishes a foundation for graduate work in health policy and management. Students analyze national and local public health infrastructure, evaluate the effectiveness and efficiency of health care delivery and explore the legal and ethical issues of health care administration. Graduates enter the health care workforce as finance managers, compliance officers, patient navigators, insurance specialists and other health care managers. Students are encouraged to pair this concentration with a minor.
- The **Pre-Medicine, Dentistry, Osteopathy** concentration includes preparatory courses for the Medical College Admissions Test (MCAT), the Dental Admissions Test (DAT) and admission entry into other professional schools including pharmacy, podiatry, occupational/physical therapy and physicians assistant programs. The overall curriculum—focusing on biological, social and economic determinants of health; prevention and control of diseases; introduction to biostatistics; and public health research—makes this program highly desirable for admission to professional schools. The unique features of the program open new opportunities and offer competitive advantages for students seeking to enter into clinical medicine.

Combined Degree Programs

- **Master of Public Health degree.** Students in any B.S.P.H. concentration may seek early admission to the M.P.H. degree in Biostatistics, Epidemiology or Public Health. Coursework for the Biostatistics and Epidemiology programs begin in the fall semester.

- **Master of Science degree in Clinical Epidemiology.** Students in any B.S.P.H. concentration may seek early admission to the M.S. degree (fall start only).

Students must consult with their undergraduate and faculty advisors each semester to create a plan substituting selected master's courses for selected undergraduate courses based on approved courses. Following graduation, students' applications to the M.P.H. or M.S. degree may be activated for admission.

Please refer to the Combined Bachelor's/Master's Degree Program policy in the Academic Policies section of the University Catalog for eligibility criteria for combined degree programs.

Program Learning Outcomes

Graduates of this program will be able to:

Evidence-based Approaches to Public Health

1. Apply epidemiological methods to the breadth of settings and situations in public health practice.
2. Select quantitative and qualitative data collection methods appropriate for a given public health context.
3. Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate.
4. Interpret results of data analysis for public health research, policy or practice.

Public Health and Health Care Systems

1. Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings.
2. Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels.

Planning and Management to Promote Health

1. Assess population needs, assets and capacities that affect communities' health.
2. Apply awareness of cultural values and practices to the design or implementation of public health policies or programs.
3. Design a population-based policy, program, project or intervention.
4. Explain basic principles and tools of budget and resource management.
5. Select methods to evaluate public health programs.

Policy in Public Health

1. Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence.
2. Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes.
3. Advocate for political, social or economic policies and programs that will improve health in diverse populations.
4. Evaluate policies for their impact on public health and health equity.

Leadership

1. Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making.

2. Apply negotiation and mediation skills to address organizational or community challenges.

Communication

1. Select communication strategies for different audiences and sectors.
2. Communicate audience-appropriate public health content, both in writing and through oral presentation.
3. Describe the importance of cultural competence in communicating public health content.

Interprofessional Practice

1. Perform effectively on interprofessional teams.

Systems Thinking

1. Apply systems thinking tools to a public health issue.

Dual Degree with Master of Business Administration

Students have the opportunity to complete a dual degree program with the Master in Public Health and the Master of Business Administration. A separate application must be submitted for each program. Students can view admission requirements for each program on their respective catalog page.

The M.B.A./M.P.H. dual degree program prepares students for responsible leadership positions and offers an integrated business and public health curriculum designed to help students develop real-world knowledge and skills needed to pursue success and management opportunities in the public health industry.

Full Description

The Master of Public Health degree in Public Health is designed to help students develop real-world knowledge and skills needed to pursue success in the public health industry.

The Public Health major comprises the following concentrations:

- The **Health Policy and Management** concentration prepares students to address public health risks and develop effective health services delivery models. This concentration incorporates health services research, health policy analysis and health care planning and management. Given the active research of the college's faculty in identifying service gaps and in developing evidence-based practices and policy analysis, students emerge with strong skills in health services management, alternative models of service financing and strategies for improving services. Career opportunities for graduates include administrative and management positions in hospitals, clinics, state and local health departments, nursing homes and mental health facilities; policy analyst positions in health planning organizations and governmental agencies; and planning and management positions in health maintenance organizations and health insurance companies.
- The **Social and Behavioral Sciences** concentration provides students with an interdisciplinary approach to improve health in populations across the life course. Students learn to apply theoretical principles to design, implement and evaluate effective programs that include behavioral and environmental approaches. Graduates are able to design and evaluate public health interventions intended to improve health for families, workplaces, communities and other settings. The active research of the college's faculty— particularly in the areas of childhood obesity, violence and injury prevention, substance abuse prevention and chronic disease prevention— provides students the opportunity to work on large-scale externally funded prevention research. Students are prepared for careers in health promotion; program design and evaluation; and prevention program development

for state and local health departments, workplace health promotion programs, hospitals, international health agencies, mental health centers and non-profit organizations. Students have the opportunity to declare the Addictions Counseling graduate certificate to become licensed chemical dependency counselors in the state of Ohio.

Students in the M.P.H. degree have the opportunity to complete a dual degree with the Doctor of Podiatric Medicine degree. A separate application must be submitted for each program. Students can view admission requirements for each program on their respective catalog page.

Public Health - Minor

College of Public Health

www.kent.edu/publichealth

About This Program

The Public Health minor integrates key aspects of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, communities and individuals. Students who choose to augment their major by adding the public health minor increase their awareness of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system and the monitoring of diseases in the community through applied public health research.

Full Description

The Ph.D. degree in Public Health bridges public safety and health career pathways to address a nationwide shortage of public health workers.

The Public Health major comprises the following concentrations:

- The **Epidemiology** concentration prepares students to examine the distribution and determinants of diseases in populations. Graduates are able to apply quantitative and qualitative methods to examine critical and/or emerging health issues, gain advanced ability to conduct large studies and analyze data sets in order to project health trends in populations of interest. Students in this concentration benefit from active faculty research agendas in biopreparedness, public health surveillance systems, chronic disease, cancer and infectious disease epidemiology.
- The **Health Policy and Management** concentration prepares students to design and implement studies and use advanced research methods to examine critical and emerging health issues. The heart of the concentration is a focus on interdisciplinary skills to meet the rapidly changing health needs of communities. Students benefit from active faculty research agendas in health systems research, occupational health and safety, reproductive health, HIV/AIDS, access to health care, health literacy, substance abuse prevention and community-based programming. *Applications to the Health Policy and Management concentration are not being accepted at this time.*
- The **Prevention Science** concentration is an interdisciplinary program aimed at promoting healthy behaviors in populations across the life course. Graduates are prepared to design and evaluate public health interventions and have expertise in a variety of theoretical and substantive perspectives for conducting research within systems of the family, health and education, workplace and community. Active faculty research provide students the opportunity to work on community-based prevention research.

Public Health - Undergraduate Certificate

About This Program

The Public Health undergraduate certificate integrates key aspects of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, communities and individuals. The certificate program is aimed at

students who are interested in gaining exposure to the field of public health, do not intend to pursue a bachelor's degree or already hold a bachelor's or associate degree and wish to broaden their knowledge of public health. Certificate graduates have an understanding of emerging issues in public health, the social and behavioral aspects to preventing disease, environmental health concepts, the changing U.S. health care system and the monitoring of diseases in the community through applied public health research.

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by

earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

Mission of the College

The mission of the College of the Arts is to transform lives through excellence in the arts by engaging our collective experiences across diverse and inclusive communities.

The College of the Arts uses its distinctive and innovative resources in the visual, performing and design arts to transform students' lives through the arts and to engage local and global communities to imagine, create and transform the world. The college's studios, exhibitions, performance spaces and lecture halls offer real-world experiences in which students learn and refine skills and put theory into practice. Students work side-by-side with faculty and professionals and create, conduct research and promote art, music, theatre, dance and fashion. Outreach to the larger community is manifested through exhibitions, performances, internships and experiential learning.

Grade Mode: Standard Letter

ARTH 42050 ART AND REVOLT IN THE NINETEENTH CENTURY 3 Credit Hours

(Slashed with ARTH 52050) The nineteenth century is one of the most dramatic time periods in Euro-American art history. Artists and viewers experienced a number of revolutions that profoundly changed the landscape of art and politics. More specifically, nineteenth-century art was created during a violent sweep of colonial expansion, a rise in industrialization, and a revolt against the French Salon. This course considers how artists responded to these social changes by exploring art movements in France and beyond across a wide range of artistic media—including spirit photographs, Moulin Rouge posters, and cemetery sculpture. Students will examine the most canonical nineteenth-century artists while also challenging their placement in the art history canon, which was established at the expense of women and people of color.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ARTH 42056 AMERICAN ART I: INDIAN WARS TO CIVIL WAR 3 Credit Hours

(Slashed with ARTH 52056) In this first section of American art history, students will explore the evolution of American art from European conquest through the American Revolution, and stretching to the Civil War. This time period in American history is characterized by waves of social unrest followed by periods of peace that American artists reflected and shaped in their work. The American-Indian Wars and the Trans-Atlantic slave trade also profoundly impacted the art and politics of the early United States, inspiring artists to support or protest conflicts in society with their art. Exchanges with African, Indigenous, as well as Asian and European peoples pervaded every aspect of art in the United States. In looking widely at objects such as paintings, clothing, food advertisements, and furniture, this class will examine debates about nationhood in early American art that exploded by the Civil War.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ARTH 42057 AMERICAN ART II: CIVIL WAR TO CIVIL RIGHTS 3 Credit Hours

(Slashed with ARTH 52057) In this second section and in-depth study of American art history, students will explore shifts and advancements in American art since the closing of the Civil War. New styles in abstraction and technological innovations in photography, lithography, and cinema dramatically altered the trajectory of American art and resulted in an expansion of art museums and patronage. As the United States gained economic power and expanded its borders, American art was also profoundly influenced by movements such as French Impressionism and Mexican muralism, and shaped by artists as close as Canada and as far as Australia. While American artists were debating whether to welcome “foreign” influences in their work, debates over racial segregation and women’s suffrage permeated art and politics on the homefront. In looking widely at objects such as paintings, photographs, silverware, and public monuments, this class will examine the art and visual culture of the United States from the Civil War to Civil Rights movement.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ARTH 42059 AFRICAN AMERICAN ART AND VISUAL CULTURE (DIVD) 3 Credit Hours

(Slashed with ARTH 52059) This course contextualizes American artists of African descent within the wider framework of U.S. art and visual culture. In looking at a wide range of media—across painting, photography, fashion and food—students study African American visual culture and its profound impact on American art at large. Students also explore the contested concept of “race” as it intersects with the production and patronage of African American art. Furthermore, students consider the benefits and pitfalls of the field and the ways in which art historians, critics and curators have treated African American art in U.S. museums. By the end of this course, students will have a deeper understanding of African American art and its tangled identity politics.

Prerequisite: Junior standing.

ARTH 42060 RUSSIAN ART 3 Credit Hours

(Slashed with ARTH 52060) This course explores the history of Russian art starting with the legacy of Byzantium and continuing up through the end of the Soviet era, from about 1000 CE to the present. Russia’s artistic movements have borrowed from a wide variety of cultures, both from groups that have attacked and conquered Russian territories as well as from groups that Russians themselves have conquered and attacked. We will focus on art that was produced in Russia as well as the cross-cultural influences that shaped and changed this art. Painting will be a dominant focus, coupled with a broad study including decorative arts like porcelain and embroidery as well as architecture, performance and illustration.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

ARTH 42061 EARLY 20TH-CENTURY ART 3 Credit Hours

(Slashed with ARTH 52061) This course explores the history of Early 20th-Century Modern Art up to the Second World War. Painting, sculpture, and architecture will be the dominant focus, coupled with alternative media that may include printmaking, photography, cinema, performance, and textile arts.

Prerequisite: ARTH 22007.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ARTH 42064 DADA AND SURREALISM 3 Credit Hours

Using a roughly chronological approach, students examine the profound and lasting contributions made by the Dadaists and Surrealists, as well as other revolutionary modernists of the early 20th century who sought to escape the traditional and rational in art and thought with sincerity in spite of the often superficially simple or even sometimes nihilistic appearance of their efforts. Through an analysis of selected works from this period and their relevant precursors, an attempt will be made to define the progressive ideas which led to the dismantling of previous standards and the rise of an anti-art spirit which continues today in various guises. Primary documents are considered regularly to provide students with a wider appreciation for the variety of media (e.g., film, theater, typography) and the issues and characters involved.

ARTH 42065 FEMINIST AND QUEER ART AND CULTURAL THEORY (DIVD) 3 Credit Hours

(Slashed with ARTH 52065) This advanced and interdisciplinary art history course explores feminist and queer visual histories, with particular attention to related cultural theories. In addition to paradigmatic ideologies of difference and language, this course is based on indispensable and sometimes peripheral postmodern milieux such as politicized identities, economies and the body, the importance of feeling and the everyday, feminist-Marxist critiques of community and the state and notions of lived histories/narratives. In regard to structure, this is a reading intensive course designed to empower students with 'influential' visual and textual languages, as well as knowledge of critical race, gender and sexuality studies. Readings, discussions, projects and knowledges-at-large are applicable in the artist's studio and more broadly, in humanities scholarship.

ARTH 42069 NATIONS AND BORDERS 3 Credit Hours

(Slashed with ARTH 52069) Emphasizing art and visual culture since World War II, this course considers the phenomenon of the nation-state in the context of embodied borders and diasporas. From the historically charged U.S.-Mexico borderlands to the Berlin Wall that divided East and West Germany, modernity is characterized by the development of nations and subsequent nationalisms as well as the delineation of borders and boundaries—and, once unpacked, theoretical and physical embodiments become legible. Taking a historically-grounded and global approach to state production and displacement, critical texts—many of which are grounded in feminist and queer theories—will address various interpretations of boundaries, especially national and corporeal. We will explore the intellectual history of nation-building and subsequent textual analyses of geographic and embodied borders. We will also study specific art historical moments, such as the militarization of the U.S.-Mexico frontera, Israel's occupation of Palestine, treating East and West Berlin as metaphor and allegory, the borderlands of queer and black identities in the United States and present-day Euro-American imperialism. The course format consists of rigorous class discussions guided by readings and illustrated presentations.

ARTH 42073 EPHEMERAL EXHIBITIONS: WORLD FAIRS, FESTIVALS AND BIENNIALS 3 Credit Hours

(Slashed with ARTH 52073) Revisiting a variety of time-based exhibition formats throughout recent history. From Joseph Paxton's Crystal Palace to the Venice Biennale, students examine a globally-oriented history of landmark exhibitions that were designed to dazzle audiences for a few months before being dismantled. Sponsored by governments, the corporate sector, grassroots movements, or cultural actors, the motivations for these exhibitions are as varied as the actual format the exhibition takes. We discuss not only the framework and ideologies behind such projects, but also the legacies they have had on more permanent arts institutions, as well as criticisms levied against them by artists.

ARTH 42076 HISTORIES AND THEORIES OF PHOTOGRAPHY AND VISUAL CULTURE 3 Credit Hours

(Slashed with ARTH 52076) Photography is embedded in every aspect of visual culture. As such, this course is a socio-political and socio-cultural study of photography. This course focuses on major developments in the field, including photography's advent, 19th-century commodity, scientific manipulations, 20th century Modernism and postwar aesthetics. Course also sketches political, cultural and theoretical developments and pertinent debates regarding emergence, significance, interpretation, perception and resonance. In addition to manifold moments in histories and theories of photography, course examines critical approaches to the history of art, including ecocriticism, feminism, critical race studies, queer studies and borderlands studies. While effort will be made to survey photography's history, this is not taxonomy of related movements and moments.

ARTH 52028 CONTEMPORARY AFRICAN ART: 1980-PRESENT 3 Credit Hours

(Slashed with ARTH 42028) An in-depth study of African art since the late twentieth century. Focused on artists from the continent and the Diaspora, the course begins by examining the impact that colonialism, with its appropriation, exploitation and reshaping of Africa, had on the arts in Africa (1960-1980). It then analyzes a broad spectrum of modern and contemporary African art forms (painting, printmaking, sculpture, textiles, photography, performance and film) and related art history, exhibition and critical texts from the 1980s to the present, with an emphasis on such issues as patronage, the commodification of art, urbanism, national consciousness, identity formation, new media and the effects of globalization.

ARTH 52050 ART AND REVOLT IN THE NINETEENTH CENTURY 3 Credit Hours

(Slashed with ARTH 42050) The nineteenth century is one of the most dramatic time periods in Euro-American art history. Artists and viewers experienced a number of revolutions that profoundly changed the landscape of art and politics. More specifically, nineteenth-century art was created during a violent sweep and architecture within the broader context of colonial expansion, a rise in industrialization and a revolt against the French Salon. Western culture and ideas. This course considers how artists responded to these social changes by exploring art movements in France and beyond across a wide range of artistic media—including spirit photographs, Moulin Rouge posters and cemetery sculpture. Students will examine the most canonical nineteenth-century artists while also challenging their placement in the art history canon, which was established at the expense of women and people of color.

ARTH 52056 AMERICAN ART I: INDIAN WARS TO CIVIL WAR 3 Credit Hours

(Slashed with ARTH 42056) In this first section of American art history, students will explore the evolution of American art from European conquest through the American Revolution, and stretching to the Civil War. This time period in American history is characterized by waves of social unrest followed by periods of peace that American artists reflected and shaped in their work. The American-Indian Wars and the Trans-Atlantic slave trade also profoundly impacted the art and politics of the early United States, inspiring artists to support or protest conflicts in society with their art. Exchanges with African, Indigenous, as well as Asian and European peoples pervaded every aspect of art in the United States. In looking widely at objects such as paintings, clothing, food advertisements, and furniture, this class will examine debates about nationhood in early American art that exploded by the Civil War.

ARTH 52057 AMERICAN ART II: CIVIL WAR TO CIVIL RIGHTS 3 Credit Hours

(Slashed with ARTH 42057) In this second section and in-depth study of American art history, students will explore shifts and advancements in American art since the closing of the Civil War. New styles in abstraction and technological innovations in photography, lithography and cinema dramatically altered the trajectory of American art and resulted in an expansion of art museums and patronage. As the United States gained economic power and expanded its borders, American art was also profoundly influenced by movements such as French Impressionism and Mexican muralism and shaped by artists as close as Canada and as far as Australia. While American artists were debating whether to welcome "foreign" influences in their work, debates over racial segregation and women's suffrage permeated art and politics on the homefront. In looking widely at objects such as paintings, photographs, silverware and public monuments, this class will examine the art and visual culture of the United States from the Civil War to Civil Rights movement.

ARTH 52166 HISTORIES AND THEORIES OF MODERN AND CONTEMPORARY ART 3 Credit Hours

This course examines both the visual and textual. As such we travel through contemporary moments such as Abstract Expressionism, Post-Painterly Abstraction, Nouveau Réalisme, Pop, Minimalism, Conceptual art and participatory art—to name a few. So too, this course entails a broad overview of critical and theoretical approaches often engaged by contemporary artists such as existentialism, psychoanalysis, structuralism, semiotics, feminist and queer theories, theories of modern sculpture, and theories of photography. When art and theory are taken together, modern and contemporary art underscores the cultural, sociopolitical and economic developments characteristic of the last half of the twentieth century. While time constraints restrict a consideration of every artist, a selection of practitioners will be addressed. That said, this course affirms the importance of questions rather than finite answers, celebrates ambiguity and neglects any attempt at surveying and summarizing the field of modern and contemporary art.

Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work, engendering a better understanding of how sculpture is situated within the context of culture and society at large. Students explore the formal properties and expressive potential of materials, including mold making and casting, wood, metal and experimental media. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding.

Prerequisite: None.

ARTS 24061 INTRODUCTION TO PAINTING 3 Credit Hours

Acrylic-based media is used to introduce the fundamentals of building a painting, the development of a sophisticated painting vocabulary, and a confident understanding of color. Emphasis on observational painting from life through varied techniques, with an introduction to tools, processes and best studio practices. Work must be retained for later portfolio presentation in Art 30001.

Prerequisite: None.

Schedule Type: Studio

Grade Mode: Standard Letter

ARTS 25310 FOUNDATIONS IN WEAVING 3 Credit Hours

Weaving – the systematic interlacement of two elements – is a direct way to construct a plane while simultaneously creating surface imagery. Integration of structure and surface provides the foundation for exploration with a focus on the development of constructed form to create compositional fields. Students are introduced to weaving on the four-shaft floor loom through the study of basic weave structures, fiber types, dye processes and yarn composition. The predictability of loom-controlled weaves is complicated with the exploration of hand dyed yarns and a variety of weaver-controlled techniques including tapestry, brocade and inlay. Study of the global, historic and contemporary position of weaving as an artistic discipline occurs through readings, presentations and class discussions. Overall, emphasis is placed on the development of a strong technical language to further expression with an awareness of from where materials and techniques come. In this intensive hands-on class, students produce both experimental compositions and finished works. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

Prerequisite: Accessories minor or School of Art major or School of Fashion major or Textiles minor.

Grade Mode: Standard Letter

ARTS 25400 CERAMICS I 3 Credit Hours

An introduction to the use of clay as applied to the design and construction of utilitarian and sculptural forms. Major emphasis is on developing hand building skills and wheel throwing techniques. Instruction in the basic understanding of clay bodies, glazes, decoration and firing of high-fire stoneware ceramics.

Prerequisite: None.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

Attributes: TAG Arts and Humanities

ARTS 25600 INTRODUCTION TO GLASS WORKING 3 Credit Hours

Introduction to studio glass through technique and brief history. Both basic glass blowing and glass casting techniques and problems are covered.

Prerequisite: None.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 25700 INTRODUCTION TO JEWELRY METALS 3 Credit Hours

Introduction to basic jewelry and metalsmithing techniques including cold connection, sheet fabrication, forming and finishing. Emphasis on advancing design skills and critical analysis. Exposure to historical and contemporary works.

Prerequisite: None.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34002 FIGURE DRAWING 3 Credit Hours

(Repeatable for credit) Extensive studio practice of traditional and contemporary approaches to the human figure. Critical analysis of the figure from the Renaissance through postmodernism. Students work from a nude model.

Prerequisite: ARTS 24002.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34003 DRAWING: STRUCTURE AND EXPERIMENTATION 3 Credit Hours

(Repeatable for credit) Extensive exploration of advanced drawing concepts and ideas as strategies for experimentation with process and materials.

Prerequisite: ARTS 24002.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34043 INTAGLIO 3 Credit Hours

(Repeatable for credit) This class is designed to give the intermediate student an overview of various intaglio processes in relationship to contemporary art practice. During this hands-on studio experience, students will apply principles and techniques taught in class into the evolution of their own personal aesthetics. The resulting visual statements will combine those principles, techniques, and aesthetics with ideas and conceptual content.

Prerequisite: ARTS 24040.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34044 SCREENPRINT 3 Credit Hours

(Repeatable for credit) This class is designed to give the intermediate student an overview of screenprint techniques in relationship to contemporary art practice. During this hands-on studio experience, students will apply principles and techniques taught in class into the evolution of their own personal aesthetics. The resulting visual statements will combine those principles and aesthetics with ideas and conceptual content.

Prerequisite: ARTS 24040.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34045 LITHOGRAPHY 3 Credit Hours

(Repeatable for credit) This class is designed to give the intermediate student an overview of various lithographic processes in relationship to contemporary art practice. During this hands-on studio experience, students will apply principles and techniques taught in class into the evolution of their own personal aesthetics. The resulting visual statements will combine those principles and aesthetics with ideas and conceptual content.

Prerequisite: ARTS 24040.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34050 LIFE MODELING 3 Credit Hours

(Repeatable for maximum of 6 credit hours) Traditional life modeling course in which students work almost exclusively from observation. The focus is on developing skills with clay, understanding the human form, understanding proportions, learning how to make armatures as well as developing a personal and expressive way of approaching the figure.

Prerequisite: ARTS 24051.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34051 SCULPTURAL OBJECT 3 Credit Hours

Course builds on ARTS 24051 with a greater emphasis on content, proficiency, technical expertise, craftsmanship and understanding of contemporary sculpture. Students explore the object in space, delineating issues of scale, materiality, representation, abstraction, metaphor and hybridity. Drawing on historical, aesthetic and technical strategies of generating and understanding sculpture, students are guided toward the realization of more sophisticated and complex ways of handling materials and incorporating meaning. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work, engendering a better understanding of how sculpture is situated within the context of culture and society at large. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding.

Prerequisite: ARTS 24051.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34052 TIME ARTS 3 Credit Hours

This interdisciplinary course investigates the fundamentals of time-based media and its intersection with sculptural practice. Students build on concepts from ARTS 24051 to gain a broader understanding of multiple methods of making including performance, video, site and situation-specific works, as well as the use of traditional sculptural materials. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work engendering a better understanding of how sculpture is situated within the contemporary art world. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding.

Prerequisite: ARTS 24051.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34053 SITE AND INSTALLATION 3 Credit Hours

This interdisciplinary course builds on concepts introduced in ARTS 24051, and expands on a variety of approaches in developing site-specific installations by considering the relationship between object/context, public/private, interior/exterior and urban/rural. Through the manipulation of materials, found objects and time-based media, students are introduced to concepts of space, intention, site and intervention through experimental approaches. Students further develop an understanding of material and context through in-depth readings, lectures and critical dialogue. Sculptural techniques, performance, photography and video art are covered and incorporated into the course. Studio time is supplemented by readings, lectures and site visits around campus.

Prerequisite: ARTS 24051.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34061 INTERMEDIATE PAINTING 3 Credit Hours

Continuation of painting from observation with an introduction to oil paints and mediums. Students will look outside of the still life at various subjects including spatial dynamics, the figure, and abstracted imagery. Introduction to oil painting tools, processes, and best studio practices.

Prerequisite: ARTS 24061.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34062 PAINTING STRATEGIES: PROCESS AND CONTENT 3 Credit Hours

This course focuses on conceptual prompts relative to contemporary issues to encourage a variety of processes and material approaches to making paintings. Students continue the idea of building a painting through the iterative process of making, analyzing, and editing their work throughout the semester. The painting is a live surface, a place to collect and record information, and this course insists that students consider a wide range of formal and conceptual choices to best address content. Each project will be initiated with rigorous research and further supported by exposure to visual examples of historic and contemporary painting, readings, written responses, seminar-style discussions, and numerous critiques of both in-progress and finished work.

Prerequisite: ARTS 34061.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34063 PAINTING STRATEGIES: IMAGE AND CONTENT 3 Credit Hours

This course investigates various contemporary painting strategies through the use of images as source materials, with a strong emphasis on narrative. Moving away from direct observation and towards the abstraction of imagery, students will be asked to approach their practice through research, preliminary studies and sketches, and a self-driven investigation of the use of images to create concept. Various prompts will be assigned and are designed to provide students with a stronger understanding of the use of found, self-produced, or appropriated imagery as reference for their work, while helping each student build a direction for their painting practice. We will look to other mediums such as film, photography, collage, and advertising to inform the painted image and improve the reading of contemporary painting. We will look to other mediums to better contextualize the painted image in contemporary art.

ARTS 35302 FELTMAKING 3 Credit Hours

Felt is an anti-fabric. Unique among textiles, feltmaking is the only method of cloth construction that wholly denies the grid. Through hands-on intensives and independent research, students engage the unique attributes of feltmaking through planar, pictorial and dimensional outputs. Felt's relationship to conceptual art, post-modernist sculpture, kitsch and camp are explored alongside the study of its social and cultural position within the global history of textiles. Material and technical vocabularies are framed through course texts, presentations and critical discussions. Students output studies and realized works which engage felt as an artistic medium. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

Prerequisite: Accessories minor or School of Art major or School of Fashion major or Textiles minor.

Schedule Type: Studio

Grade Mode: Standard Letter

ARTS 35305 TEXTILES: ACCESSORIES - DESIGN AND PRODUCTION 3 Credit Hours

Focus is on the design and production of textile accessories using the structural process of weaving. Texture, material, and color are critically and creatively considered in relation to the development of unique functional objects. Professional design objectives are presented.

Prerequisite: Special approval.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35310 OFF-LOOM 3 Credit Hours

This course focuses on the architectural aspects of interlacement. Moving off the loom, students construct with thread, yarn and other long flexible materials to transform line into planar or sculptural form. Explorations engage space and the pliability of textiles to emphasize the physical and tactile aspects of the materials and construction methods inherent to fiber. Processes such as plaiting, netting, knotting, looping, wrapping, coiling, ropemaking and basketry provide a foundational vocabulary in the exploration of dimensional textiles. The use of traditional materials are combined with found materials to further engage the question of material meaning. Students approach the sensibilities of weaving outside of highly technologized looms by working with direct and accessible tools to find freedom in the pursuit of experimental form. These material and technical vocabularies are framed through course texts, presentations and critical discussions. Students output studies and realized works which engage relief, sculpture and space. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35311 PRINT FOR TEXTILES AND ALTERNATIVE SURFACES 3 Credit Hours

As a holistic exploration of printed textiles, this course presents a range of processes for printing on cloth and alternative substrates. The use of inks, dyes, resists, discharges and additional chemical processes are introduced and explored. Students create hand-drawn, computer generated and photographic images to explore foundational print vocabularies such as block printing, mono printing, screen printing, multiples, color relationships, composition, repeat patterns, color layering, CMYK and experimental alternative processes. The relevance of printed textiles in the expanded field of contemporary art is emphasized. Interdisciplinary and experimental uses of the printed surface are encouraged throughout the development of personal research and practice. Critical discussion of core texts and individualized research occur in tandem with studio activity. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35312 DIGITAL TEXTILES 3 Credit Hours

With connections to technology and industry, textile practices employ digital platforms to speculate form and simulate materiality. Building off these techno-industrial strategies, students engage hybrid making that moves between the screen and material to imagine textile futures. Workshops present a digital textile vocabulary encompassing digital design, repeat and pattern layouts and material simulation. Student work is output through digital fabrication resources at the DI HUB. Coursework considers practices that engage textiles across experiential and technological platforms in contemporary art and design. Essential to this inquiry, students participate in critical discussions of core texts alongside their own making. Studio production engages digital design and outsourced fabrication. This work yields studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35313 BACKSTRAP WEAVING 3 Credit Hours

This rhizomatic potential of weaving is exemplified with backstrap weaving where looms are constructed and altered freely according to the improvisational vision of the weaver. Working from this orientation, this course engages the fluidity of the backstrap loom to transgress binary thinking, and further integrate skill building alongside conceptual development. Students combine traditional and experimental materials with the exploration of four-selvedge cloth, brocade and double cloth to develop a rigorous vocabulary. Visual, pictorial, architectural, sculptural, performative and nomadic practices are explored in a polynary pursuit of weaving. Making occurs in concert with the study of woven cosmologies that predate the modernist lineage. Studio production oscillates between generating material vocabularies and self-directed making workshopped through regular critiques. This coursework considers weaving expansively to disrupt dominant paradigms that define textility through technological and social binaries. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35316 DYE AND COLOR 3 Credit Hours

Color is a uniquely slippery element that can shift before our eyes just as it inflects social, political and emotional meaning upon the visual world. In this course, dyes are an interface to explore the formal and conceptual possibilities of color. Students are introduced to natural and synthetic dye technologies, and develop vocabulary in immersion dyeing, direct application of dyes, dye resists and dye discharges. Alongside material outputs, students investigate the social, economic and historic position of dyes and dyestuffs. Consideration of color as a source of content is a primary point of focus. Coursework includes studio activity, critical discussion of core texts and individualized research. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35400 FUNCTIONAL APPROACHES TO CLAY 3 Credit Hours

(Repeatable for credit) Intermediate ceramics course focused on creating functional pottery utilizing the wheel and hand building. A range of techniques are demonstrated to build skills and understanding of pottery making, design, function, surface decoration and the concept of made forms. Students learn how to make clay and glazes from dry materials as well as how to fire a gas kiln.

Prerequisite: ARTS 25400.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35401 SCULPTURAL APPROACHES IN CLAY 3 Credit Hours

(Repeatable for credit) An intermediate course focusing on all aspects of sculptural ceramics. Course may include explorations in three-dimensional form, the human figure, mold making, multiples and installation.

Prerequisite: ARTS 25400.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35602 FLAMEWORKED GLASS 3 Credit Hours

(Repeatable for credit) An investigation of techniques, tools, equipment and materials involved in glass lampworking processes. The course covers basic melting, shaping and blowing with a glass flameworking torch.

Prerequisite: None.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35603 GLASS BLOWING 3 Credit Hours

(Repeatable for credit) Further exploration of glass blowing techniques. Design, form, color and execution are emphasized.

Prerequisite: ARTS 25600.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35604 SCULPTURAL AND KILN-FORMED GLASS 3 Credit Hours

(Repeatable for credit) An overview and exploration of sculptural and kiln-formed glass techniques. Casting, pattern making, mold making and cold construction are covered. Design, form, content and technical execution and understanding operations of equipment are emphasized.

Prerequisite: Junior standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35700 JEWELRY CONCEPTS AND TECHNIQUES 3 Credit Hours

An in-depth exploration of jewelry making techniques such as enameling, casting, stone setting, mechanisms and fabrication. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.

Prerequisite: ARTS 25700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35701 METALSMITHING CONCEPTS AND TECHNIQUES 3 Credit Hours

Course offers an in-depth exploration of larger scale fabrication, mechanisms, chasing and repoussé and hammer working techniques (raising, forging and shell forming). Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.

Prerequisite: ARTS 25700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35704 ENAMELING CONCEPTS AND TECHNIQUES 3 Credit Hours

(Repeatable for credit) An in-depth exploration of vitreous enameling techniques on two-dimensional surfaces. Champlevé, cloisonné and sifted enamel approaches are highlighted. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.

Prerequisite: ARTS 25700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44002 ADVANCED DRAWING FOR ALL DISCIPLINES 3 Credit Hours

(Repeatable for credit) (Slashed with ARTS 54002) An advanced drawing course, open to all studio disciplines, with an emphasis on students pursuing individually conceived problems in close consultation one-on-one with faculty.

Prerequisite: ART 30001; and ARTS 24002.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44010 ADVANCED FINE ART PHOTOGRAPHY 3 Credit Hours

Combined studio/lecture course offering more advanced, conceptual approaches to the contemporary applications of photographic imaging for artists. Students work with larger scale printing formats, more involved research and greater depth of involvement with the photographic medium.

Prerequisite: ARTS 24010 and ART 30001.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44011 DIGITAL FINE ART PHOTOGRAPHY 3 Credit Hours

(Slashed with ARTS 54011) Students develop their technical and conceptual skills in fine art digital photography, and develop a contemporary approach to working with the medium. Students explore various photographic and digital techniques, and form an awareness of such techniques in contemporary photography.

Prerequisite: Minimum C grade in ART 10022.

Schedule Type: Studio

Contact Hours: 5 other

Grade Mode: Standard Letter

ARTS 44043 ADVANCED PRINT MEDIA 3 Credit Hours

(Repeatable for maximum 9 credit hours) Advanced printmaking course with emphasis on students producing new, individually conceived visual works in print media in close consultation with faculty.

Prerequisite: ART 30001; and ARTS 34043 or ARTS 34044 or ARTS 34045.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44045 ART OF THE BOOK 3 Credit Hours

(Slashed with ARTS 54045) An introduction to artists' books. A variety of binding methods and strategies for creating art through alternative and traditional book forms are introduced. Students complete projects and develop a personal visual language through the book form.

Prerequisite: Junior standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44046 PAPERMAKING 3 Credit Hours

(Slashed with ARTS 54046) This course introduces students to both traditional and experimental uses of handmade paper. This course combines presentations, demonstrations, group brainstorming sessions, field trips and critiques to apply towards papermaking projects. An artist research presentation and final presentation are required to encourage students to engage in outside resources and self reflect on semester-long growth. Papermaking techniques include but are not limited to: European sheet formation, pulp pigmentation, pulp painting, stenciling, embedding, paper casting and sheet wrapping. Paper fibers incorporated in this course include but are not limited to: abaca, cotton, flax and mulberry. Both two-dimensional and three-dimensional approaches to papermaking are explored. Exploration and experimentation are encouraged with equal demands on craft.

Prerequisite: Junior standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44051 ADVANCED SCULPTURAL PRACTICE 3 Credit Hours

(Repeatable for credit) Course is self-directed, in which students create a series of sculptural works in consultation with the instructor and through ongoing student-led presentations, discussions and in-progress and final critiques. Emphasis is on creating a body of work throughout the semester that is informed by and demonstrates an awareness of contemporary practice in terms of approaches to content, form and presentation. Students can work in a variety of ways: object making, installation, site-based and/or time-based approaches. Research and writing are emphasized. Readings, slide presentations, discussions and critiques help provide context and vocabulary for student development.

Prerequisite: ART 30001 and ARTS 24051; and ARTS 34051 or ARTS 34052 or ARTS 34053.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44060 ADVANCED PAINTING: PRACTICE AND THEORY 3 Credit Hours

(Repeatable for credit) Advanced painting course with an emphasis on pursuing individually conceived problems in close consultation with faculty.

Prerequisite: ART 30001; and ARTS 34061; and ARTS 34062 or ARTS 34063.

Schedule Type: Studio

Contact Hours: 6 other

ARTS 44070 DIGITAL FABRICATION IN STUDIO ART 3 Credit Hours

(Slashed with ARTS 54070) This course is an introduction to digital fabrication technologies as they relate to a studio practice. Mastery of software skills enables one to better explore object-making as a medium of personal expression. In addition to technical skills, the course will introduce relationships between form, subject matter, and content. Projects will include technical and conceptual problem solving, design lessons, object making and short student lead initiatives to connect to maker spaces and industries that can support future making. Instructor facilitated discussions between students will form a community of mutual learning.

Prerequisite: None.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44091 VARIABLE CONTENT SEMINAR: STUDIO ART 3 Credit Hours

(Repeatable for credit) (Slashed with ARTS 54091) Contemporary issues related to visual arts are explored through presentation, lecture, and discussion. Guest speakers augment staff.

Prerequisite: Junior or senior standing.

Schedule Type: Seminar

Contact Hours: 3 other

Grade Mode: Standard Letter

ARTS 44096 INDIVIDUAL STUDY: STUDIO ART 1-6 Credit Hours

(Repeatable for credit) Additional study in area of student's choice in consultation with advisor.

Prerequisite: ART 30001; and a major in Studio Art; and special approval.

Schedule Type: Individual Investigation

Contact Hours: 2-12 other

Grade Mode: Standard Letter

ARTS 44098 RESEARCH IN STUDIO ART (ELR) 1-3 Credit Hours

(Repeatable for credit) Studio research in the visual arts.

Grade Mode: Standard Letter-IP

Attributes: Experiential Learning Requirement

ARTS 44192 INTERNSHIP OR PRACTICUM IN STUDIO ART (ELR) 1-6 Credit Hours

(Repeatable for credit) (Slashed with ARTS 54192) An undergraduate, experience-based learning activity carried out in a visual arts setting. Emphasis is on the goals of connecting ideas, concepts, and skills developed in coursework to applications in new or different contexts, demonstrating how this experience has broadened students' understanding of their discipline, and reflection on the significance of the experience.

Prerequisite: A major in the School of Art; junior or senior standing; and special approval of faculty sponsor.

Schedule Type: Practical Experience

Contact Hours: 3-18 other

Grade Mode: Standard Letter-IP

Attributes: Experiential Learning Requirement

ARTS 45080 KENT BLOSSOM ART 1-6 Credit Hours

(Repeatable for credit) (Slashed with ARTS 55080) Studio exploration of selected concepts in studio art: painting; drawing; sculpture and expanded media; print media and photography; ceramics; glass; jewelry, metals and enameling; textiles. Content varies with each section offered.

Prerequisite: Special approval.

Schedule Type: Studio

Contact Hours: 2-12 other

Grade Mode: Standard Letter-IP

ARTS 45089 INTERNATIONAL EXPERIENCE: STUDIO ART (DIVG) (ELR) 1-3 Credit Hours

(Repeatable for credit) (Slashed with ARTS 55089) A Kent State faculty-led study abroad experience in studio art that integrates traditional classroom learning with experiential activities and site visits outside the United States.

Prerequisite: Studio Art major; and special approval.

Schedule Type: International Experience, Lecture

Contact Hours: 1-3 other

Grade Mode: Satisfactory/Unsatisfactory

Attributes: Diversity Global, Experiential Learning Requirement

ARTS 45090 STUDY AWAY: STUDIO ART (ELR) 1-3 Credit Hours

(Slashed with ARTS 55090)(Repeatable for credit) Study away in studio art disciplines at a site at or away from Kent State University.

Prerequisite: Studio Art major.

Schedule Type: Study Away

Contact Hours: 1-3 other

Grade Mode: Satisfactory/Unsatisfactory

Attributes: Experiential Learning Requirement

ARTS 45095 SPECIAL TOPICS: STUDIO ART 1-6 Credit Hours

(Repeatable for credit) (Slashed with ARTS 55095) Specialized courses in studio art that focus on specific techniques and media.

Prerequisite: Special approval.

Schedule Type: Studio

Contact Hours: 2-12 other

Grade Mode: Standard Letter

ARTS 45098 SENIOR THESIS RESEARCH AND PROPOSAL (ELR) 1 Credit Hour

(Repeatable for credit) Preparatory course, which acts as an exploratory period for students to develop their ideas - conceptually, thematically and materially - through research, writing and physical material studies. Upon successful completion, students may continue with ARTS 45099.

Prerequisite: Major in Studio Art; senior standing; and special approval.

Schedule Type: Research

Contact Hours: 1.6 other

Grade Mode: Satisfactory/Unsatisfactory-IP

Attributes: Experiential Learning Requirement

ARTS 45099 SENIOR THESIS EXHIBITION (ELR) 3 Credit Hours

This course prepares students for the challenges of a creative professional practice in their chosen discipline. As the culmination of undergraduate studies, the course serves as a capstone experience for students in their chosen concentration. Provides students an opportunity to independently develop and create a body of work for exhibition and oral review with faculty. Requires the completion of an undergraduate thesis and professional caliber photo documentation of the exhibition.

Prerequisite: ART 30001; and special approval.

Schedule Type: Project or Capstone

ARTS 45300 JACQUARD: DIGITAL WEAVING 3 Credit Hours

(Slashed with ARTS 55300)(Repeatable for credit) The digitally interfaced jacquard goes beyond the limitations of the floor loom, allowing for direct control of individual threads to enable image materialization. Incorporating mediation and handwork, students explore the historical and conceptual interstices of digital technology, weaving and picture-making. This advanced course investigates the tensions between digital interfaces and material outputs while engaging their cooperative possibilities. Inquiries into the implications of aesthetics, skill and technology are explored alongside the relationship of cloth and image. A vocabulary of woven constructions, patterns, colors and textures are developed using the digital jacquard loom. Coursework incorporates the computer, handweaving, reading, research and critical dialogue. A personal laptop computer is required for this course. We reclaim the jacquard as a hand loom to articulate form that can only emerge through the confrontation and synthesis of body and technology. The weaver embodies the cyborg. Students who do not meet the prerequisites may register for the course with special approval. Please speak to an advisor for more information.

Prerequisite: ARTS 45314 or ARTS 45351; and junior standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45301 TEXTILES: ADVANCED STUDIO 3 Credit Hours

Structured time for individual investigations in textiles. Emphasis on self-designed study. Bi-weekly presentations of contemporary work in textiles and weekly discussions or critiques with open studio.

Prerequisite: ART 30001; and special approval.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45307 TEXTILES: WEAVING AND COLOR 3 Credit Hours

(Slashed with ARTS 55307) This course will provide students with an opportunity to explore numerous techniques that emphasize the interaction of color in relation to the unique interlacement process of weaving. Use of different looms (including the floor and frame) will provide the means to integrate color with patterns and image in the connection of warp and weft. Immersion dyeing will be introduced along with specialized direct dye application methods.

Prerequisite: Special approval.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45308 TEXTILE ARTS AND GENDER 3 Credit Hours

(Slashed with ARTS 55308) Textile Arts and Gender is designed as an exploratory learning experience. Through weekly readings and discussions, students will engage with historical and contemporary ideas of how textiles relate to gender and how this informs contemporary textile art practice. Simultaneously, students will be learning textile art techniques chosen because of their close association with historical notions of the feminine, the decorative, and the domestic. Students will also study the contemporary use of these same techniques in textile works that explore the concepts of gender, feminism, and subversion.

Prerequisite: None.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45314 PRACTICES IN WEAVING: TAPESTRY 3 Credit Hours

(Slashed with ARTS 55314)(Repeatable for credit) This intensive studio course considers tapestry expansively as an interface through which weaving contributes to aesthetics and meaning according to its own logic and history. Woven form is realized in collaboration with the tectonic grid of the loom, yielding a unique relationship to image-making; the structural surface and the image it bears are one and the same. Working with multi-harness floor looms, students engage this question through rigorous material explorations. Vocabulary is expanded through the study of double cloth, discontinuous/supplementary wefts and dye processes. The position of weaving as a progenitor of abstraction and the role of color as a catalyst for meaning are essential points of inquiry. Critical discussion of core texts and individualized research occur in tandem with studio activity. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. This work considers the practice of weaving as an expansive playground to complicate the paradigms of contemporary art with textility. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

Prerequisite: ARTS 25310.

ARTS 45351 PRACTICES IN WEAVING: LOOM-THINKING 3 Credit Hours

(Slashed with ARTS 55351)(Repeatable for credit) This intensive studio course focuses on weaving and its relationship to the evolving landscape of contemporary art. Working with multi-harness floor looms, students engage rigorous questions in imagery, sculptural form and spatial intervention. Vocabulary is expanded through the study of complex woven constructions, hand and digital drafting and dye processes. Emphasis is placed on developing fluency with the language and logic of the loom. Here, students enter the space of "loom-thinking" to create, mutate, subvert and interrupt weave drafts and thread interlacements in the production of woven form. Through their developing technical virtuosity, students push the algorithmic sensibility of weaving toward visual and material poetics. Critical discussion of core texts and individualized research occur in tandem with studio activity. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. This work considers the practice of weaving as an expansive playground to complicate the paradigms of contemporary art with textility. ARTS 45400 ADVANCED CERAMICS 3 Credit Hours

(Repeatable for credit) Course is designed to assist and guide students in developing their own personal art practice, concepts and skills using the ceramic medium. Personal research and critical thinking are emphasized during class discussions and critiques.

Prerequisite: ART 30001; and ARTS 35400 or ARTS 35401.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45600 ADVANCED GLASS WORKING 3 Credit Hours

(Repeatable for credit) Individual exploration of sculptural and hot glass techniques. Design, form, content and execution strongly emphasized. Introduction to studio facility design, construction and maintenance.

Prerequisite: ART 30001; and two of the following courses: ARTS 35602, ARTS 35603 and ARTS 35604.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45700 JEWELRY DESIGN AND PRODUCTION 3 Credit Hours

Course examines strategies and techniques to effectively enter the jewelry field. Industrial applications to produce multiples, research into specialized markets and packaging of work are addressed. Design and professional practice skills are emphasized.

Prerequisite: ARTS 35700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45705 CAD FOR JEWELRY 3 Credit Hours

(Slashed with ARTS 55705) Students develop a set of comprehensive computer-aided design (CAD) skills to be utilized in a variety of studies such as sculpture design, jewelry making and many others. CAD skills are developed through the investigation of laser cutting, 3D modeling, project planning and 3D printing. Mastery of these techniques enable students to better explore object-making as a medium of personal expression. Although there are many technical components to learn, the instructor also focuses on the relationship between form, subject matter and content.

Prerequisite: ART 30001 and ARTS 25700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45707 CONTEMPORARY APPROACHES IN METALSMITHING 3 Credit Hours

Course introduces students to current trends in the creation of metalsmithed objects. "Materialsmiting", new technologies and industrial applications are joined with historically important metalsmithing principles in the ideation and creation of new works. Research and conceptual development are emphasized.

Prerequisite: ART 30001 and ARTS 35701.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45708 BODY ORNAMENTATION 3 Credit Hours

(Slashed with ARTS 55708)(Repeatable for credit) Course addresses the expanding theories and techniques used to adorn the body within jewelry metals and enamel. New technologies, material exploration and contemporary practices in adornment are presented. Conceptual development and research are emphasized.

Prerequisite: ARTS 25700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 54002 ADVANCED DRAWING FOR ALL DISCIPLINES 3 Credit Hours

(Repeatable for credit) (Slashed with ARTS 44002) An advanced drawing course, open to all studio disciplines, with an emphasis on students pursuing individually conceived problems in close consultation one-on-one with faculty.

Prerequisite: Graduate standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 54011 DIGITAL FINE ART PHOTOGRAPHY 3 Credit Hours

(Slashed with ARTS 44011) Students develop their technical and conceptual skills in fine art digital photography, and develop a contemporary approach to working with the medium. Students explore various photographic and digital techniques and form an awareness of such techniques in contemporary photography.

Prerequisite: Graduate standing.

Schedule Type: Studio

Contact Hours: 5 other

Grade Mode: Standard Letter

ARTS 54045 ART OF THE BOOK 3 Credit Hours

(Slashed with ARTS 44045) An introduction to artists' books. A variety of binding methods and strategies for creating art through alternative and traditional book forms are introduced. Students complete projects and develop a personal visual language through the book form.

Prerequisite: Master of Arts degree or Master of Fine Arts degree; and graduate standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 54046 PAPERMAKING 3 Credit Hours

(Slashed with ARTS 44046) This course introduces students to both traditional and experimental uses of handmade paper. This course combines presentations, demonstrations, group brainstorming sessions, field trips and critiques to apply towards papermaking projects. An artist research presentation and final presentation are required to encourage students to engage in outside resources and self reflect on semester-long growth. Papermaking techniques include but are not limited to: European sheet formation, pulp pigmenting, pulp painting, stenciling, embedding, paper casting and sheet wrapping. Paper fibers incorporated in this course include but are not limited to: abaca, cotton, flax and mulberry. Both two-dimensional and three-dimensional approaches to papermaking are explored. Exploration and experimentation are encouraged with equal demands on craft.

Prerequisite: Graduate standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 54070 DIGITAL FABRICATION IN STUDIO ART 3 Credit Hours

(Slashed with ARTS 44070) This course is an introduction to digital fabrication technologies as they relate to a studio practice. Mastery of software skills enables one to better explore object-making as a medium of personal expression. In addition to technical skills, the course will introduce relationships between form, subject matter, and content. Projects will include technical and conceptual problem solving, design lessons, object making, and short student lead initiatives to connect to makerspaces and industries that can support future making. Instructor facilitated discussions between students will form a community of mutual learning.

Prerequisite: Graduate standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 54091 VARIABLE CONTENT SEMINAR: STUDIO ART 3 Credit Hours

(Repeatable for credit) (Slashed with ARTS 44091) Contemporary issues related to visual arts are explored through presentation, lecture and discussion. Guest speakers augment staff.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Seminar

Contact Hours: 3 other

Grade Mode: Standard Letter

ARTS 54192 INTERNSHIP OR PRACTICUM IN STUDIO ART 1-6 Credit Hours

(Repeatable for credit) (Slashed with ARTS 44192) An undergraduate, experience-based learning activity carried out in a visual arts setting. Emphasis is on the goals of connecting ideas, concepts, and skills developed in coursework to applications in new or different contexts, demonstrating how this experience has broadened students' understanding of their discipline, and reflection on the significance of the experience.

Prerequisite: A major in the School of Art; and graduate standing; and special approval.

Schedule Type: Practical Experience

Contact Hours: 3-18 other

Grade Mode: Standard Letter-IP

ARTS 55080 KENT BLOSSOM ART 1-6 Credit Hours

(Repeatable for credit) (Slashed with ARTS 45080) Studio exploration in the visual arts, including ceramics, drawing, glass, jewelry-metals-enameling, painting, print media and photography, sculpture and expanded media and textiles.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Studio

Contact Hours: 2-12 other

Grade Mode: Standard Letter-IP

ARTS 55089 INTERNATIONAL EXPERIENCE: STUDIO ART 1-3 Credit Hours

(Repeatable for credit) (Slashed with ARTS 45089) A Kent State faculty-led study abroad experience in studio art that integrates traditional classroom learning with experiential activities and site visits outside the United States.

Prerequisite: Studio Art major; and graduate standing; and special approval.

Schedule Type: International Experience, Lecture

Contact Hours: 1-3 other

Grade Mode: Satisfactory/Unsatisfactory

ARTS 55090 STUDY AWAY: STUDIO ART 1-3 Credit Hours

(Slashed with ARTS 45090)(Repeatable for credit) Study away in studio art disciplines at a site at or away from Kent State University.

Prerequisite: Studio Art major; and graduate standing.

Schedule Type: Study Away

Contact Hours: 1-3 other

Grade Mode: Satisfactory/Unsatisfactory

ARTS 55095 STUDIO ART: SPECIAL TOPICS 1-6 Credit Hours

(Repeatable for credit) (Slashed with ARTS 45095) Specialized courses in studio art that focus on specific techniques and media.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Studio

Contact Hours: 2-12 other

Grade Mode: Standard Letter

ARTS 55300 JACQUARD: DIGITAL WEAVING 3 Credit Hours

(Slashed with ARTS 45300)(Repeatable for credit) The digitally interfaced jacquard goes beyond the limitations of the floor loom, allowing for direct control of individual threads to enable image materialization. Incorporating mediation and handwork, students explore the historical and conceptual interstices of digital technology, weaving and picture-making. This advanced course investigates the tensions between digital interfaces and material outputs while engaging their cooperative possibilities. Inquiries into the implications of aesthetics, skill and technology are explored alongside the relationship of cloth and image. A vocabulary of woven constructions, patterns, colors and textures are developed using the digital jacquard loom. Coursework incorporates the computer, handweaving, reading, research and critical dialogue. A personal laptop computer is required for this course. We reclaim the jacquard as a hand loom to articulate form that can only emerge through the confrontation and synthesis of body and technology. The weaver embodies the cyborg.

Prerequisite: Studio Art major; and graduate standing; and special approval.

Schedule Type: Studio

Grade Mode: Standard Letter

ARTS 55307 TEXTILES: WEAVING AND COLOR 3 Credit Hours

(Slashed with ARTS 45307) This course will provide students with an opportunity to explore numerous techniques that emphasize the interaction of color in relation to the unique interlacement process of weaving. The use of different looms (including the floor and frame) will provide the means to integrate color with patterns and image in the connection of warp and weft. Immersion dyeing will be introduced along with specialized direct dye application, methods.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 55308 TEXTILE ARTS AND GENDER 3 Credit Hours

(Slashed with ARTS 55308) Textile Arts and Gender is designed as an exploratory learning experience. Through weekly readings and discussions, students will engage with historical and contemporary ideas of how textiles relate to gender and how this informs contemporary textile art practice. Simultaneously, students will be learning textile art techniques chosen because of their close association with historical notions of the feminine, the decorative, and the domestic. Students will also study the contemporary use of these same techniques in textile works that explore the concepts of gender, feminism and subversion.

Prerequisite: Graduate standing.

ARTS 55708 BODY ORNAMENTATION 3 Credit Hours

(Slashed with ARTS 45708)(Repeatable for credit) Course addresses the expanding theories and techniques used to adorn the body within jewelry metals and enamel. New technologies, material exploration and contemporary practices in adornment are presented. Conceptual development and research are emphasized.

Prerequisite: Graduate standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 64000 GRADUATE SEMINAR I: STUDIO ART 3 Credit Hours

(Repeatable for credit) This graduate seminar intends to bring together graduate students working across disciplines to facilitate their participation in creating a framework for understanding the practice of art-making in relation to the contemporary global and cultural terrain.

Prerequisite: Graduate standing.

Schedule Type: Seminar

Contact Hours: 3 other

Grade Mode: Standard Letter

ARTS 64001 GRADUATE SEMINAR II: STUDIO ART 3 Credit Hours

(Repeatable for credit) This graduate seminar is an advanced course which intends to bring together graduate students working across disciplines to facilitate their participation in creating a framework for understanding the practice of art-making in relation to the contemporary global and cultural terrain.

Prerequisite: ARTS 64000; and graduate standing.

Schedule Type: Seminar

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ARTS 64040 GRADUATE STUDIO: PRINT MEDIA AND PHOTOGRAPHY I 1-9 Credit Hours

(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Print Media and Photography concentration.

Prerequisite: Print media and photography concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 64041 GRADUATE STUDIO: PRINT MEDIA AND PHOTOGRAPHY II 1-9 Credit Hours

(Repeatable for credit) Advance research-based, hands-on studio course providing a context for individual creative projects in the Print Media and Photography concentration.

Prerequisite: ARTS 64040; and print media and photography concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 64050 GRADUATE STUDIO: SCULPTURE AND EXPANDED MEDIA I 1-9 Credit Hours

(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Sculpture and Expanded Media concentration.

Prerequisite: Sculpture and expanded media concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 64051 GRADUATE STUDIO: SCULPTURE AND EXPANDED MEDIA II 1-9 Credit Hours

(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects in the Sculpture and Expanded Media concentration.

Prerequisite: ARTS 64050; and sculpture and expanded media concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 64060 GRADUATE STUDIO: DRAWING AND PAINTING I 1-9 Credit Hours

(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Drawing and Painting concentration.

Prerequisite: Drawing or painting concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 64061 GRADUATE STUDIO: DRAWING AND PAINTING II 1-9 Credit Hours

(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects in the Drawing or Painting concentration.

Prerequisite: ARTS 64060; and painting or drawing concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 64096 INDIVIDUAL INVESTIGATION STUDIO ART 1-3 Credit Hours

(Repeatable for credit) Independent study in studio art.

Prerequisite: Master of Art or Master of Fine Arts degree in the School of Art; and graduate standing; and special approval.

Schedule Type: Individual Investigation

Contact Hours: 3-9 other

Grade Mode: Standard Letter-IP

ARTS 64098 RESEARCH IN STUDIO ART 1-15 Credit Hours

(Repeatable for credit) Studio research in the visual arts.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Research

Contact Hours: 1-15 other

Grade Mode: Standard Letter

ARTS 65095 STUDIO ART: ADVANCED SPECIAL TOPICS 1-6 Credit Hours

(Repeatable for credit) Advanced specialized courses in studio art that focus on specific techniques and media.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Studio

Contact Hours: 2-12 other

Grade Mode: Standard Letter

ARTS 65300 GRADUATE STUDIO: TEXTILES I 1-9 Credit Hours

(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Textiles concentration.

Prerequisite: Textiles concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 65301 GRADUATE STUDIO: TEXTILES II 1-9 Credit Hours

(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Textiles concentration.

Prerequisite: ARTS 65300; and textiles concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 65400 GRADUATE STUDIO: CERAMICS I 1-9 Credit Hours

(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Ceramics concentration.

Prerequisite: Ceramics concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 65401 GRADUATE STUDIO: CERAMICS II 1-9 Credit Hours

(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Ceramics concentration.

Prerequisite: ARTS 65400; and Ceramics concentration in the Studio Art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 65600 GRADUATE STUDIO: GLASS I 1-9 Credit Hours

(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Glass concentration.

Prerequisite: Glass concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 65601 GRADUATE STUDIO: GLASS II 1-9 Credit Hours

(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Glass concentration.

Prerequisite: ARTS 65600; and glass concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 65700 GRADUATE STUDIO: JEWELRY, METALS, ENAMELING I 1-9 Credit Hours

(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Jewelry, Metals, Enameling concentration.

Prerequisite: Jewelry, metals and enameling concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 65701 GRADUATE STUDIO: JEWELRY, METALS, ENAMELING II 1-9 Credit Hours

(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Jewelry, Metals, Enameling concentration.

Prerequisite: ARTS 65700; and jewelry, metals and enameling concentration in the studio art major; and graduate standing.

Schedule Type: Studio

Contact Hours: 2-18 other

Grade Mode: Standard Letter-IP

ARTS 65991 SEMINAR IN STUDIO ART 1-3 Credit Hours

(Repeatable for credit) Contemporary issues and professional concerns in studio art explored through presentations, lectures, and discussion.

Graduate faculty and guest speakers.

Prerequisite: Graduate standing.

Schedule Type: Seminar

Contact Hours: 1-3 other

School of Fashion Design and Merchandising

Fashion Design and Merchandising (FDM)

FDM 10010 FASHION FUNDAMENTALS 3 Credit Hours

Introduction to the global fashion industry. Analysis of the business of fashion and how it is conceived, marketed, sold, and consumed. Overview of important resources, companies, career options and personnel who impact the industry.

Prerequisite: Fashion design, fashion merchandising or pre-fashion design and merchandising major.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 10023 FASHION VISUALS 1 Credit Hour

The study of fashion information, research sources, color theory, two-and three-dimensional design and visual presentation formats as they apply to the fashion industry.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10024.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

FDM 10024 FASHION VISUALS LABORATORY 2 Credit Hours

Laboratory applications in the study of fashion information, research sources, color theory, two-and three-dimensional design and visual presentation formats as they apply to the fashion industry.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10023.

Schedule Type: Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

FDM 10033 FASHION FABRICS 1 Credit Hour

Study of fabrics, from fiber through finishing processes, with a concentration on differentiating between fibers, fabric construction methods, and other processes involved in production. Emphasis is on understanding fabric properties, including environmental impact, cost, care and how they relate to textile end-usage.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10034.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

FDM 10034 FASHION FABRICS LABORATORY 2 Credit Hours

Study of fabrics, from fiber through finishing processes, with a concentration on differentiating between fibers, fabric construction methods, and other processes involved in production. Emphasis is on understanding fabric properties, including environmental impact, cost, care, and how they relate to textile end-usage. Lab-specific content and assignments reinforce Lecture content.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10033.

Schedule Type: Laboratory, Lecture, Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

FDM 10043 SUSTAINABLE FASHION THINKING 1 Credit Hour

An introductory exploration of the current fashion industry and the urgent need to create sustainable change. After a survey of fashion industry functions from concept to consumer, students identify current practices and areas of concern. Course focuses on understanding how and why those practices must change and examining burgeoning ideas, methods, practices and business structures shifting to a sustainable future.

Prerequisite: Fashion Design or Fashion Merchandising majors.

Corequisite: FDM 10044.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

FDM 10044 SUSTAINABLE FASHION THINKING LABORATORY 2 Credit Hours

An introductory exploration of the current fashion industry and the urgent need to create sustainable change. After a survey of fashion industry functions from concept to consumer, students identify current practices and areas of concern. Lab focuses on practicing strategies, including critical thinking, human centered design, sustainable product service systems and corporate social responsibility to influence needed change within industry. Fashion design and fashion merchandising students work collaboratively in groups to explore solutions for a sustainable future in the fashion industry.

Prerequisite: Fashion Design or Fashion Merchandising majors.

Corequisite: FDM 10043.

Schedule Type: Laboratory, Lecture, Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

FDM 10053 INTRODUCTION TO FASHION TECHNOLOGY 1 Credit Hour

Introduces students to the fundamental concepts, procedures, and techniques used in digital imaging software and information database software. A survey of current and emerging technologies used in fashion design, merchandising and production contexts is presented.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10054.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

FDM 10054 INTRODUCTION TO FASHION TECHNOLOGY LABORATORY 2 Credit Hours

Laboratory applications of fundamental concepts, procedures, and techniques used in digital imaging software and information database software. A survey of current and emerging technologies used in fashion design, merchandising, and production contexts is presented and applied.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10053.

Schedule Type: Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

FDM 10140 FOUNDATIONS OF FASHION DRAWING 3 Credit Hours

Introduction to fashion drawing. Concentration on communicating through drawing the fashion figures and technical flats, accurate garment proportion and construction.

Prerequisite: Fashion design major.

Schedule Type: Combined Lecture and Lab

Contact Hours: 5 other

Grade Mode: Standard Letter

FDM 15055 BASICS OF APPAREL CONSTRUCTION 3 Credit Hours

Introduction to sewing techniques and application processes using industrial sewing machines and other related equipment in basic garment construction. Development of fundamental patternmaking skills.

Prerequisite: Fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20013 HISTORY OF COSTUME 3 Credit Hours

Chronological study and research of historic costume from the origin of clothing through the French revolutionary era, 19th and 20th century designers, and the influence on contemporary fashion.

Prerequisite: HIST 11050 or HIST 11051 or ARTH 22006 or ARTH 22007.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 20030 FASHION APPAREL ANALYSIS 3 Credit Hours

Analysis and evaluation of fashion apparel; quality standards of ready-to-wear apparel and factors that influence the aesthetic and functional performance of the end product.

Prerequisite: FDM 10033 and FDM 10034; and fashion merchandising major.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 20050 FASHION TECHNOLOGY APPLICATIONS 3 Credit Hours

A continuation of content related to technology within the fashion industry. Pattern manipulation, basic technical packages, garment measuring specs, print design and computerized fashion illustration is addressed with the use of industry-specific and off-the-shelf software packages.

Prerequisite: FDM 10053 and FDM 10054; and fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20121 FASHION DRAWING 3 Credit Hours

Study of communicating design ideas, rendered fabrics, consumer types, technical flats, and the depiction of garment construction through the use of digital toolsets and illustration technology. Emphasis will be placed on the depiction of a variety of body types, demographics (gender identity, differently-abled, race/ethnicity, age, culture), fabric types (weight, end use, pattern/print, color, etc.) on the figure.

Prerequisite: FDM 10023 and FDM 10024; and fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20123 FASHION DESIGN CONCEPTS 3 Credit Hours

An introduction to the process and methodology of creating fashion products with considerations of sustainable practice and diverse consumer markets. Students will apply fashion communication skills and combine with visual thinking practices. Emphasis will be on design thinking, sustainable methodology, creative experimentation, and a variety of body types and markets.

Prerequisite: FDM 10043 and FDM 10044 and FDM 20121.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20153 FLAT PATTERN 3 Credit Hours

Development of basic muslins and slopers. Patternmaking principles of dart manipulation and added fullness. Construction techniques for bodice, skirt, sleeve, collar, and pant variations.

Prerequisite: FDM 10033 and FDM 10034; and FDM 15055; and fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20154 DRAPING 3 Credit Hours

Development of basic garment shapes using draping techniques. Emphasis placed on torso development, contouring principles and design development on the form. Construction techniques for boned bodice garments and using knit and bias cut fabrics.

Prerequisite: FDM 10033 and FDM 10034; and FDM 15055; and fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20155 MACHINE KNITTING 3 Credit Hours

Basic machine knitting techniques, including structure and shaping on industrial handflat knitting machine. Development and analysis of knitted textiles.

Prerequisite: None.

Schedule Type: Studio

This course examines research subject areas and methods as they pertain to various stakeholders in the fashion value chain. Focus is on understanding research practices relevant to the fashion industry, accessing and critically evaluating existing research, engaging in active research and applying research through practice to expand knowledge in the field.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60010 THEORIES AS APPLIED TO THE FASHION INDUSTRY 3 Credit Hours

Focuses on the meaning, context and intent of fashion in contemporary society. Examination of seminal theories and constructs that inform understanding and ability to address complex issues derived from the fashion industry setting.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60011 THE FASHION INDUSTRY: A UNIFYING LENS 3 Credit Hours

This course is designed to make connections, synthesize, and develop understanding of the fashion industry. Students will participate in informed critical discussion, written, and visual work, guided by interaction with multiple stakeholders and concluded with a final paper and presentation that identifies an area where research through practice can expand knowledge in the field.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60015 FASHION SYSTEMS THINKING 3 Credit Hours

The adverse effects of the global fashion industry have become an established narrative in fashion academic and industry circles. This course examines economic, social and environmental impacts of the fashion value chain from a systemic perspective. Focus is on the five key components used in systems thinking approach, namely: interconnectedness, synthesis, emergence, feedback loops, causality and systems mapping to practice problem solving that views fashion industry-related problems as part of a wider, dynamic system.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60020 FASHION INDUSTRY DESIGN MANAGEMENT 3 Credit Hours

In-depth study of the relationship between creativity and efficiency in the fashion industry. Provides insight into how project managers can nurture innovation in an organizational context.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60025 GLOBAL CONSUMER IN THE FASHION INDUSTRY 3 Credit Hours

This course examines global market segments, how to reach them, the consumer buying process across countries and psychological and sociological variables which influence and motivate consumers. This course broadens the understanding and evaluation of consumer behavior concepts as they pertain to domestic and global marketing strategies. Focus is also on targeting needs of diverse consumers and marketing efforts directed at creating an inclusive environment for all consumers.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60031 FORMS OF INQUIRY IN THE FASHION INDUSTRY 3 Credit Hours

Critical evaluation of research, theoretical and scholarly review of articles related to the fashion industry. Learn and practice skills needed to understand and critically evaluate research, theory and scholarly works. Examine in-depth scholarly literature as applied to one topic within the fashion industry. Write and present a scholarly review of literature.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60050 TECHSTYLELAB: DIGITAL DESIGN AND NEW MEDIA IN THE FASHION INDUSTRY 3 Credit Hours

Exploration of the intersection of New Media and Fashion. Includes research into analog design methods and digital systems of production and the supply chain management. Topics include various research and design topics such as mass-customization, co-creation, material ecology, digital craft and future craft practices.

Prerequisite: Graduate standing.

Schedule Type: Laboratory, Lecture, Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

FDM 60092 FASHION INDUSTRY PRACTICUM 3 Credit Hours

(Repeatable for credit) Practicum is an off-campus progressive process involving a number of specific guided experiences with a fashion agency or company. This course is intended to bridge the gap between the theoretical and abstract learning gained in the classroom with real-world concrete applications. Students are required to present a pre-practicum analytical research presentation, as well as an analysis of experiences at the culmination.

Prerequisite: Graduate standing; and special approval.

Pre/corequisite: FDM 60005 and FDM 60015.

Schedule Type: Practical Experience

Contact Hours: 9 other

Grade Mode: Satisfactory/Unsatisfactory

FDM 60093 WORKSHOPS ON CURRENT TOPICS IN THE FASHION INDUSTRY 1-3 Credit Hours

(Course is repeatable) Students will be encouraged to take advantage of courses that focus on professional renewal or mastery and application of knowledge and skills that address a range of problems or issues related to fashion industry practice. The workshops will be offered at our NYC, Florence, and Kent campuses.

Prerequisite: Graduate standing.

Schedule Type: Workshop

Contact Hours: 1-3 other

Grade Mode: Satisfactory/Unsatisfactory

FDM 60098 RESEARCH PROJECT IN FASHION INDUSTRY 3 Credit Hours

(Repeatable for credit) Research experience with an individual faculty member designed to strengthen student's ability to synthesize different phases and methods of research. Students work closely with faculty to determine the specific nature, scope and design of the research experience. Requires submission of and approval of project proposal prior to registration.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Research

Contact Hours: 3 other

Grade Mode: Standard Letter

FDM 60099 FASHION INDUSTRY PRACTICUM CAPSTONE 3 Credit Hours

This course combines research with pragmatic industry-facing solutions reliant on first-hand information gathering, analysis and assessment. As a capstone experience, M.F.I.S. students base their experience from the practicum with a fashion-related industry partner by creating an in-depth case study, abbreviated business plan or industry presentation resulting from the information and research gathered and reflecting student interest.

Prerequisite: FDM 60092; and graduate standing; and special approval.

Pre/corequisite: FDM 60005 and FDM 60015 and FDM 60025.

Schedule Type: Project or Capstone

Contact Hours: 3 other

Grade Mode: Standard Letter

FDM 60100 ADVANCED FASHION INDUSTRY PRACTICE 3 Credit Hours

This capstone course is centered in research as both a practice and a process. Students will pursue case studies in which they research, interpret and aim to advance fashion industry practices. Informed by industry observation and experience, utilizing and engaging with a variety of research methods, students will document findings, analyze, reflect, and present their own pragmatic implications drawn from and applied to the fashion industry. The aim of the course is to challenge students to advance their research and analytical skills, to cross disciplinary boundaries, and to develop new and original perspectives of industry research through practice.

Prerequisite: FDM 60031; and enrolled in the master of fashion industry studies (MFIS) degree; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60162 ADVANCED FASHION INDUSTRY DESIGN AND PRODUCTION 3 Credit Hours

This process-oriented course focuses on studio investigation of complex formal and spatial constructs in apparel design and production. The course will discuss and examine a variety of current approaches including those that are interdisciplinary and utilize design thinking in a fashion industry context. Students will use methods and tools for fashion research to explore new techniques in the development of design concepts that challenge current practice. Students are encouraged to think critically about design problems and processes while seeking discoveries through experimentation, resulting in a body of work examined by critique and exhibition. Examinable material includes written and visual documentation, which is then retained as the archival record of the research.

Prerequisite: Graduate standing; and special approval from the graduate studies coordinator.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60199 THESIS I 2-6 Credit Hours

(Repeatable for credit) Thesis students must register for a maximum of 6 credits, 2 to 6 credits in a single semester, distributed over several semesters if desired.

Prerequisite: Graduate standing; and special approval from graduate supervisory committee.

Schedule Type: Masters Thesis

Contact Hours: 2-6 other

Grade Mode: Satisfactory/Unsatisfactory-IP

FDM 60299 THESIS II 2 Credit Hours

(Course is repeatable) Continuing registration required of master's students who have completed the initial 6 hours of thesis and continuing until all degree requirements are met.

Prerequisite: FDM 60199; and graduate standing; and special approval from the graduate supervisory committee.

Schedule Type: Masters Thesis

Contact Hours: 2 other

Grade Mode: Satisfactory/Unsatisfactory-IP

FDM 63011 VISUAL PRESENTATION IN THE FASHION INDUSTRY 3 Credit Hours

This course explores the multiple methods of visual presentation practiced in the fashion industry through applications of digital and physical concepts. Students will examine and discuss current fashion industry approaches utilized by creative talent, merchants, and other stakeholders. Focus will be on developing visual communicators who can convey unique brand stories and complex ideas through use of various forms of media. Students will learn to establish branding and visualization of their own work and research to help promote their professional identity.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65010 SUSTAINABLE CONCEPTS AND PRACTICES IN THE FASHION INDUSTRY 3 Credit Hours

This course will discuss and examine the most current approaches to sustainability in fashion. The different facets, benefits or shortcomings of each approach will be analyzed with an eye to researching viable solutions to future practices in manufacturing, material selection, design and business. Course embeds practice-based approaches to sustainable development.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65045 FASHION INDUSTRY MERCHANDISE MANAGEMENT 3 Credit Hours

This course will discuss the overview of the merchandising process - planning, developing, and presenting merchandise lines in the fashion industry. Core merchandising concepts and principles taught in this class include merchandise performance measures, pricing mechanics, wholesale and retail pricing strategy, merchandise budgets and assortment, vendor relationships and negotiations, and merchandise replenishment management. This course will examine such concepts as applied to both manufacturers, wholesalers, and retailers of fashion merchandise.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65055 ENTREPRENEURIAL LEADERSHIP AND SUSTAINABILITY IN THE FASHION INDUSTRY 3 Credit Hours

This course will discuss the importance of the entrepreneurial leadership and innovation as competitive advantage in the fashion industry. Students will examine the conscious leadership concepts and principles from both small/medium enterprises and large corporations of the fashion industry. By applying conscious capitalism approach, the course will introduce more progressive and purposeful ways to advance sustainable practices to benefit all five stakeholders in the fashion industry - society, partners, investors, customers, and employees.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65065 SUPPLY CHAIN MANAGEMENT IN THE FASHION INDUSTRY 3 Credit Hours

This course examines supply chain within the fashion industry and basic theories and principles that guide decision-making in the supply chain. Students will learn how supply chain management can be used to gain a competitive advantage in the fashion industry, comprehend buyer-supplier relationships, supply chain transparency, product recalls, sourcing issues, and other challenges in the global fashion supply chain. Attention will be given to understanding sustainable practices and future developments within the global fashion supply chain.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65095 FASHION INDUSTRY SPECIAL TOPICS 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) Variable content relevant to the field of fashion.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

FDM 65096 INDIVIDUAL INVESTIGATION IN THE FASHION INDUSTRY 1-3 Credit Hours

(Repeatable for credit) Individual investigation of topic above the level available through coursework. Requires submission of and approval of project proposal prior to registration.

Prerequisite: Graduate standing.

Schedule Type: Individual Investigation

Contact Hours: 3-9 other

Grade Mode: Standard Letter

FDM 65100 SUSTAINABLE SUPPLY CHAIN AND LIFE CYCLE ASSESSMENT IN THE FASHION INDUSTRY 3 Credit Hours

This course examines the traditional and sustainable supply chain within the fashion industry. There is a focus on basic theories and principles that guide decision making, including current challenges in converting from traditional practices to environmentally and socially protective supply chains. Students learn how sustainably focused supply chain management can be used to gain a competitive advantage in the fashion industry through supply chain transparency and LCA metric development.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65110 CIRCULAR ECONOMY STRATEGIES IN THE FASHION INDUSTRY 3 Credit Hours

In discussions of sustainability, a circular economy is considered the ultimate goal post by which we must measure success. To fully realize a sustainable future, we must design out waste and pollution and fundamentally rethink the fashion system which currently relies on a take/make/waste construct. This class examines what a circular economy might look like in the fashion industry, what things need to happen to get there and what initial steps look like in that direction.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65120 FIBER AND TEXTILE INNOVATION 3 Credit Hours

This course introduces current and emerging fiber and textile innovations of relevance to the fashion industry and provides students with an opportunity to explore the expanding potential of textiles as an adaptive and responsive interface between humans and their environment. Examples of applications are reviewed from four perspectives: (1) fiber and textile innovation with a focus on material production and selection implications; (2) manufacturing and processing basics; (3) implications for the life cycle and sustainability of the resulting textile and apparel products; and (4) human body-functional textile interactions and potential health implications.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65220 INNOVATIONS IN THE FASHION RETAIL INDUSTRY 3 Credit Hours

This course encompasses how various innovations create the optimal customer experience to gain competitive advantages in the 21st century retail environment. Using the perspective of omnichannel retailing, which is a fully integrated approach to commerce providing shoppers a unified experience across all channels or touchpoints, students explore the various innovations relevant to the fashion retail industry. Through case study analysis and final project reports, students present pragmatic solutions to retailers of their choice.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Seminar

Contact Hours: 3 other

Grade Mode: Standard Letter

FDM 65300 DIGITAL KNIT DESIGN 3 Credit Hours

This course focuses on digital knitting as utilized by a designer. The students use available software for 3D development of products and stitch design. The course focuses on stitch understanding and development, as well as communication of designs both stitch and shape using 3D virtualization software and stitch development software. This course is geared toward designers with industry studio practice and is at an advanced level.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Laboratory

Contact Hours: 6 lab

Grade Mode: Standard Letter

FDM 65310 DIGITAL KNIT PROGRAMMING I 3 Credit Hours

This course focuses on digital knitting and programming of industrial knitting machines. This is one of four digital knit courses that enables students to learn proprietary software, programming and technical knit skills. The course goes through the foundational understanding of stitches and how to program them on industrial knitting machines. The course also focuses on hands-on learning on the industrial machine, including set up of the machine and machine maintenance. This course is geared toward designers with fashion industry studio practice and is at an advanced level.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Laboratory

Contact Hours: 6 lab

Grade Mode: Standard Letter

FDM 65320 DIGITAL KNIT PROGRAMMING II 3 Credit Hours

This course focuses on digital knitting and advanced programming of industrial knitting machines. This is the second of two programming courses and one of the four digital knit courses enabling students to continue to learn complex proprietary software, programming and technical knit skills. The course goes through the understanding of more complex stitch structures, as well as how to program on the machine. The course includes techniques for shaping structures to create three dimensionally knitted textile products. This course is geared toward designers with industry studio practice and is at an advanced level.

Prerequisite: FDM 65310; and graduate standing; and special approval.

Schedule Type: Laboratory

Contact Hours: 6 lab

Grade Mode: Standard Letter

FDM 65330 DIGITAL KNIT APPLICATIONS 3 Credit Hours

This course focuses on the application of skills in digital knitting to develop an advanced final product line. This is one of the four digital knit courses that enables students to learn proprietary software, programming and technical knit skills. Depending on the student's focus of either technical or design, the product line can be developed in 3D virtual presentation or actual prototypes. Regardless of focus, it is expected that the student has some representation of both virtual and actual in the final presentation of the product. Along with the product line, presentation is a use case. This course is geared toward designers with industry studio practice and is at an advanced level.

Prerequisite: FDM 65300 or FDM 65310; and graduate standing; and special approval.

ARTH 42028 CONTEMPORARY AFRICAN ART: 1980-PRESENT (DIVG) 3 Credit Hours

(Slashed with ARTH 52028) An in-depth study of African art since the late twentieth century. Focused on artists from the continent and the Diaspora, the course begins by examining the impact that colonialism, with its appropriation, exploitation and reshaping of Africa, had on the arts in Africa (1960-1980). It then analyzes a broad spectrum of modern and contemporary African art forms (painting, printmaking, sculpture, textiles, photography, performance and film) and related art history, exhibition and critical texts from the 1980s to the present, with an emphasis on such issues as patronage, the commodification of art, urbanism, national consciousness, identity formation, new media and the effects of globalization.

Prerequisite: Junior standing.

Grade Mode: Standard Letter

ARTH 42050 ART AND REVOLT IN THE NINETEENTH CENTURY 3 Credit Hours

(Slashed with ARTH 52050) The nineteenth century is one of the most dramatic time periods in Euro-American art history. Artists and viewers experienced a number of revolutions that profoundly changed the landscape of art and politics. More specifically, nineteenth-century art was created during a violent sweep of colonial expansion, a rise in industrialization, and a revolt against the French Salon. This course considers how artists responded to these social changes by exploring art movements in France and beyond across a wide range of artistic media—including spirit photographs, Moulin Rouge posters, and cemetery sculpture. Students will examine the most canonical nineteenth-century artists while also challenging their placement in the art history canon, which was established at the expense of women and people of color.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ARTH 42056 AMERICAN ART I: INDIAN WARS TO CIVIL WAR 3 Credit Hours

(Slashed with ARTH 52056) In this first section of American art history, students will explore the evolution of American art from European conquest through the American Revolution, and stretching to the Civil War. This time period in American history is characterized by waves of social unrest followed by periods of peace that American artists reflected and shaped in their work. The American-Indian Wars and the Trans-Atlantic slave trade also profoundly impacted the art and politics of the early United States, inspiring artists to support or protest conflicts in society with their art. Exchanges with African, Indigenous, as well as Asian and European peoples pervaded every aspect of art in the United States. In looking widely at objects such as paintings, clothing, food advertisements, and furniture, this class will examine debates about nationhood in early American art that exploded by the Civil War.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ARTH 42057 AMERICAN ART II: CIVIL WAR TO CIVIL RIGHTS 3 Credit Hours

(Slashed with ARTH 52057) In this second section and in-depth study of American art history, students will explore shifts and advancements in American art since the closing of the Civil War. New styles in abstraction and technological innovations in photography, lithography, and cinema dramatically altered the trajectory of American art and resulted in an expansion of art museums and patronage. As the United States gained economic power and expanded its borders, American art was also profoundly influenced by movements such as French Impressionism and Mexican muralism, and shaped by artists as close as Canada and as far as Australia. While American artists were debating whether to welcome "foreign" influences in their work, debates over racial segregation and women's suffrage permeated art and politics on the homefront. In looking widely at objects such as paintings, photographs, silverware, and public monuments, this class will examine the art and visual culture of the United States from the Civil War to Civil Rights movement.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

ARTH 42059 AFRICAN AMERICAN ART AND VISUAL CULTURE (DIVD) 3 Credit Hours

(Slashed with ARTH 52059) This course contextualizes American artists of African descent within the wider framework of U.S. art and visual culture. In looking at a wide range of media—across painting, photography, fashion and food—students study African American visual culture and its profound impact on American art at large. Students also explore the contested concept of "race" as it intersects with the production and patronage of African American art. Furthermore, students consider the benefits and pitfalls of the field and the ways in which art historians, critics and curators have treated African American art in U.S. museums. By the end of this course, students will have a deeper understanding of African American art and its tangled identity politics.

ARTH 42060 RUSSIAN ART 3 Credit Hours

(Slashed with ARTH 52060) This course explores the history of Russian art starting with the legacy of Byzantium and continuing up through the end of the Soviet era, from about 1000 CE to the present. Russia's artistic movements have borrowed from a wide variety of cultures, both from groups that have attacked and conquered Russian territories as well as from groups that Russians themselves have conquered and attacked. We will focus on art that was produced in Russia as well as the cross-cultural influences that shaped and changed this art. Painting will be a dominant focus, coupled with a broad study including decorative arts like porcelain and embroidery as well as architecture, performance and illustration.

Prerequisite: Junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ARTH 42061 EARLY 20TH-CENTURY ART 3 Credit Hours

(Slashed with ARTH 52061) This course explores the history of Early 20th-Century Modern Art up to the Second World War. Painting, sculpture, and architecture will be the dominant focus, coupled with alternative media that may include printmaking, photography, cinema, performance, and textile arts.

Prerequisite: ARTH 22007.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

ARTH 42064 DADA AND SURREALISM 3 Credit Hours

Using a roughly chronological approach, students examine the profound and lasting contributions made by the Dadaists and Surrealists, as well as other revolutionary modernists of the early 20th century who sought to escape the traditional and rational in art and thought with sincerity in spite of the often superficially simple or even sometimes nihilistic appearance of their efforts. Through an analysis of selected works from this period and their relevant precursors, an attempt will be made to define the progressive ideas which led to the dismantling of previous standards and the rise of an anti-art spirit which continues today in various guises. Primary documents are considered regularly to provide students with a wider appreciation for the variety of media (e.g., film, theater, typography) and the issues and characters involved.

Prerequisite: Junior or senior standing.

ARTH 42065 FEMINIST AND QUEER ART AND CULTURAL THEORY (DIVD) 3 Credit Hours

(Slashed with ARTH 52065) This advanced and interdisciplinary art history course explores feminist and queer visual histories, with particular attention to related cultural theories. In addition to paradigmatic ideologies of difference and language, this course is based on indispensable and sometimes peripheral postmodern milieus such as politicized identities, economies and the body, the importance of feeling and the everyday, feminist-Marxist critiques of community and the state and notions of lived histories/narratives. In regard to structure, this is a reading intensive course designed to empower students with 'influential' visual and textual languages, as well as knowledge of critical race, gender and sexuality studies. Readings, discussions, projects and knowledges-at-large are applicable in the artist's studio and more broadly, in humanities scholarship.

Prerequisite: Junior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

Attributes: Diversity Domestic

ARTH 42069 NATIONS AND BORDERS 3 Credit Hours

(Slashed with ARTH 52069) Emphasizing art and visual culture since World War II, this course considers the phenomenon of the nation-state in the context of embodied borders and diasporas. From the historically charged U.S.-Mexico borderlands to the Berlin Wall that divided East and West Germany, modernity is characterized by the development of nations and subsequent nationalisms as well as the delineation of borders and boundaries—and, once unpacked, theoretical and physical embodiments become legible. Taking a historically-grounded and global approach to state production and displacement, critical texts—many of which are grounded in feminist and queer theories—will address various interpretations of boundaries, especially national and corporeal. We will explore the intellectual history of nation-building and subsequent textual analyses of geographic and embodied borders. We will also study specific art historical moments, such as the militarization of the U.S.-Mexico frontera, Israel's occupation of Palestine, treating East and West Berlin as metaphor and allegory, the borderlands of queer and black identities in the United States and present-day Euro-American imperialism. The course format consists of rigorous class discussions guided by readings and illustrated presentations.

Prerequisite: Junior or senior standing.

ARTH 42073 EPHEMERAL EXHIBITIONS: WORLD FAIRS, FESTIVALS AND BIENNIALS 3 Credit Hours

(Slashed with ARTH 52073) Revisiting a variety of time-based exhibition formats throughout recent history. From Joseph Paxton's Crystal Palace to the Venice Biennale, students examine a globally-oriented history of landmark exhibitions that were designed to dazzle audiences for a few months before being dismantled. Sponsored by governments, the corporate sector, grassroots movements, or cultural actors, the motivations for these exhibitions are as varied as the actual format the exhibition takes. We discuss not only the framework and ideologies behind such projects, but also the legacies they have had on more permanent arts institutions, as well as criticisms levied against them by artists.

Prerequisite: Junior or senior standing.

ARTH 42076 HISTORIES AND THEORIES OF PHOTOGRAPHY AND VISUAL CULTURE 3 Credit Hours

(Slashed with ARTH 52076) Photography is embedded in every aspect of visual culture. As such, this course is a socio-political and socio-cultural study of photography. This course focuses on major developments in the field, including photography's advent, 19th-century commodity, scientific manipulations, 20th century Modernism and postwar aesthetics. Course also sketches political, cultural and theoretical developments and pertinent debates regarding emergence, significance, interpretation, perception and resonance. In addition to manifold moments in histories and theories of photography, course examines critical approaches to the history of art, including ecocriticism, feminism, critical race studies, queer studies and borderlands studies. While effort will be made to survey photography's history, this is not taxonomy of related movements and moments.

Prerequisite: ARTH 32066.

Schedule Type: Lecture

ARTH 42079 CONTEMPORARY CRAFT: HISTORY AND THEORY 3 Credit Hours

(Slashed with ARTH 52079) This course is designed to provide an overview of the history, theory, and practice of modern and contemporary studio craft, with an emphasis on North America. Students will develop an enhanced ability to identify and describe various media and styles of artistic production normally associated with "craft" genres: ceramics, textiles/fibers, jewelry/metals, glass and wood/furniture. Concurrently, an introduction to basic philosophies, pedagogical styles, and controversial issues that have shaped this unique cultural, social and artistic history will provide a framework for understanding the intersection of art, craft and design in the 21st-century.

ARTH 52050 ART AND REVOLT IN THE NINETEENTH CENTURY 3 Credit Hours

(Slashed with ARTH 42050) The nineteenth century is one of the most dramatic time periods in Euro-American art history. Artists and viewers experienced a number of revolutions that profoundly changed the landscape of art and politics. More specifically, nineteenth-century art was created during a violent sweep and architecture within the broader context of colonial expansion, a rise in industrialization and a revolt against the French Salon. Western culture and ideas. This course considers how artists responded to these social changes by exploring art movements in France and beyond across a wide range of artistic media—including spirit photographs, Moulin Rouge posters and cemetery sculpture. Students will examine the most canonical nineteenth-century artists while also challenging their placement in the art history canon, which was established at the expense of women and people of color.

ARTH 52056 AMERICAN ART I: INDIAN WARS TO CIVIL WAR 3 Credit Hours

(Slashed with ARTH 42056) In this first section of American art history, students will explore the evolution of American art from European conquest through the American Revolution, and stretching to the Civil War. This time period in American history is characterized by waves of social unrest followed by periods of peace that American artists reflected and shaped in their work. The American-Indian Wars and the Trans-Atlantic slave trade also profoundly impacted the art and politics of the early United States, inspiring artists to support or protest conflicts in society with their art. Exchanges with African, Indigenous, as well as Asian and European peoples pervaded every aspect of art in the United States. In looking widely at objects such as paintings, clothing, food advertisements, and furniture, this class will examine debates about nationhood in early American art that exploded by the Civil War.

ARTH 52057 AMERICAN ART II: CIVIL WAR TO CIVIL RIGHTS 3 Credit Hours

(Slashed with ARTH 42057) In this second section and in-depth study of American art history, students will explore shifts and advancements in American art since the closing of the Civil War. New styles in abstraction and technological innovations in photography, lithography and cinema dramatically altered the trajectory of American art and resulted in an expansion of art museums and patronage. As the United States gained economic power and expanded its borders, American art was also profoundly influenced by movements such as French Impressionism and Mexican muralism and shaped by artists as close as Canada and as far as Australia. While American artists were debating whether to welcome "foreign" influences in their work, debates over racial segregation and women's suffrage permeated art and politics on the homefront. In looking widely at objects such as paintings, photographs, silverware and public monuments, this class will examine the art and visual culture of the United States from the Civil War to Civil Rights movement.

ARTH 52059 AFRICAN AMERICAN ART AND VISUAL CULTURE 3**Credit Hours**

(Slashed with ARTH 42059) This course contextualizes American artists of African descent within the wider framework of U.S. art and visual culture. In looking at a wide range of media—across painting, photography, fashion and food—students study African American visual culture and its profound impact on American art at large. Students also explore the contested concept of “race” as it intersects with the production and patronage of African American art. Furthermore, students consider the benefits and pitfalls of the field and the ways in which art historians, critics and curators have treated African American art in U.S. museums. By the end of this course, students will have a deeper understanding of African American art and its tangled identity politics.

ARTH 52060 RUSSIAN ART 3 Credit Hours

(Slashed with ARTH 42060) This course explores the history of Russian art starting with the legacy of Byzantium and continuing up through the end of the Soviet era, from about 1000 CE to the present. Russia’s artistic movements have borrowed from a wide variety of cultures, both from groups that have attacked and conquered Russian territories as well as from groups that Russians themselves have conquered and attacked. We will focus on art that was produced in Russia as well as the cross-cultural influences that shaped and changed this art. Painting will be a dominant focus, coupled with a broad study including decorative arts like porcelain and embroidery as well as architecture, performance and illustration.

ARTH 52064 DADA AND SURREALISM 3 Credit Hours

(Slashed with ARTH 42064) Using a roughly chronological approach, students examine the profound and lasting contributions made by the Dadaists and Surrealists, as well as other revolutionary modernists of the early 20th century who sought to escape the traditional and rational in art and thought with sincerity in spite of the often superficially simple or even sometimes nihilistic appearance of their efforts. Through an analysis of selected works from this period and their relevant precursors, an attempt will be made to define the progressive ideas which led to the dismantling of previous standards and the rise of an anti-art spirit which continues today in various guises. Primary documents are considered regularly to provide students with a wider appreciation for the variety of media (e.g., film, theater, typography) and the issues and characters involved.

ARTH 52065 FEMINIST AND QUEER ART AND CULTURAL THEORY 3**Credit Hours**

(Slashed with ARTH 42065) This advanced and interdisciplinary art history course explores feminist and queer visual histories, with particular attention to related cultural theories. In addition to paradigmatic ideologies of difference and language, this course is based on indispensable and sometimes peripheral postmodern milieux such as politicized identities, economies and the body, the importance of feeling and the everyday, feminist-Marxist critiques of community and the state and notions of lived histories/narratives. In regard to structure, this is a reading intensive course designed to empower students with ‘influential’ visual and textual languages, as well as knowledge of critical race, gender and sexuality studies. Readings, discussions, projects and knowledges-at-large are applicable in the artist’s studio and more broadly, in humanities scholarship.

Prerequisite: Graduate standing.

ARTH 52069 NATIONS AND BORDERS 3 Credit Hours

(Slashed with ARTH 42069) Emphasizing art and visual culture since World War II, this course considers the phenomenon of the nation-state in the context of embodied borders and diasporas. From the historically charged U.S.-Mexico borderlands to the Berlin Wall that divided East and West Germany, modernity is characterized by the development of nations and subsequent nationalisms as well as the delineation of borders and boundaries—and, once unpacked, theoretical and physical embodiments become legible. Taking a historically-grounded and global approach to state production and displacement, critical texts—many of which are grounded in feminist and queer theories—will address various interpretations of boundaries, especially national and corporeal. We will explore the intellectual history of nation-building and subsequent textual analyses of geographic and embodied borders. We will also study specific art historical moments, such as the militarization of the U.S.-Mexico frontera, Israel’s occupation of Palestine, treating East and West Berlin as metaphor and allegory, the borderlands of queer and black identities in the United States and present-day Euro-American imperialism. The course format consists of rigorous class discussions guided by readings and illustrated presentations.

ARTH 52073 EPHEMERAL EXHIBITIONS: WORLD FAIRS, FESTIVALS AND BIENNIALS 3 Credit Hours

(Slashed with ARTH 42073) Revisiting a variety of time-based exhibition formats throughout recent history. From Joseph Paxton’s Crystal Palace to the Venice Biennale, students examine a globally-oriented history of landmark exhibitions that were designed to dazzle audiences for a few months before being dismantled. Sponsored by governments, the corporate sector, grassroots movements, or cultural actors, the motivations for these exhibitions are as varied as the actual format the exhibition takes. We discuss not only the framework and ideologies behind such projects, but also the legacies they have had on more permanent arts institutions, as well as criticisms levied against them by artists.

ARTH 52076 HISTORIES AND THEORIES OF PHOTOGRAPHY AND VISUAL CULTURE 3 Credit Hours

(Slashed with ARTH 42076) Photography is embedded in every aspect of visual culture. As such, this course is a socio-political and socio-cultural study of photography. This course focuses on major developments in the field, including photography's advent, 19th-century commodity, scientific manipulations, 20th century Modernism and postwar aesthetics. Course also sketches political, cultural and theoretical developments and pertinent debates regarding emergence, significance, interpretation, perception and resonance. In addition to manifold moments in histories and theories of photography, course examines critical approaches to the history of art, including ecocriticism, feminism, critical race studies, queer studies and borderlands studies. While effort will be made to survey photography's history, this is not taxonomy of related movements and moments.

ARTH 52079 CONTEMPORARY CRAFT: HISTORY AND THEORY 3 Credit Hours

(Slashed with ARTH 42079) This course is designed to provide an overview of the history, theory, and practice of modern and contemporary studio craft, with an emphasis on North America. Students will develop an enhanced ability to identify and describe various media and styles of artistic production normally associated with "craft" genres: ceramics, textiles/fibers, jewelry/metals, glass, and wood/furniture. Concurrently, an introduction to basic philosophies, pedagogical styles and controversial issues that have shaped this unique cultural, social and artistic history will provide a framework for understanding the intersection of art, craft and design in the 21st-century.

ARTH 52166 HISTORIES AND THEORIES OF MODERN AND CONTEMPORARY ART 3 Credit Hours

This course examines both the visual and textual. As such we travel through contemporary moments such as Abstract Expressionism, Post-Painterly Abstraction, Nouveau Réalisme, Pop, Minimalism, Conceptual art and participatory art—to name a few. So too, this course entails a broad overview of critical and theoretical approaches often engaged by contemporary artists such as existentialism, psychoanalysis, structuralism, semiotics, feminist and queer theories, theories of modern sculpture, and theories of photography. When art and theory are taken together, modern and contemporary art underscores the cultural, sociopolitical and economic developments characteristic of the last half of the twentieth century. While time constraints restrict a consideration of every artist, a selection of practitioners will be addressed. That said, this course affirms the importance of questions rather than finite answers, celebrates ambiguity and neglects any attempt at surveying and summarizing the field of modern and contemporary art.

ARTS 24051 INTRODUCTION TO SCULPTURAL PRACTICE 3 Credit Hours

Course provides a firm grounding in the rudiments of sculpture and sculpture's expanding field. Drawing on historical, aesthetic and technical strategies of generating and understanding sculpture; students are guided toward the realization of three-dimensional form. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work, engendering a better understanding of how sculpture is situated within the context of culture and society at large. Students explore the formal properties and expressive potential of materials, including mold making and casting, wood, metal and experimental media. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding.

Prerequisite: None.

ARTS 25310 FOUNDATIONS IN WEAVING 3 Credit Hours

Weaving – the systematic interlacement of two elements – is a direct way to construct a plane while simultaneously creating surface imagery. Integration of structure and surface provides the foundation for exploration with a focus on the development of constructed form to create compositional fields. Students are introduced to weaving on the four-shaft floor loom through the study of basic weave structures, fiber types, dye processes and yarn composition. The predictability of loom-controlled weaves is complicated with the exploration of hand dyed yarns and a variety of weaver-controlled techniques including tapestry, brocade and inlay. Study of the global, historic and contemporary position of weaving as an artistic discipline occurs through readings, presentations and class discussions. Overall, emphasis is placed on the development of a strong technical language to further expression with an awareness of from where materials and techniques come. In this intensive hands-on class, students produce both experimental compositions and finished works. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

Prerequisite: Accessories minor or School of Art major or School of Fashion major or Textiles minor.

ARTS 34050 LIFE MODELING 3 Credit Hours

(Repeatable for maximum of 6 credit hours) Traditional life modeling course in which students work almost exclusively from observation. The focus is on developing skills with clay, understanding the human form, understanding proportions, learning how to make armatures as well as developing a personal and expressive way of approaching the figure.

Prerequisite: ARTS 24051.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34051 SCULPTURAL OBJECT 3 Credit Hours

Course builds on ARTS 24051 with a greater emphasis on content, proficiency, technical expertise, craftsmanship and understanding of contemporary sculpture. Students explore the object in space, delineating issues of scale, materiality, representation, abstraction, metaphor and hybridity. Drawing on historical, aesthetic and technical strategies of generating and understanding sculpture, students are guided toward the realization of more sophisticated and complex ways of handling materials and incorporating meaning. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work, engendering a better understanding of how sculpture is situated within the context of culture and society at large. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding.

ARTS 34052 TIME ARTS 3 Credit Hours

This interdisciplinary course investigates the fundamentals of time-based media and its intersection with sculptural practice. Students build on concepts from ARTS 24051 to gain a broader understanding of multiple methods of making including performance, video, site and situation-specific works, as well as the use of traditional sculptural materials. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work engendering a better understanding of how sculpture is situated within the contemporary art world. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding.

Prerequisite: ARTS 24051.

ARTS 34053 SITE AND INSTALLATION 3 Credit Hours

This interdisciplinary course builds on concepts introduced in ARTS 24051, and expands on a variety of approaches in developing site-specific installations by considering the relationship between object/context, public/private, interior/exterior and urban/rural. Through the manipulation of materials, found objects and time-based media, students are introduced to concepts of space, intention, site and intervention through experimental approaches. Students further develop an understanding of material and context through in-depth readings, lectures and critical dialogue. Sculptural techniques, performance, photography and video art are covered and incorporated into the course. Studio time is supplemented by readings, lectures and site visits around campus.

Prerequisite: ARTS 24051.

Schedule Type: Studio

ARTS 34061 INTERMEDIATE PAINTING 3 Credit Hours

Continuation of painting from observation with an introduction to oil paints and mediums. Students will look outside of the still life at various subjects including spatial dynamics, the figure, and abstracted imagery. Introduction to oil painting tools, processes, and best studio practices.

Prerequisite: ARTS 24061.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34062 PAINTING STRATEGIES: PROCESS AND CONTENT 3 Credit Hours

This course focuses on conceptual prompts relative to contemporary issues to encourage a variety of processes and material approaches to making paintings. Students continue the idea of building a painting through the iterative process of making, analyzing, and editing their work throughout the semester. The painting is a live surface, a place to collect and record information, and this course insists that students consider a wide range of formal and conceptual choices to best address content. Each project will be initiated with rigorous research and further supported by exposure to visual examples of historic and contemporary painting, readings, written responses, seminar-style discussions, and numerous critiques of both in-progress and finished work.

Prerequisite: ARTS 34061.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 34063 PAINTING STRATEGIES: IMAGE AND CONTENT 3 Credit Hours

This course investigates various contemporary painting strategies through the use of images as source materials, with a strong emphasis on narrative. Moving away from direct observation and towards the abstraction of imagery, students will be asked to approach their practice through research, preliminary studies and sketches, and a self-driven investigation of the use of images to create concept. Various prompts will be assigned and are designed to provide students with a stronger understanding of the use of found, self-produced, or appropriated imagery as reference for their work, while helping each student build a direction for their painting practice. We will look to other mediums such as film, photography, collage, and advertising to inform the painted image and improve the reading of contemporary painting. We will look to other mediums to better contextualize the painted image in contemporary art.

ARTS 35302 FELTMAKING 3 Credit Hours

Felt is an anti-fabric. Unique among textiles, feltmaking is the only method of cloth construction that wholly denies the grid. Through hands-on intensives and independent research, students engage the unique attributes of feltmaking through planar, pictorial and dimensional outputs. Felt's relationship to conceptual art, post-modernist sculpture, kitsch and camp are explored alongside the study of its social and cultural position within the global history of textiles. Material and technical vocabularies are framed through course texts, presentations and critical discussions. Students output studies and realized works which engage felt as an artistic medium. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35305 TEXTILES: ACCESSORIES - DESIGN AND PRODUCTION 3 Credit Hours

Focus is on the design and production of textile accessories using the structural process of weaving. Texture, material, and color are critically and creatively considered in relation to the development of unique functional objects. Professional design objectives are presented.

Prerequisite: Special approval.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35310 OFF-LOOM 3 Credit Hours

This course focuses on the architectural aspects of interlacement. Moving off the loom, students construct with thread, yarn and other long flexible materials to transform line into planar or sculptural form. Explorations engage space and the pliability of textiles to emphasize the physical and tactile aspects of the materials and construction methods inherent to fiber. Processes such as plaiting, netting, knotting, looping, wrapping, coiling, ropemaking and basketry provide a foundational vocabulary in the exploration of dimensional textiles. The use of traditional materials are combined with found materials to further engage the question of material meaning. Students approach the sensibilities of weaving outside of highly technologized looms by working with direct and accessible tools to find freedom in the pursuit of experimental form. These material and technical vocabularies are framed through course texts, presentations and critical discussions. Students output studies and realized works which engage relief, sculpture and space. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35311 PRINT FOR TEXTILES AND ALTERNATIVE SURFACES 3 Credit Hours

As a holistic exploration of printed textiles, this course presents a range of processes for printing on cloth and alternative substrates. The use of inks, dyes, resists, discharges and additional chemical processes are introduced and explored. Students create hand-drawn, computer generated and photographic images to explore foundational print vocabularies such as block printing, mono printing, screen printing, multiples, color relationships, composition, repeat patterns, color layering, CMYK and experimental alternative processes. The relevance of printed textiles in the expanded field of contemporary art is emphasized. Interdisciplinary and experimental uses of the printed surface are encouraged throughout the development of personal research and practice. Critical discussion of core texts and individualized research occur in tandem with studio activity. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

Prerequisite: Accessories minor or School of Art major or School of Fashion major or Textiles minor.

ARTS 35312 DIGITAL TEXTILES 3 Credit Hours

With connections to technology and industry, textile practices employ digital platforms to speculate form and simulate materiality. Building off these techno-industrial strategies, students engage hybrid making that moves between the screen and material to imagine textile futures. Workshops present a digital textile vocabulary encompassing digital design, repeat and pattern layouts and material simulation. Student work is output through digital fabrication resources at the DI HUB. Coursework considers practices that engage textiles across experiential and technological platforms in contemporary art and design. Essential to this inquiry, students participate in critical discussions of core texts alongside their own making. Studio production engages digital design and outsourced fabrication. This work yields studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35313 BACKSTRAP WEAVING 3 Credit Hours

This rhizomatic potential of weaving is exemplified with backstrap weaving where looms are constructed and altered freely according to the improvisational vision of the weaver. Working from this orientation, this course engages the fluidity of the backstrap loom to transgress binary thinking, and further integrate skill building alongside conceptual development. Students combine traditional and experimental materials with the exploration of four-selvedge cloth, brocade and double cloth to develop a rigorous vocabulary. Visual, pictorial, architectural, sculptural, performative and nomadic practices are explored in a polynary pursuit of weaving. Making occurs in concert with the study of woven cosmologies that predate the modernist lineage. Studio production oscillates between generating material vocabularies and self-directed making workshopped through regular critiques. This coursework considers weaving expansively to disrupt dominant paradigms that define textility through technological and social binaries. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35316 DYE AND COLOR 3 Credit Hours

Color is a uniquely slippery element that can shift before our eyes just as it inflects social, political and emotional meaning upon the visual world. In this course, dyes are an interface to explore the formal and conceptual possibilities of color. Students are introduced to natural and synthetic dye technologies, and develop vocabulary in immersion dyeing, direct application of dyes, dye resists and dye discharges. Alongside material outputs, students investigate the social, economic and historic position of dyes and dyestuffs. Consideration of color as a source of content is a primary point of focus. Coursework includes studio activity, critical discussion of core texts and individualized research. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 35400 FUNCTIONAL APPROACHES TO CLAY 3 Credit Hours

(Repeatable for credit) Intermediate ceramics course focused on creating functional pottery utilizing the wheel and hand building. A range of techniques are demonstrated to build skills and understanding of pottery making, design, function, surface decoration and the concept of made forms. Students learn how to make clay and glazes from dry materials as well as how to fire a gas kiln.

Prerequisite: ARTS 25400.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35401 SCULPTURAL APPROACHES IN CLAY 3 Credit Hours

(Repeatable for credit) An intermediate course focusing on all aspects of sculptural ceramics. Course may include explorations in three-dimensional form, the human figure, mold making, multiples and installation.

Prerequisite: ARTS 25400.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35602 FLAMEWORKED GLASS 3 Credit Hours

(Repeatable for credit) An investigation of techniques, tools, equipment and materials involved in glass lampworking processes. The course covers basic melting, shaping and blowing with a glass flameworking torch.

Prerequisite: None.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35603 GLASS BLOWING 3 Credit Hours

(Repeatable for credit) Further exploration of glass blowing techniques. Design, form, color and execution are emphasized.

Prerequisite: ARTS 25600.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35604 SCULPTURAL AND KILN-FORMED GLASS 3 Credit Hours

(Repeatable for credit) An overview and exploration of sculptural and kiln-formed glass techniques. Casting, pattern making, mold making and cold construction are covered. Design, form, content and technical execution and understanding operations of equipment are emphasized.

Prerequisite: Junior standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35700 JEWELRY CONCEPTS AND TECHNIQUES 3 Credit Hours

An in-depth exploration of jewelry making techniques such as enameling, casting, stone setting, mechanisms and fabrication. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.

Prerequisite: ARTS 25700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35701 METALSMITHING CONCEPTS AND TECHNIQUES 3 Credit Hours

Course offers an in-depth exploration of larger scale fabrication, mechanisms, chasing and repoussé and hammer working techniques (raising, forging and shell forming). Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.

Prerequisite: ARTS 25700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 35704 ENAMELING CONCEPTS AND TECHNIQUES 3 Credit Hours

(Repeatable for credit) An in-depth exploration of vitreous enameling techniques on two-dimensional surfaces. Champlevé, cloisonné and sifted enamel approaches are highlighted. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.

Prerequisite: ARTS 25700.

Schedule Type: Studio

ARTS 44002 ADVANCED DRAWING FOR ALL DISCIPLINES 3 Credit Hours

(Repeatable for credit) (Slashed with ARTS 54002) An advanced drawing course, open to all studio disciplines, with an emphasis on students pursuing individually conceived problems in close consultation one-on-one with faculty.

Prerequisite: ART 30001; and ARTS 24002.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44010 ADVANCED FINE ART PHOTOGRAPHY 3 Credit Hours

Combined studio/lecture course offering more advanced, conceptual approaches to the contemporary applications of photographic imaging for artists. Students work with larger scale printing formats, more involved research and greater depth of involvement with the photographic medium.

Prerequisite: ARTS 24010 and ART 30001.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44011 DIGITAL FINE ART PHOTOGRAPHY 3 Credit Hours

(Slashed with ARTS 54011) Students develop their technical and conceptual skills in fine art digital photography, and develop a contemporary approach to working with the medium. Students explore various photographic and digital techniques, and form an awareness of such techniques in contemporary photography.

Prerequisite: Minimum C grade in ART 10022.

Schedule Type: Studio

Contact Hours: 5 other

Grade Mode: Standard Letter

ARTS 44043 ADVANCED PRINT MEDIA 3 Credit Hours

(Repeatable for maximum 9 credit hours) Advanced printmaking course with emphasis on students producing new, individually conceived visual works in print media in close consultation with faculty.

Prerequisite: ART 30001; and ARTS 34043 or ARTS 34044 or ARTS 34045.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44045 ART OF THE BOOK 3 Credit Hours

(Slashed with ARTS 54045) An introduction to artists' books. A variety of binding methods and strategies for creating art through alternative and traditional book forms are introduced. Students complete projects and develop a personal visual language through the book form.

Prerequisite: Junior standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44046 PAPERMAKING 3 Credit Hours

(Slashed with ARTS 54046) This course introduces students to both traditional and experimental uses of handmade paper. This course combines presentations, demonstrations, group brainstorming sessions, field trips and critiques to apply towards papermaking projects. An artist research presentation and final presentation are required to encourage students to engage in outside resources and self reflect on semester-long growth. Papermaking techniques include but are not limited to: European sheet formation, pulp pigmentation, pulp painting, stenciling, embedding, paper casting and sheet wrapping. Paper fibers incorporated in this course include but are not limited to: abaca, cotton, flax and mulberry. Both two-dimensional and three-dimensional approaches to papermaking are explored. Exploration and experimentation are encouraged with equal demands on craft.

Prerequisite: Junior standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 44051 ADVANCED SCULPTURAL PRACTICE 3 Credit Hours
 (Repeatable for credit) Course is self-directed, in which students create a series of sculptural works in consultation with the instructor and through ongoing student-led presentations, discussions and in-progress and final critiques. Emphasis is on creating a body of work throughout the semester that is informed by and demonstrates an awareness of contemporary practice in terms of approaches to content, form and presentation. Students can work in a variety of ways: object making, installation, site-based and/or time-based approaches. Research and writing are emphasized. Readings, slide presentations, discussions and critiques help provide context and vocabulary for student development.
Prerequisite: ART 30001 and ARTS 24051; and ARTS 34051 or ARTS 34052 or ARTS 34053.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 44060 ADVANCED PAINTING: PRACTICE AND THEORY 3 Credit Hours
 (Repeatable for credit) Advanced painting course with an emphasis on pursuing individually conceived problems in close consultation with faculty.
Prerequisite: ART 30001; and ARTS 34061; and ARTS 34062 or ARTS 34063.
Schedule Type: Studio
Contact Hours: 6 other

ARTS 44070 DIGITAL FABRICATION IN STUDIO ART 3 Credit Hours
 (Slashed with ARTS 54070) This course is an introduction to digital fabrication technologies as they relate to a studio practice. Mastery of software skills enables one to better explore object-making as a medium of personal expression. In addition to technical skills, the course will introduce relationships between form, subject matter, and content. Projects will include technical and conceptual problem solving, design lessons, object making and short student lead initiatives to connect to maker spaces and industries that can support future making. Instructor facilitated discussions between students will form a community of mutual learning.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 44091 VARIABLE CONTENT SEMINAR: STUDIO ART 3 Credit Hours
 (Repeatable for credit) (Slashed with ARTS 54091) Contemporary issues related to visual arts are explored through presentation, lecture, and discussion. Guest speakers augment staff.
Prerequisite: Junior or senior standing.
Schedule Type: Seminar
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 44096 INDIVIDUAL STUDY: STUDIO ART 1-6 Credit Hours
 (Repeatable for credit) Additional study in area of student's choice in consultation with advisor.
Prerequisite: ART 30001; and a major in Studio Art; and special approval.
Schedule Type: Individual Investigation
Contact Hours: 2-12 other
Grade Mode: Standard Letter

ARTS 44098 RESEARCH IN STUDIO ART (ELR) 1-3 Credit Hours
 (Repeatable for credit) Studio research in the visual arts.
Prerequisite: Junior or senior standing.
Schedule Type: Research
Contact Hours: 3-9 other
Grade Mode: Standard Letter-IP
Attributes: Experiential Learning Requirement

ARTS 44192 INTERNSHIP OR PRACTICUM IN STUDIO ART (ELR) 1-6 Credit Hours
 (Repeatable for credit) (Slashed with ARTS 54192) An undergraduate, experience-based learning activity carried out in a visual arts setting. Emphasis is on the goals of connecting ideas, concepts, and skills developed in coursework to applications in new or different contexts, demonstrating how this experience has broadened students' understanding of their discipline, and reflection on the significance of the experience.
Prerequisite: A major in the School of Art; junior or senior standing; and special approval of faculty sponsor.
Schedule Type: Practical Experience
Contact Hours: 3-18 other
Grade Mode: Standard Letter-IP
Attributes: Experiential Learning Requirement

ARTS 45080 KENT BLOSSOM ART 1-6 Credit Hours
 (Repeatable for credit) (Slashed with ARTS 55080) Studio exploration of selected concepts in studio art: painting; drawing; sculpture and expanded media; print media and photography; ceramics; glass; jewelry, metals and enameling; textiles. Content varies with each section offered.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 2-12 other
Grade Mode: Standard Letter-IP

ARTS 45089 INTERNATIONAL EXPERIENCE: STUDIO ART (DIVG) (ELR) 1-3 Credit Hours
 (Repeatable for credit) (Slashed with ARTS 55089) A Kent State faculty-led study abroad experience in studio art that integrates traditional classroom learning with experiential activities and site visits outside the United States.
Prerequisite: Studio Art major; and special approval.
Schedule Type: International Experience, Lecture
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Diversity Global, Experiential Learning Requirement

ARTS 45090 STUDY AWAY: STUDIO ART (ELR) 1-3 Credit Hours
 (Slashed with ARTS 55090)(Repeatable for credit) Study away in studio art disciplines at a site at or away from Kent State University.
Prerequisite: Studio Art major.
Schedule Type: Study Away
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement

ARTS 45095 SPECIAL TOPICS: STUDIO ART 1-6 Credit Hours
 (Repeatable for credit) (Slashed with ARTS 55095) Specialized courses in studio art that focus on specific techniques and media.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 2-12 other
Grade Mode: Standard Letter

ARTS 45098 SENIOR THESIS RESEARCH AND PROPOSAL (ELR) 1 Credit Hour

(Repeatable for credit) Preparatory course, which acts as an exploratory period for students to develop their ideas - conceptually, thematically and materially - through research, writing and physical material studies. Upon successful completion, students may continue with ARTS 45099.

Prerequisite: Major in Studio Art; senior standing; and special approval.

Schedule Type: Research

Contact Hours: 1.6 other

Grade Mode: Satisfactory/Unsatisfactory-IP

Attributes: Experiential Learning Requirement

ARTS 45099 SENIOR THESIS EXHIBITION (ELR) 3 Credit Hours

This course prepares students for the challenges of a creative professional practice in their chosen discipline. As the culmination of undergraduate studies, the course serves as a capstone experience for students in their chosen concentration. Provides students an opportunity to independently develop and create a body of work for exhibition and oral review with faculty. Requires the completion of an undergraduate thesis and professional caliber photo documentation of the exhibition.

Prerequisite: ART 30001; and special approval.

Schedule Type: Project or Capstone

Contact Hours: 3 other

Grade Mode: Standard Letter-IP

Attributes: Experiential Learning Requirement

ARTS 45300 JACQUARD: DIGITAL WEAVING 3 Credit Hours

(Slashed with ARTS 55300)(Repeatable for credit) The digitally interfaced jacquard goes beyond the limitations of the floor loom, allowing for direct control of individual threads to enable image materialization. Incorporating mediation and handwork, students explore the historical and conceptual interstices of digital technology, weaving and picture-making. This advanced course investigates the tensions between digital interfaces and material outputs while engaging their cooperative possibilities. Inquiries into the implications of aesthetics, skill and technology are explored alongside the relationship of cloth and image. A vocabulary of woven constructions, patterns, colors and textures are developed using the digital jacquard loom. Coursework incorporates the computer, handweaving, reading, research and critical dialogue. A personal laptop computer is required for this course. We reclaim the jacquard as a hand loom to articulate form that can only emerge through the confrontation and synthesis of body and technology. The weaver embodies the cyborg. Students who do not meet the prerequisites may register for the course with special approval. Please speak to an advisor for more information.

Prerequisite: ARTS 45314 or ARTS 45351; and junior standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45301 TEXTILES: ADVANCED STUDIO 3 Credit Hours

Structured time for individual investigations in textiles. Emphasis on self-designed study. Bi-weekly presentations of contemporary work in textiles and weekly discussions or critiques with open studio.

Prerequisite: ART 30001; and special approval.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45307 TEXTILES: WEAVING AND COLOR 3 Credit Hours

(Slashed with ARTS 55307) This course will provide students with an opportunity to explore numerous techniques that emphasize the interaction of color in relation to the unique interlacement process of weaving. Use of different looms (including the floor and frame) will provide the means to integrate color with patterns and image in the connection of warp and weft. Immersion dyeing will be introduced along with specialized direct dye application methods.

Prerequisite: Special approval.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45308 TEXTILE ARTS AND GENDER 3 Credit Hours

(Slashed with ARTS 55308) Textile Arts and Gender is designed as an exploratory learning experience. Through weekly readings and discussions, students will engage with historical and contemporary ideas of how textiles relate to gender and how this informs contemporary textile art practice. Simultaneously, students will be learning textile art techniques chosen because of their close association with historical notions of the feminine, the decorative, and the domestic. Students will also study the contemporary use of these same techniques in textile works that explore the concepts of gender, feminism, and subversion.

Prerequisite: None.

Schedule Type: Studio

Grade Mode: Standard Letter

ARTS 45314 PRACTICES IN WEAVING: TAPESTRY 3 Credit Hours

(Slashed with ARTS 55314)(Repeatable for credit) This intensive studio course considers tapestry expansively as an interface through which weaving contributes to aesthetics and meaning according to its own logic and history. Woven form is realized in collaboration with the tectonic grid of the loom, yielding a unique relationship to image-making; the structural surface and the image it bears are one and the same. Working with multi-harness floor looms, students engage this question through rigorous material explorations. Vocabulary is expanded through the study of double cloth, discontinuous/supplementary wefts and dye processes. The position of weaving as a progenitor of abstraction and the role of color as a catalyst for meaning are essential points of inquiry. Critical discussion of core texts and individualized research occur in tandem with studio activity. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. This work considers the practice of weaving as an expansive playground to complicate the paradigms of contemporary art with textility. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

Prerequisite: ARTS 25310.

ARTS 45351 PRACTICES IN WEAVING: LOOM-THINKING 3 Credit Hours

(Slashed with ARTS 55351)(Repeatable for credit) This intensive studio course focuses on weaving and its relationship to the evolving landscape of contemporary art. Working with multi-harness floor looms, students engage rigorous questions in imagery, sculptural form and spatial intervention. Vocabulary is expanded through the study of complex woven constructions, hand and digital drafting and dye processes. Emphasis is placed on developing fluency with the language and logic of the loom. Here, students enter the space of "loom-thinking" to create, mutate, subvert and interrupt weave drafts and thread interlacements in the production of woven form. Through their developing technical virtuosity, students push the algorithmic sensibility of weaving toward visual and material poetics. Critical discussion of core texts and individualized research occur in tandem with studio activity. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. This work considers the practice of weaving as an expansive playground to complicate the paradigms of contemporary art with textility. Students who do not meet the prerequisite may register for the course with special approval. Please speak to an advisor for more information.

ARTS 45400 ADVANCED CERAMICS 3 Credit Hours

(Repeatable for credit) Course is designed to assist and guide students in developing their own personal art practice, concepts and skills using the ceramic medium. Personal research and critical thinking are emphasized during class discussions and critiques.

Prerequisite: ART 30001; and ARTS 35400 or ARTS 35401.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45600 ADVANCED GLASS WORKING 3 Credit Hours

(Repeatable for credit) Individual exploration of sculptural and hot glass techniques. Design, form, content and execution strongly emphasized. Introduction to studio facility design, construction and maintenance.

Prerequisite: ART 30001; and two of the following courses: ARTS 35602, ARTS 35603 and ARTS 35604.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45700 JEWELRY DESIGN AND PRODUCTION 3 Credit Hours

Course examines strategies and techniques to effectively enter the jewelry field. Industrial applications to produce multiples, research into specialized markets and packaging of work are addressed. Design and professional practice skills are emphasized.

Prerequisite: ARTS 35700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45705 CAD FOR JEWELRY 3 Credit Hours

(Slashed with ARTS 55705) Students develop a set of comprehensive computer-aided design (CAD) skills to be utilized in a variety of studies such as sculpture design, jewelry making and many others. CAD skills are developed through the investigation of laser cutting, 3D modeling, project planning and 3D printing. Mastery of these techniques enable students to better explore object-making as a medium of personal expression. Although there are many technical components to learn, the instructor also focuses on the relationship between form, subject matter and content.

Prerequisite: ART 30001 and ARTS 25700.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45707 CONTEMPORARY APPROACHES IN METALSMITHING 3 Credit Hours

Course introduces students to current trends in the creation of metalsmithed objects. "Materialsmiting", new technologies and industrial applications are joined with historically important metalsmithing principles in the ideation and creation of new works. Research and conceptual development are emphasized.

Prerequisite: ART 30001 and ARTS 35701.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 45708 BODY ORNAMENTATION 3 Credit Hours

(Slashed with ARTS 55708)(Repeatable for credit) Course addresses the expanding theories and techniques used to adorn the body within jewelry metals and enamel. New technologies, material exploration and contemporary practices in adornment are presented. Conceptual development and research are emphasized.

Prerequisite: ARTS 25700.

Schedule Type: Studio

Contact Hours: 6 other

ARTS 54002 ADVANCED DRAWING FOR ALL DISCIPLINES 3 Credit Hours

(Repeatable for credit) (Slashed with ARTS 44002) An advanced drawing course, open to all studio disciplines, with an emphasis on students pursuing individually conceived problems in close consultation one-on-one with faculty.

Prerequisite: Graduate standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 54011 DIGITAL FINE ART PHOTOGRAPHY 3 Credit Hours

(Slashed with ARTS 44011) Students develop their technical and conceptual skills in fine art digital photography, and develop a contemporary approach to working with the medium. Students explore various photographic and digital techniques and form an awareness of such techniques in contemporary photography.

Prerequisite: Graduate standing.

Schedule Type: Studio

Contact Hours: 5 other

Grade Mode: Standard Letter

ARTS 54045 ART OF THE BOOK 3 Credit Hours

(Slashed with ARTS 44045) An introduction to artists' books. A variety of binding methods and strategies for creating art through alternative and traditional book forms are introduced. Students complete projects and develop a personal visual language through the book form.

Prerequisite: Master of Arts degree or Master of Fine Arts degree; and graduate standing.

Schedule Type: Studio

ARTS 55314 PRACTICES IN WEAVING: TAPESTRY 3 Credit Hours

(Slashed with ARTS 45314)(Repeatable for credit) This intensive studio course considers tapestry expansively as an interface through which weaving contributes to aesthetics and meaning according to its own logic and history. Woven form is realized in collaboration with the tectonic grid of the loom, yielding a unique relationship to image-making; the structural surface and the image it bears are one and the same. Working with multi-harness floor looms, students engage this question through rigorous material explorations. Vocabulary is expanded through the study of double cloth, discontinuous/supplementary wefts and dye processes. The position of weaving as a progenitor of abstraction and the role of color as a catalyst for meaning are essential points of inquiry. Critical discussion of core texts and individualized research occur in tandem with studio activity. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. This work considers the practice of weaving as an expansive playground to complicate the paradigms of contemporary art with textility.

Prerequisite: Studio Art major; and graduate standing; and special approval.

ARTS 55351 PRACTICES IN WEAVING: LOOM-THINKING 3 Credit Hours

(Slashed with ARTS 45351)(Repeatable for credit) This intensive studio course focuses on weaving and its relationship to the evolving landscape of contemporary art. Working with multi-harness floor looms, students engage rigorous questions in imagery, sculptural form and spatial intervention. Vocabulary is expanded through the study of complex woven constructions, hand and digital drafting and dye processes. Emphasis is placed on developing fluency with the language and logic of the loom. Here, students enter the space of "loom-thinking" to create, mutate, subvert and interrupt weave drafts and thread interlacements in the production of woven form. Through their developing technical virtuosity, students push the algorithmic sensibility of weaving toward visual and material poetics. Critical discussion of core texts and individualized research occur in tandem with studio activity. Students produce studies and fully realized artworks developed through in-process discussions and presented in formal critique settings. This work considers the practice of weaving as an expansive playground to complicate the paradigms of contemporary art with textility.

ARTS 55705 CAD FOR JEWELRY 3 Credit Hours

(Slashed with ARTS 45705) Students develop a set of comprehensive computer-aided design (CAD) skills to be utilized in a variety of studies such as sculpture design, jewelry making and many others. CAD skills are developed through the investigation of laser cutting, 3D modeling, project planning and 3D printing. Mastery of these techniques enable students to better explore object-making as a medium of personal expression. Although there are many technical components to learn, the instructor also focuses on the relationship between form, subject matter and content.

Prerequisite: Graduate standing.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

ARTS 55708 BODY ORNAMENTATION 3 Credit Hours

(Slashed with ARTS 45708)(Repeatable for credit) Course addresses the expanding theories and techniques used to adorn the body within jewelry metals and enamel. New technologies, material exploration and contemporary practices in adornment are presented. Conceptual development and research are emphasized.

Prerequisite: Graduate standing.

About This Program

The Bachelor of Fine Arts (B.F.A.) in Art Education prepares students for pre-K-12 visual arts licensure. Graduates from this program are prepared to use learner-centered pedagogy using expressive, technical and organizational skills, with a basic understanding of the cultural and social foundations underlying art and design in education. Our graduates deeply immerse in and demonstrate strengths in diversity, equity and inclusion practices; principles of child development and the creative growth of learners; traditional and digital media; art history and aesthetic concepts; artistic studio practices; instructional strategies based on reflective practice; and inclusive, engaging and transformative learning environments. Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

- Student must satisfy all professional disposition assessments at least three times throughout their teacher education program, which includes student teaching. Professional dispositions are the professional attitudes, values and beliefs demonstrated through both verbal and non-verbal behaviors as educators interact with students, families, colleagues, faculty and communities.
- Students must pass ARTE 41009, a course that examines the student’s knowledge, proficiency and ability to apply concepts in art and visual arts education.
- Students must pass the Kent Summative Teacher Education Project (K-STEP) designed to develop and evaluate their ability to plan for instruction, use instructional strategies and assess student learning during their final student teaching experience.
- Students must successfully complete student teaching, the culminating experience in the preparation of the student teacher candidate.
- ARTH 12001 is designed for non-art majors, and will not fulfill major requirements for art majors.

Licensure Information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. The following Ohio Assessment for Educators (OAE) examinations are required for licensure: OAE 004, the visual art content assessment; and OAE 006, the pre-K-12 multi-age visual arts pedagogy assessment. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged, but not required.

Program Learning Outcomes

Graduates of this program will be able to:

1. Construct lesson plans that reflect learner-centered pedagogy that is culturally responsive, inclusive and developmentally appropriate.
2. Incorporate the use of evidence-based instructional strategies, resources and instructional technology as part of the learning activities aligned with goals, objectives and/or standards in the lesson plans.
3. Apply evidence-based instruction to meet a diversity of students' needs.
4. Practice reflective teaching in the classroom to accommodate all students using effective strategies, resources, materials and accommodations to adapt instruction to meet the needs of individuals and groups of students.

5. Implement formative and summative assessments that align conceptually to the lesson objectives and are designed to be appropriate to address individual student differences and minimize bias.
6. Demonstrate professional teaching dispositions.
7. Apply creative, technical, procedural and interpretive skills through a range of studio art and design experiences.

Full Description

The Bachelor of Fine Arts degree in Art Education prepares students to effectively teach visual art by applying a learner-centered pedagogy to embrace the many dimensions of human intelligence and aesthetic education.

Art educators understand child development to successfully engage learners in the complete artistic process of thinking—perceptual, imaginative, formative, expressive and communicative—by combining a range of subject matter, symbols and ideas. They organize and evaluate teaching activities for creating and analyzing works of art and design from contemporary and past cultures. This involves using a variety of media, technology and community resources and making connections between visual art and other disciplines, as well as assessing the learning outcomes of their students.

In addition, art educators are prepared to meet the needs of all students with an understanding of the value of diversity. They create safe and equitable learning environments in which to nurture lifelong skills in problem solving, critical thinking, collaboration, creativity and constructing meaning.

Graduates of the degree program will be eligible to be certified for pre-K-12 visual art teacher licensure.

Study Abroad/Away Opportunities:

- Travel opportunities to New York City and Paris
- Study abroad through Kent State's Florence program in Florence, Italy (full semester or summer art and design experience)
- Ohio Art Education Association and National Art Education Association Travel Studies

Professional Licensure Disclosure

This program is designed to prepare students to sit for applicable licensure or certification in Ohio. If you plan to pursue licensure or certification in a state other than Ohio, please review state educational requirements for licensure or certification and contact information for state licensing boards at Kent State's website for professional licensure disclosure.

ART 67 199	M.A.THESIS I ⁵	

Minimum Total Credit Hours: 30

¹ Students who completed ARTE 41004 as an undergraduate will consult with their faculty advisor on the elective course to take as a replacement for this requirement.

² Students select elective courses in consultation with their program advisor based on research interests.

³ ARTE 61399 is appropriate for students in contexts in which research can be completed as part of their own practice, in most cases in their own art classrooms or other educational venues. The course involves research, which focuses on participant/researcher studies in curriculum, classroom settings, grant implementation and/or community-based projects. Students articulate and refine knowledge, reflective practice (including critical self-reflection) and develop goals to improve practice or further understanding of phenomena within the field of art education.

⁴ Students who select the project capstone as their culminating requirement will take an additional, guided elective, based on their research interest, to meet the 30 credit hours for the degree.

⁵ The thesis is a significant project or body of work done independently of other coursework. Students are expected to demonstrate the ability to conduct research or produce a significant, original project in a discriminating and disciplined manner. The thesis topic should be one that will further the student's knowledge and ability in the specialty by demonstrating skill as a researcher. The outcome should be an

effort that serves as a foundation for the pursuit of independent work when the graduate program is completed. At this stage, students are expected to work in close consultation with their thesis advisor.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
-	3.000

- No more than one-half of a graduate student's coursework may be taken in 50000-level courses.
- Grades below C are not counted toward completion of requirements for the degree.

Program Learning Outcomes

Graduates of this program will be able to:

1. Understand the breadth of theoretical, philosophical, historical and pedagogical issues in visual arts education instruction and curriculum.
2. Articulate how issues that foster positive social change are inherent in the field and are constructed within wider frameworks of culture and society.
3. Understand the purposes, functions and value of teaching art and design in PreK-12 educational settings.
4. Understand and refine the application of art and general education research methodology, methods and procedures.
5. Demonstrate advanced comprehension of self-identified topics through conducting detailed research investigation.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

Transfer students with more than two studio courses should submit a portfolio of work for proper placement. The director of the School of Art may impose additional requirements considered reasonable and necessary. Transfer credits are evaluated consistent with the state Transfer Articulation Guidelines (TAG), although each student will be evaluated individually in terms of their ability to perform within the program. Transfer students should make every effort to complete admission requirements before the deadlines and to see an advisor in the School of Art for an evaluation of the portfolio and for schedule planning before registration.

Print Media and Photography - Minor

College of the Arts

School of Art

www.kent.edu/art

About This Program

The Print Media and Photography minor provides an introduction to printmaking and fine art photography. Students can pursue a study in traditional printmaking techniques such as intaglio, silkscreen and lithography, as well as digital applications. Students can also pursue a study in photography, including traditional darkroom and film alternative photographic techniques and fine art digital photography. Synergies between these two historically related disciplines provide ample room for experimentation and a course of study designed specifically to suit students' interests.

Sculpture and Expanded Media - Minor

College of the Arts

School of Art

www.kent.edu/art

About This Program

The Sculpture and Expanded Media minor offers students a wide range of approaches, strategies and techniques to making dimensional and spatial work. Students learn to fabricate sculptural objects utilizing techniques in clay, plaster, wood, metal and non-traditional materials. In addition, they are exposed to and learn to work in expanded media formats, such as installation art and time-based practices (video, sound, performance).

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

Transfer applicants to the program who meet the general transfer admission requirements should schedule a meeting with the academic advisor in the School of Art and submit a portfolio to a studio art faculty member to review for proper course placement. The faculty member may specify additional requirements considered reasonable and necessary. Transfer credits are evaluated consistent with the state-wide Transfer Articulation Guides (TAG), although each student will be evaluated individually in terms of his or her ability to perform in the program. Transfer students should make every effort to complete admission requirements before the deadlines and to schedule a portfolio review with before registration.

The review is a formative assessment of the student's foundations work including a digital portfolio, installation of sampling of works and proficiency in written and oral critical thinking.

² A minimum C grade must be earned to fulfill the writing-intensive requirement.

³ Students are required to plan and execute independently a senior thesis exhibition in the area of their declared concentration. The exhibition is presented for review to a committee of at least three School of Art faculty. In addition to presenting the project or exhibition, students must submit a written proposal and written summation (or artist's statement). Students must submit photographic documentation along with the requisite written components at the completion of the committee defense. Students should work closely with a studio art faculty advisor on all aspects of the senior project.

⁴ A maximum 3 credit hours of ARTS 45090 may be applied toward studio art electives. Students may apply this course toward fulfilling general electives, with no maximum credit hours required.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate skills within their chosen medium/media, associated materials and processes.
2. Defend work showing a high degree of design, visual literacy and formal analysis.
3. Discuss their work within larger contemporary and historical contexts.
4. Articulate and critically examine artistic practices, including their own, in both written and oral form.
5. Defend self-directed research.

6. Situate their practice in relationship to the public and engage in professional practices as an emerging artist.

Full Description

The Bachelor of Fine Arts degree in Studio Art is a pre-professional program that develops students' conceptual prowess, technical competency and independent problem-solving to meet the challenges of a career or advanced study in the visual arts. Through studio critiques, the study of sophisticated art and design concepts, mastery of skills and technologies and critical analysis of historical and contemporary issues, students learn to analyze and evaluate visual art and apply this knowledge to their own creative practice. Graduating students demonstrate their competence by producing a cohesive body of work presented in their senior thesis exhibition to a panel of faculty reviewers.

The Studio Art major comprises the following concentrations:

- The **Ceramics** concentration offers students the opportunity to hone their command of ceramic material to create both artistic and functional forms. Students find new ways of practicing an ancient craft, drawing on both traditional and contemporary thought and practice. In addition, they investigate practices from around the world for a global context in understanding the medium.
- The **Drawing** concentration cultivates foundational through advanced observational, conceptual and experimental processes to enable students to explore ideas across media and disciplines. All majors in the School of Art are able to complete a sequence of drawing courses to strengthen their drawing as a tool for visual thinking and recording. The concentration encourages advanced students to work with a wide range of approaches and to pursue drawing in diverse contexts.
- The **Glass** concentration challenges students to explore glass as a creative medium, both technically and conceptually, within the broader context of contemporary art. In addition to the fundamentals of glassblowing, students learn glass casting, slumping, fusing, frameworking, enameling, cold-working and assembly. Both interdisciplinary and mixed media approaches are actively encouraged.
- The **Jewelry, Metals and Enameling** concentration equally embraces its rich history and the contemporary theory, materials and technology present in the discipline. Students are exposed to fabrication, smithing, enameling, rapid prototyping, alternative materials and industrial processes to encourage the creation of thoughtful art objects. Students are encouraged to meld the rich traditions and applications of the field into the development of their own artistic signatures.
- The **Painting** concentration is rooted in observation and technique while stimulating abstract, conceptual or material-driven ideas about painting and contemporary art practices. The curriculum supports a variety of specific approaches to painting – including collage, figural, landscape and abstraction – while simultaneously promoting an interdisciplinary approach and emphasizing engagement with contemporary practices. Advanced painting students work in consultation with faculty advisors to pursue individual directions and interests.
- The **Print Media and Photography** concentration introduces students to all traditional print forms as a foundation for conceptual approaches. Students are able to learn print techniques such as intaglio, lithography, relief, silkscreen and large-format digital printing. In addition, students can explore traditional and experimental photography and develop print matrices. Students learn how to

develop printed and photographic works of art through layering, problem solving and thoughtful material applications.

- The **Sculpture and Expanded Media** concentration encourages proficiency in foundational methods of making-modeling, carving and assembly. The concentration is a springboard for students to learn how to communicate ideas through sculptural works. Although sculpture classes are rooted in the history of object-making, new forms of sculptural practice (installation, time-based practice, sound and kinetic works) are all part of a comprehensive three-dimensional program.
- The **Textiles** concentration is distinguished by a transdisciplinary approach that fosters conceptual vision, technical facility and formal and material sensitivity. Coursework includes weaving, digital fabrication, off-loom construction, dye and print. The curriculum emphasizes the position of textiles within a contemporary art landscape and is supported by evolving theoretical discourse. Making and meaning are engaged as interdependent elements of studio production. Consideration of the distinctive properties and processes of textiles – repetition, geometry, line, color, pliability and embodiment – engenders a rigorous vocabulary to support formal and conceptual inquiry. Students explore thinking and working with age-old hand processes while incorporating digitally-interfaced approaches to making. Individual and collective studio practice is contextualized through the study of histories, political meanings and social themes that are deeply interwoven into the discipline of textiles.

A concentration does not need to be declared upon admission, but students should declare a concentration no later than completion of ART 30001.

Students in the program are encouraged to take advantage of travel opportunities to New York, Chicago, London, Paris and China. In addition, students can participate in study abroad full semester or summer experiences at Kent State's Florence, Italy location.

- Grades below C are not counted toward completion of requirements for the degree.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate advanced professional competence in studio art as exemplified by depth of knowledge and achievement of a significant body of work.
2. Write and present orally the historical and cultural contents of art production.
3. Demonstrate advanced skills of aesthetic judgement and assessment, as well as integration/synthesis and independent thought.
4. Discuss contemporary art making and relevant issues.

Full Description

The Master of Fine Art degree in Studio Art is designed to prepare students for careers as independent visual arts through the cultivation and refinement of a successful studio practice. The program emphasizes intensive personal investigation and the development of strong aesthetic and conceptual understanding. In addition to time in their own studio, students have opportunities to enhance existing skills and knowledge by observing undergraduate class demonstrations and critiques.

The M.F.A. is the terminal degree in the studio arts and is a requirement for those who intend to teach visual arts in higher education.

The Studio Art major comprises the following concentrations:

- The **Ceramics** concentration offers an intense focus on artistic development. Through mentorship and a broad spectrum of course offerings, students work closely with faculty advisors to find their

own voice as artists. Studio practice is supplemented with art history seminars, visiting artist lectures, summer workshops and travel study programs to New York City, culminating in a solo M.F.A. thesis exhibition.

- The **Drawing** concentration draws upon contemporary practices and discourse in the field to prepare students for a life in the arts. Students are encouraged to work across disciplines and techniques in order to develop a body of work that reflects their independent investigations in drawing. Studio practice is supplemented with art history seminars, visiting artist lectures, summer workshops and travel study programs to New York City, culminating in a solo M.F.A. thesis exhibition.
- The **Glass** concentration is based on the belief that successful creative work results from spending time with one's ideas and receiving constructive and supportive criticism from faculty and peers. The concentration aims to create an atmosphere where students pursue ideas and engage in an extended scholarly dialogue. While building on the legacy of the American Studio Glass Movement, students are fostered to be leaders in redefining the future of studio glassmaking.
- The **Jewelry, Metals and Enameling** concentration allows students to build individual research strategies for developing a coherent and distinctive body of work. Investigations of inter-media and interdisciplinary relationships are part of the curricular focus. Students are expected to be conscious of and involved in contemporary practices, discourse and trends, nationally and globally, among the field and within the larger arts/crafts/design movements. In addition to time in their own studio, students have opportunities to enhance existing skills and knowledge by observing undergraduate class demonstrations and critiques. Students are encouraged to use both traditional and contemporary studio practices while having access to an array of metalsmithing equipment, enameling kilns and a digital fabrication laboratory.
- The **Painting** concentration draws upon contemporary practices and discourse in the field to prepare students for a life in the arts. Students are encouraged to work across disciplines and techniques in order to develop a body of work that reflects their independent investigations in painting. Studio practice is supplemented with art history seminars, visiting artist lectures, summer workshops and travel study programs to New York City, culminating in a solo M.F.A. thesis exhibition.
- The **Print Media and Photography** concentration aims to strengthen students' personal vision through emphasis on the conceptual aspects of the printmaking and photography disciplines. Students have access to studios for lithography, etching, relief, silkscreen and digital media, in addition to a darkroom, press room and digital fabrication laboratory. Enrollment is deliberately kept small enough to make possible the faculty mentor/student relationship.
- The **Sculpture and Expanded Media** concentration encourages proficiency in foundational methods of making-modeling, carving and assembly. The concentration is a springboard for students to learn how to communicate ideas through sculptural works. Although sculpture classes are rooted in the history of object-making, new forms of sculptural practice (installation, time-based practice, sound and kinetic works) are all part of a comprehensive three-dimensional program.
- The **Textiles** concentration positions textile-making firmly within the contemporary art landscape while encouraging a transdisciplinary approach to studio practice. Students work closely with faculty mentors to nurture their artistic voice and draw upon the significant

resources of the textiles program. Individual-making is contextualized by engaging the histories, political meanings and social themes embedded in the discipline alongside the broader art historical canon. The program integrates studio activity, art historical research, summer workshops, travel study to New York City and the culminating M.F.A. thesis exhibition as a means of guiding emerging artists toward an active, public, evolving and sustainable art practice.

About This Program

The Textiles minor offers an expansive approach to textile-making through the exploration of a broad range of materials and processes. Students develop technical virtuosity in tandem with their artistic voice. The curriculum integrates studio activity with the study of the social and political histories of the discipline to grow a holistic approach to textile practice. Programmatic flexibility encourages a course of study that supports individual interest and expression.

Fashion Design and Merchandising (FDM)

FDM 10010 FASHION FUNDAMENTALS 3 Credit Hours

Introduction to the global fashion industry. Analysis of the business of fashion and how it is conceived, marketed, sold, and consumed. Overview of important resources, companies, career options and personnel who impact the industry.

Prerequisite: Fashion design, fashion merchandising or pre-fashion design and merchandising major.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 10023 FASHION VISUALS 1 Credit Hour

The study of fashion information, research sources, color theory, two-and three-dimensional design and visual presentation formats as they apply to the fashion industry.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10024.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

FDM 10024 FASHION VISUALS LABORATORY 2 Credit Hours

Laboratory applications in the study of fashion information, research sources, color theory, two-and three-dimensional design and visual presentation formats as they apply to the fashion industry.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10023.

Schedule Type: Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

FDM 10033 FASHION FABRICS 1 Credit Hour

Study of fabrics, from fiber through finishing processes, with a concentration on differentiating between fibers, fabric construction methods, and other processes involved in production. Emphasis is on understanding fabric properties, including environmental impact, cost, care and how they relate to textile end-usage.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10034.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

FDM 10034 FASHION FABRICS LABORATORY 2 Credit Hours

Study of fabrics, from fiber through finishing processes, with a concentration on differentiating between fibers, fabric construction methods, and other processes involved in production. Emphasis is on understanding fabric properties, including environmental impact, cost, care, and how they relate to textile end-usage. Lab-specific content and assignments reinforce Lecture content.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10033.

Schedule Type: Laboratory, Lecture, Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

FDM 10043 SUSTAINABLE FASHION THINKING 1 Credit Hour

An introductory exploration of the current fashion industry and the urgent need to create sustainable change. After a survey of fashion industry functions from concept to consumer, students identify current practices and areas of concern. Course focuses on understanding how and why those practices must change and examining burgeoning ideas, methods, practices and business structures shifting to a sustainable future.

Prerequisite: Fashion Design or Fashion Merchandising majors.

Corequisite: FDM 10044.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

FDM 10044 SUSTAINABLE FASHION THINKING LABORATORY 2 Credit Hours

An introductory exploration of the current fashion industry and the urgent need to create sustainable change. After a survey of fashion industry functions from concept to consumer, students identify current practices and areas of concern. Lab focuses on practicing strategies, including critical thinking, human centered design, sustainable product service systems and corporate social responsibility to influence needed change within industry. Fashion design and fashion merchandising students work collaboratively in groups to explore solutions for a sustainable future in the fashion industry.

Prerequisite: Fashion Design or Fashion Merchandising majors.

Corequisite: FDM 10043.

Schedule Type: Laboratory, Lecture, Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

FDM 10053 INTRODUCTION TO FASHION TECHNOLOGY 1 Credit Hour

Introduces students to the fundamental concepts, procedures, and techniques used in digital imaging software and information database software. A survey of current and emerging technologies used in fashion design, merchandising and production contexts is presented.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10054.

Schedule Type: Lecture

Contact Hours: 1 lecture

Grade Mode: Standard Letter

FDM 10054 INTRODUCTION TO FASHION TECHNOLOGY LABORATORY 2 Credit Hours

Laboratory applications of fundamental concepts, procedures, and techniques used in digital imaging software and information database software. A survey of current and emerging technologies used in fashion design, merchandising, and production contexts is presented and applied.

Prerequisite: Fashion design or fashion merchandising major.

Corequisite: FDM 10053.

Schedule Type: Combined Lecture and Lab

Contact Hours: 1 lecture, 2 lab

Grade Mode: Standard Letter

FDM 10140 FOUNDATIONS OF FASHION DRAWING 3 Credit Hours

Introduction to fashion drawing. Concentration on communicating through drawing the fashion figures and technical flats, accurate garment proportion and construction.

Prerequisite: Fashion design major.

Schedule Type: Combined Lecture and Lab

Contact Hours: 5 other

Grade Mode: Standard Letter

FDM 15055 BASICS OF APPAREL CONSTRUCTION 3 Credit Hours

Introduction to sewing techniques and application processes using industrial sewing machines and other related equipment in basic garment construction. Development of fundamental patternmaking skills.

Prerequisite: Fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20013 HISTORY OF COSTUME 3 Credit Hours

Chronological study and research of historic costume from the origin of clothing through the French revolutionary era, 19th and 20th century designers, and the influence on contemporary fashion.

Prerequisite: HIST 11050 or HIST 11051 or ARTH 22006 or ARTH 22007.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 20030 FASHION APPAREL ANALYSIS 3 Credit Hours

Analysis and evaluation of fashion apparel; quality standards of ready-to-wear apparel and factors that influence the aesthetic and functional performance of the end product.

Prerequisite: FDM 10033 and FDM 10034; and fashion merchandising major.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 20050 FASHION TECHNOLOGY APPLICATIONS 3 Credit Hours

A continuation of content related to technology within the fashion industry. Pattern manipulation, basic technical packages, garment measuring specs, print design and computerized fashion illustration is addressed with the use of industry-specific and off-the-shelf software packages.

Prerequisite: FDM 10053 and FDM 10054; and fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20121 FASHION DRAWING 3 Credit Hours

Study of communicating design ideas, rendered fabrics, consumer types, technical flats, and the depiction of garment construction through the use of digital toolsets and illustration technology. Emphasis will be placed on the depiction of a variety of body types, demographics (gender identity, differently-abled, race/ethnicity, age, culture), fabric types (weight, end use, pattern/print, color, etc.) on the figure.

Prerequisite: FDM 10023 and FDM 10024; and fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20123 FASHION DESIGN CONCEPTS 3 Credit Hours

An introduction to the process and methodology of creating fashion products with considerations of sustainable practice and diverse consumer markets. Students will apply fashion communication skills and combine with visual thinking practices. Emphasis will be on design thinking, sustainable methodology, creative experimentation, and a variety of body types and markets.

Prerequisite: FDM 10043 and FDM 10044 and FDM 20121.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20153 FLAT PATTERN 3 Credit Hours

Development of basic muslins and slopers. Patternmaking principles of dart manipulation and added fullness. Construction techniques for bodice, skirt, sleeve, collar, and pant variations.

Prerequisite: FDM 10033 and FDM 10034; and FDM 15055; and fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20154 DRAPING 3 Credit Hours

Development of basic garment shapes using draping techniques. Emphasis placed on torso development, contouring principles and design development on the form. Construction techniques for boned bodice garments and using knit and bias cut fabrics.

Prerequisite: FDM 10033 and FDM 10034; and FDM 15055; and fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20155 MACHINE KNITTING 3 Credit Hours

Basic machine knitting techniques, including structure and shaping on industrial handflat knitting machine. Development and analysis of knitted textiles.

Prerequisite: None.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20156 2-D FASHION DESIGN PRACTICE 3 Credit Hours

Development of two-dimensional patterns for three-dimensional figures/shapes using digital toolsets. Execution of virtual and traditional construction of two-dimensional pattern designs. Emphasis will be placed on the techniques used to develop apparel patterns for both knit and woven textiles and how to fit garments to the body. Students will develop garments for a variety of target markets and a variety of body types. Minimizing waste in pattern layouts and yardage allocation will be addressed.

Prerequisite: FDM 10033 and FDM 10034 and FDM 15055; and fashion design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20157 3-D FASHION DESIGN PRACTICE 3 Credit Hours

Study of draping as a technique for developing two-dimensional patterns for three-dimensional shapes. The techniques used for working with woven fabric and knit fabric are addressed. Students are required to drape on dress forms representing a variety of body shapes. Minimizing waste through shape and form is addressed.

Prerequisite: FDM 10033 and FDM 10034 and FDM 15055 and FDM 20156; and Fashion Design major.

Schedule Type: Studio

Contact Hours: 6 other

Grade Mode: Standard Letter

FDM 20263 FASHION RETAIL INDUSTRY 3 Credit Hours

Study of retail organizations and structures within the fashion industry. Analysis of supervision organization and operations management of fashion retail institutions.

Prerequisite: FDM 10010; and fashion merchandising major.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 25011 FASHION BRANDING 3 Credit Hours

An overview of branding in the fashion industry. Analysis of strategies for creating (brand awareness), maintaining (brand management) and enhancing the strength (brand asset management) of fashion brands. Class members work individual as part of a group.

Prerequisite: FDM 10010; and fashion merchandising major.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 30013 FASHION AND POP CULTURE 3 Credit Hours

An examination of the relationship between different types of design and popular culture in America and Europe in the 20th and 21st centuries.

Prerequisite: ARTH 22006 or ARTH 22007 or HIST 11050 or HIST 11051.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 30050 FASHION TECHNOLOGY: COMPUTER INTEGRATED TEXTILE DESIGN 3 Credit Hours

The use of Computer Integrated Design tools to produce textile prints, wovens and knits for professional presentation scenarios.

Prerequisite: FDM 10053 and FDM 10054.

Schedule Type: Studio

Contact Hours: 5 other

Grade Mode: Standard Letter

FDM 30083 PROFESSIONAL SEMINAR 3 Credit Hours

Professional development strategies for fashion and related careers. Emphasis is on verbal and written communication skills.

Prerequisite: FDM 20030 and fashion merchandising major; and junior or senior standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 30124 TECHNICAL DESIGN IN THE FASHION INDUSTRY 3 Credit Hours

Students learn seamstitch classifications, costing, sourcing and lab testing quality assurance. Assembly-line and modular manufacturing are discussed.

FDM 60092 FASHION INDUSTRY PRACTICUM 3 Credit Hours

(Repeatable for credit) Practicum is an off-campus progressive process involving a number of specific guided experiences with a fashion agency or company. This course is intended to bridge the gap between the theoretical and abstract learning gained in the classroom with real-world concrete applications. Students are required to present a pre-practicum analytical research presentation, as well as an analysis of experiences at the culmination.

Prerequisite: Graduate standing; and special approval.

Pre/corequisite: FDM 60005 and FDM 60015.

Schedule Type: Practical Experience

Contact Hours: 9 other

Grade Mode: Satisfactory/Unsatisfactory

FDM 60093 WORKSHOPS ON CURRENT TOPICS IN THE FASHION INDUSTRY 1-3 Credit Hours

(Course is repeatable) Students will be encouraged to take advantage of courses that focus on professional renewal or mastery and application of knowledge and skills that address a range of problems or issues related to fashion industry practice. The workshops will be offered at our NYC, Florence, and Kent campuses.

Prerequisite: Graduate standing.

Schedule Type: Workshop

Contact Hours: 1-3 other

Grade Mode: Satisfactory/Unsatisfactory

FDM 60098 RESEARCH PROJECT IN FASHION INDUSTRY 3 Credit Hours

(Repeatable for credit) Research experience with an individual faculty member designed to strengthen student's ability to synthesize different phases and methods of research. Students work closely with faculty to determine the specific nature, scope and design of the research experience. Requires submission of and approval of project proposal prior to registration.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Research

Contact Hours: 3 other

Grade Mode: Standard Letter

FDM 60099 FASHION INDUSTRY PRACTICUM CAPSTONE 3 Credit Hours

This course combines research with pragmatic industry-facing solutions reliant on first-hand information gathering, analysis and assessment. As a capstone experience, M.F.I.S. students base their experience from the practicum with a fashion-related industry partner by creating an in-depth case study, abbreviated business plan or industry presentation resulting from the information and research gathered and reflecting student interest.

Prerequisite: FDM 60092; and graduate standing; and special approval.

Pre/corequisite: FDM 60005 and FDM 60015 and FDM 60025.

Schedule Type: Project or Capstone

Contact Hours: 3 other

Grade Mode: Standard Letter

FDM 60100 ADVANCED FASHION INDUSTRY PRACTICE 3 Credit Hours

This capstone course is centered in research as both a practice and a process. Students will pursue case studies in which they research, interpret and aim to advance fashion industry practices. Informed by industry observation and experience, utilizing and engaging with a variety of research methods, students will document findings, analyze, reflect, and present their own pragmatic implications drawn from and applied to the fashion industry. The aim of the course is to challenge students to advance their research and analytical skills, to cross disciplinary boundaries, and to develop new and original perspectives of industry research through practice.

Prerequisite: FDM 60031; and enrolled in the master of fashion industry studies (MFIS) degree; and graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60162 ADVANCED FASHION INDUSTRY DESIGN AND PRODUCTION 3 Credit Hours

This process-oriented course focuses on studio investigation of complex formal and spatial constructs in apparel design and production. The course will discuss and examine a variety of current approaches including those that are interdisciplinary and utilize design thinking in a fashion industry context. Students will use methods and tools for fashion research to explore new techniques in the development of design concepts that challenge current practice. Students are encouraged to think critically about design problems and processes while seeking discoveries through experimentation, resulting in a body of work examined by critique and exhibition. Examinable material includes written and visual documentation, which is then retained as the archival record of the research.

Prerequisite: Graduate standing; and special approval from the graduate studies coordinator.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 60199 THESIS I 2-6 Credit Hours

(Repeatable for credit) Thesis students must register for a maximum of 6 credits, 2 to 6 credits in a single semester, distributed over several semesters if desired.

Prerequisite: Graduate standing; and special approval from graduate supervisory committee.

Schedule Type: Masters Thesis

Contact Hours: 2-6 other

Grade Mode: Satisfactory/Unsatisfactory-IP

FDM 60299 THESIS II 2 Credit Hours

(Course is repeatable) Continuing registration required of master's students who have completed the initial 6 hours of thesis and continuing until all degree requirements are met.

Prerequisite: FDM 60199; and graduate standing; and special approval from the graduate supervisory committee.

Schedule Type: Masters Thesis

Contact Hours: 2 other

Grade Mode: Satisfactory/Unsatisfactory-IP

FDM 63011 VISUAL PRESENTATION IN THE FASHION INDUSTRY 3 Credit Hours

This course explores the multiple methods of visual presentation practiced in the fashion industry through applications of digital and physical concepts. Students will examine and discuss current fashion industry approaches utilized by creative talent, merchants, and other stakeholders. Focus will be on developing visual communicators who can convey unique brand stories and complex ideas through use of various forms of media. Students will learn to establish branding and visualization of their own work and research to help promote their professional identity.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65010 SUSTAINABLE CONCEPTS AND PRACTICES IN THE FASHION INDUSTRY 3 Credit Hours

This course will discuss and examine the most current approaches to sustainability in fashion. The different facets, benefits or shortcomings of each approach will be analyzed with an eye to researching viable solutions to future practices in manufacturing, material selection, design and business. Course embeds practice-based approaches to sustainable development.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65045 FASHION INDUSTRY MERCHANDISE MANAGEMENT 3 Credit Hours

This course will discuss the overview of the merchandising process - planning, developing, and presenting merchandise lines in the fashion industry. Core merchandising concepts and principles taught in this class include merchandise performance measures, pricing mechanics, wholesale and retail pricing strategy, merchandise budgets and assortment, vendor relationships and negotiations, and merchandise replenishment management. This course will examine such concepts as applied to both manufacturers, wholesalers, and retailers of fashion merchandise.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65055 ENTREPRENEURIAL LEADERSHIP AND SUSTAINABILITY IN THE FASHION INDUSTRY 3 Credit Hours

This course will discuss the importance of the entrepreneurial leadership and innovation as competitive advantage in the fashion industry. Students will examine the conscious leadership concepts and principles from both small/medium enterprises and large corporations of the fashion industry. By applying conscious capitalism approach, the course will introduce more progressive and purposeful ways to advance sustainable practices to benefit all five stakeholders in the fashion industry - society, partners, investors, customers, and employees.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65065 SUPPLY CHAIN MANAGEMENT IN THE FASHION INDUSTRY 3 Credit Hours

This course examines supply chain within the fashion industry and basic theories and principles that guide decision-making in the supply chain. Students will learn how supply chain management can be used to gain a competitive advantage in the fashion industry, comprehend buyer-supplier relationships, supply chain transparency, product recalls, sourcing issues, and other challenges in the global fashion supply chain. Attention will be given to understanding sustainable practices and future developments within the global fashion supply chain.

Prerequisite: Graduate standing.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65095 FASHION INDUSTRY SPECIAL TOPICS 1-3 Credit Hours

(Repeatable for a maximum of 6 credit hours) Variable content relevant to the field of fashion.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

FDM 65096 INDIVIDUAL INVESTIGATION IN THE FASHION INDUSTRY 1-3 Credit Hours

(Repeatable for credit) Individual investigation of topic above the level available through coursework. Requires submission of and approval of project proposal prior to registration.

Prerequisite: Graduate standing.

Schedule Type: Individual Investigation

Contact Hours: 3-9 other

Grade Mode: Standard Letter

FDM 65100 SUSTAINABLE SUPPLY CHAIN AND LIFE CYCLE ASSESSMENT IN THE FASHION INDUSTRY 3 Credit Hours

This course examines the traditional and sustainable supply chain within the fashion industry. There is a focus on basic theories and principles that guide decision making, including current challenges in converting from traditional practices to environmentally and socially protective supply chains. Students learn how sustainably focused supply chain management can be used to gain a competitive advantage in the fashion industry through supply chain transparency and LCA metric development.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65110 CIRCULAR ECONOMY STRATEGIES IN THE FASHION INDUSTRY 3 Credit Hours

In discussions of sustainability, a circular economy is considered the ultimate goal post by which we must measure success. To fully realize a sustainable future, we must design out waste and pollution and fundamentally rethink the fashion system which currently relies on a take/make/waste construct. This class examines what a circular economy might look like in the fashion industry, what things need to happen to get there and what initial steps look like in that direction.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65120 FIBER AND TEXTILE INNOVATION 3 Credit Hours

This course introduces current and emerging fiber and textile innovations of relevance to the fashion industry and provides students with an opportunity to explore the expanding potential of textiles as an adaptive and responsive interface between humans and their environment. Examples of applications are reviewed from four perspectives: (1) fiber and textile innovation with a focus on material production and selection implications; (2) manufacturing and processing basics; (3) implications for the life cycle and sustainability of the resulting textile and apparel products; and (4) human body-functional textile interactions and potential health implications.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

FDM 65220 INNOVATIONS IN THE FASHION RETAIL INDUSTRY 3 Credit Hours

This course encompasses how various innovations create the optimal customer experience to gain competitive advantages in the 21st century retail environment. Using the perspective of omnichannel retailing, which is a fully integrated approach to commerce providing shoppers a unified experience across all channels or touchpoints, students explore the various innovations relevant to the fashion retail industry. Through case study analysis and final project reports, students present pragmatic solutions to retailers of their choice.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Seminar

Contact Hours: 3 other

Grade Mode: Standard Letter

FDM 65300 DIGITAL KNIT DESIGN 3 Credit Hours

This course focuses on digital knitting as utilized by a designer. The students use available software for 3D development of products and stitch design. The course focuses on stitch understanding and development, as well as communication of designs both stitch and shape using 3D virtualization software and stitch development software. This course is geared toward designers with industry studio practice and is at an advanced level.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Laboratory

Contact Hours: 6 lab

Grade Mode: Standard Letter

FDM 65310 DIGITAL KNIT PROGRAMMING I 3 Credit Hours

This course focuses on digital knitting and programming of industrial knitting machines. This is one of four digital knit courses that enables students to learn proprietary software, programming and technical knit skills. The course goes through the foundational understanding of stitches and how to program them on industrial knitting machines. The course also focuses on hands-on learning on the industrial machine, including set up of the machine and machine maintenance. This course is geared toward designers with fashion industry studio practice and is at an advanced level.

Prerequisite: Graduate standing; and special approval.

Schedule Type: Laboratory

Contact Hours: 6 lab

Grade Mode: Standard Letter

FDM 65320 DIGITAL KNIT PROGRAMMING II 3 Credit Hours

This course focuses on digital knitting and advanced programming of industrial knitting machines. This is the second of two programming courses and one of the four digital knit courses enabling students to continue to learn complex proprietary software, programming and technical knit skills. The course goes through the understanding of more complex stitch structures, as well as how to program on the machine. The course includes techniques for shaping structures to create three dimensionally knitted textile products. This course is geared toward designers with industry studio practice and is at an advanced level.

Prerequisite: FDM 65310; and graduate standing; and special approval.

Schedule Type: Laboratory

Contact Hours: 6 lab

Grade Mode: Standard Letter

FDM 65330 DIGITAL KNIT APPLICATIONS 3 Credit Hours

This course focuses on the application of skills in digital knitting to develop an advanced final product line. This is one of the four digital knit courses that enables students to learn proprietary software, programming and technical knit skills. Depending on the student's focus of either technical or design, the product line can be developed in 3D virtual presentation or actual prototypes. Regardless of focus, it is expected that the student has some representation of both virtual and actual in the final presentation of the product. Along with the product line, presentation is a use case. This course is geared toward designers with industry studio practice and is at an advanced level.

Prerequisite: FDM 65300 or FDM 65310; and graduate standing; and special approval.

Schedule Type: Laboratory

Contact Hours: 6 lab

Grade Mode: Standard Letter

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students: Admission to the Fashion Design major is selective. Prospective applicants must have a minimum 3.000 overall grade point average (on a 4.000 scale).

Transfer Students: Admission to the Fashion Design major requires a minimum 2.750 overall GPA based on minimum 24 credit hours of college-level coursework at an accredited institution. Those students meeting this GPA requirement but with fewer than 24 credit hours will be evaluated as new freshmen.

Students who do not meet the criteria for admission to the Fashion Design major may be eligible for admission to the Pre-Fashion Design and Merchandising non-degree major. In addition, students who do not meet the admission criteria may initiate the process for declaring the B.A. degree in Fashion Design after completing minimum 12 credit hours of non-developmental coursework at Kent State University and earning a minimum 2.750 overall GPA.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions to waive) by earning a minimum 71 TOEFL iBT score, minimum 6.0 IELTS score, minimum 47 PTE score or minimum 100 DET score, or by completing the ELS level 112 Intensive English Program. For more information on international admission visit the admissions website for international students.

Program Learning Outcomes

Graduates of this program will be able to:

1. Understand the fashion industry, fashion markets, fashion products and services.
2. Demonstrate understanding of integrating conceptual, technical and production design knowledge and skills, leading to a synthesis of the design process from concept to production.
3. Apply knowledge and skills in the use of basic tools, techniques and processes sufficient to produce work from draft or specifications to finished product, including skills in portfolio preparation.
4. Articulate conceptual and critical thinking applicable to the fashion industry.
5. Employ research processes and practices employed in the fashion industry.
6. Articulate professionalism and communication skills in the appropriate creative industry.

Full Description

The Bachelor of Arts degree in Fashion Design integrates conceptual, technical and production design knowledge and skills, leading to a synthesis of the design process from concept to production. These processes include color, design and trend research; technical sketching and rendered illustration; pattern-making and garment construction;

analysis of appropriate fit and fabric selection; best practices in sustainable methods and knowledge and the ability to communicate specifications for production using industry standards appropriate to specific markets.

The B.A. degree in Fashion Design promotes an emphasis on the diversity of studio practice and liberal art experiences with the most up to date technology applications. Students have the option to select coursework offerings to gain expertise in a variety of specialties that connect directly to fashion design, such as wearable technology applications, sustainable development and design, garment knitting, illustration and/or accessory design.

The degree program prepares students for professional careers by developing technical competency, creative/independent problem solving and conceptual understanding necessary for the challenges of a career in the creative industries. Students develop portfolios for presentation at industry interviews and are prepared to be strongly competitive for any entry-level design position in the industry. In addition, students participate in a study abroad/away experience, which includes opportunities to study for a semester in New York City and Florence, Italy, as well as through collaborative partnership programs with the Paris American Academy, Hong Kong Polytechnic University and Regent's University in London.

When enrolled in junior-level fashion design studio courses, fashion design students may complete the application process to declare the Bachelor of Fine Arts degree or chose to continue pursuing the B.A. degree. The decision as to which degree is best for a particular student depends on the student's educational and career goals, academic standing, performance in studio coursework and an approved "B.F.A. Proposal."

Program Learning Outcomes

Graduates of this program will be able to:

1. Understand the fashion industry, fashion markets, fashion products and services.
2. Demonstrate understanding of integrating conceptual, technical and production design knowledge and skills, leading to a synthesis of the design process from concept to production.
3. Apply knowledge and skills in the use of basic tools, techniques and processes sufficient to produce work from draft or specifications to finished product, including skills in portfolio preparation.

4. Articulate conceptual and critical thinking applicable to the fashion industry.
5. Employ research processes and practices employed in the fashion industry.
6. Articulate professionalism and communication skills in the appropriate creative industry.

Full Description

The Bachelor of Fine Arts degree in Fashion Design integrates conceptual, technical and production design knowledge and skills, leading to a synthesis of the design process from concept to production. These processes include color, design and trend research; technical sketching and rendered illustration; pattern-making and garment construction; analysis of appropriate fit and fabric selection; best practices in sustainable methods and knowledge and the ability to communicate specifications for production using industry standards appropriate to specific markets.

The degree program prepares students for professional careers by developing technical competency, creative/independent problem solving and conceptual understanding necessary for the challenges of a career in the creative industries. Students develop portfolios for presentation at industry interviews and are prepared to be strongly competitive for any entry-level design position in the industry. In addition, students participate in a study abroad/away experience, which includes opportunities to study for a semester in New York City and Florence, Italy, as well as through collaborative partnership programs with the Paris American Academy, Hong Kong Polytechnic University and Regent's University in London.

The B.F.A. degree in Fashion Design engages students in a focused-study thesis project (collection development) as a capstone experience that results in submitting their collection for formal review by faculty and industry designer-critics, followed by public presentation in a fashion venue and completion of a thesis "magazine" (print collateral).

Program Learning Outcomes

Graduates of this program will be able to:

1. Understand the fashion industry, fashion markets, fashion products and services.
2. Demonstrate knowledge and skills of the fashion industry through reflective experiential learning.
3. Apply integration of the key knowledge of various segments of industry from fiber to finished product, products/services, consumer markets and technology in relation to the fashion industry.
4. Articulate conceptual and critical thinking applicable to the fashion industry.
5. Employ research processes and practices employed in the fashion industry.
6. Demonstrate their professionalism and communication skills required in the fashion industry through visual, oral and written forms.

Full Description

The Bachelor of Science degree in Fashion Merchandising allows for students to acquire a thorough background in the business aspects of the fashion industry, whereby they develop competencies in fashion theory, retail operations, management and buying, fashion forecasting and promotion, the merchandising for apparel manufacturing and the development and marketing of fashion goods.

Students participate in a study abroad/away experience, which includes opportunities to study for a semester in New York City; Florence, Italy; and Paris, France, as well as through collaborative partnership programs with universities in Hong Kong, South Korea and London.

In addition, students in the Fashion Merchandising major have the opportunity to enroll in the combined degree program with the Master of Business Administration degree. The combined B.S./M.B.A. degree program allows high-achieving undergraduate students early admission into graduate school. Students enrolled in the combined degree program complete a maximum of 9 credit hours of graduate-level coursework for the M.B.A. degree during their senior year. This allows a student to accelerate their completion of the M.B.A degree after being awarded their undergraduate degree. Students complete a minimum of 150 credit hours (120 representing the B.S. degree in Fashion Merchandising and at least an additional 30 representing the M.B.A. degree). To be eligible for the combined degree program, students must first complete a minimum of 90 credit hours in the Fashion Merchandising major with at least a 3.300 overall grade point average. Upon achieving these requirements, students submit an admissions application to the M.B.A. program by the set application deadline. Students need to satisfy all requirements for the graduate admissions application.

Students in the Fashion Merchandising major can also pursue the B.S. Fashion Merchandising to Juris Doctor (JD) 3+3 degree pathway through Kent State University's partnership with three Northeast Ohio law schools (Case Western Reserve University School of Law, Cleveland State University College of Law and the University of Akron School of Law). Interested students follow a three-year set degree plan and work closely with Kent State University's Pre-Law Center. During the first three years, students complete almost all their general education and major requirements. During year four, students begin their first year of law school courses. Upon successful completion of the first year of law school courses, these credit hours are transferred back to Kent State

University to complete the bachelor's degree. After graduating, students complete their last two years of law school to earn their Juris Doctor.

7. Display performance and interpretation skills in music.

Full Description

The Master of Arts degree in Ethnomusicology is designed to offer students a solid foundation in regional studies of music style, performance practice, history and cultural associations in order to prepare students for continued graduate studies at the doctoral level and/or public sector careers in world music. The program integrates theoretical perspectives relevant to the discipline with these practical aims, so that students can communicate effectively with persons within and outside the field of ethnomusicology.

While a balanced global coverage is emphasized, Kent State music faculty focus on studies in Central Africa, mainland Southeast Asia, East Asia, the Caribbean, North and South America and the Middle East, as well as popular music studies. Theoretical concerns include sociocultural identity, semiotics, gender studies, politics and power, ritual studies, globalization and hybridity, as well as studies in inter-related arts (e.g., dance and theatre).

Minimum Total Credit Hours:		27

¹ A minimum C grade must be earned to fulfill the writing-intensive requirement.

² Bachelor of Arts students are restricted to taking 2-credit hour applied music sections, which include a 60-minute group practice and 60-minute private lesson. Students in the Jazz Studies concentration

must take one semester and 2 credit hours of applied music and two semesters and 4 credit hours of MUS 36011.

³ MUS 36011 (senior recital) may be used to satisfy the Experiential Learning Requirement (ELR), with approval.

⁴ Major ensemble: Students in the Jazz Studies concentration take one semester of major ensemble, four semesters of MUS 45231 and four semesters of MUS 45312. Voice students in the Jazz Studies concentration replace MUS 45231 with MUS 45313.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
2.250	2.000

- Minimum C grade in all music courses
- Completion of a senior recital or MUS 48598
- Attendance at minimum 80 concerts or recitals for students who begin the program as first-semester freshmen (students who transferred from a non-music program or university must attend an average of 10 music concerts or recitals for semesters of full-time enrollment)
- MUS 11110, MUS 11111, MUS 16914 and MUS 16915 will not count as credit for graduation for this program

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate knowledge of music history and theory.
2. Demonstrate high-level skills in recitals, ensembles or music research.

Full Description

The Bachelor of Arts degree in Music gives music majors an opportunity to study music and liberal arts with an optional minor, available in most academic areas of the university, or as a dual degree program with a major in another field. Although not as music intensive as the Bachelor of Music (B.M.) degree, the B.A. degree includes study on a main instrument and ensemble participation throughout the program.

The Music major includes the following optional concentrations:

- The **Contemporary Popular Music** concentration provides students the opportunity to study contemporary instruments such as electric guitar, electric bass and voice, as well as participate in a variety of styles, including rock, pop, Motown and other popular styles.
- The **Jazz Studies** concentration provides students the opportunity to study jazz improvisation, arranging and composing.

Students not selecting a concentration will continue with applied music and major ensemble electives, in addition to a music history course and research or senior recital as the culminating experience.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate knowledge of music history and theory.
2. Demonstrate beginning professional skills in recitals.

Full Description

The Bachelor of Music degree in Music is a professional degree. The primary emphasis is on the development of the skills, concepts and sensitivity essential for those wishing to pursue music as a profession.

The Music major comprises the following concentrations:

- The **Composition** concentration provides preparation for graduate study in the field, a credential for private instruction and the ability to compose and use technology in a variety of musical styles.
- The **Instrumental Performance** concentration provides preparation for graduate study in the field; a credential for private instruction; and the ability to perform as a soloist, in chamber music and in large ensembles. This program is available on the following instruments: violin, viola, violoncello, double bass, flute, oboe, clarinet, bassoon, saxophone, trumpet, horn, trombone, euphonium, tuba and percussion.
- The **Piano Performance** concentration provides preparation for graduate study in the field; a credential for private instruction; and the ability to perform as a soloist, as an accompanist, in chamber music and in large ensembles.
- The **Voice Performance** concentration provides preparation for graduate study in the field; a credential for private instruction; and the ability to perform as a soloist, in opera, in chamber music and in large ensembles.

Graduates of this program will be able to:

1. Compile a body of completed compositions.
2. Demonstrate and apply compositional techniques for creation of new works, including musical style and structure.
3. Analyze music from a wide range of styles and style periods and communicate results in written and oral formats.
4. Recognize, identify and analyze representative literature from different historical periods, countries and composers.

5. Communicate knowledge of composition, theory and other aspects of music as would be done in classroom and private teaching.

Full Description

The Master of Arts degree in Music Composition is designed to advance the music composition creative skills of advanced students and prepare them for admission to doctoral study. The program emphasizes mastery of composition of large-scale works for media, including orchestra, choir, band and/or chamber music ensembles.

Based on a solid undergraduate music degree, the M.A. degree further develops abilities in music theory, including analytical, aural, written, keyboard and pedagogical skills. The program further develops breadth and depth in the area of music history and literature.

Progression Requirements

Students must meet all professional requirements for admission to advanced study and to enroll in upper-division coursework.

- Minimum 2.750 major GPA and 2.500 overall GPA
- Students are required to pass the Music Education Professional Evaluation (MEPE), and must pass all sections in order to continue in the music education program with MUS 34211, MUS 34212, MUS 44211 or MUS 44212. Information regarding the MEPE is distributed by the Coordinator of Music Education.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
2.750	2.500

- Completion of the Major Field Test (MFT) in music history and music theory during senior year (specific score level achievement is not required)
- Minimum C grade required in all music (MUS) courses
- Attendance at minimum eight concerts or recitals during semesters of Applied Music registration.
- Completion of one-half senior recital, which may not be performed during the student-teaching period, and registration of applied music courses (46000 level) during a degree recital semester
- MUS 11110, MUS 11111, MUS 16914 and MUS 16915 will not count as credit for graduation in this program.

Licensure Information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Program Learning Outcomes

Graduates of this program will be able to:

1. Successfully meet all requirements for state licensure.

Full Description

The Bachelor of Music degree in Music Education prepares students for Ohio licensure to teach music in grades K-12 in choral general and instrumental music. The program includes studies in jazz, folk, musical theatre, world music and music technology, while providing a strong grounding in Western art music history, theory and performance.

The Music Education major comprises the following concentrations:

- The **Choral General** concentration is for guitar, voice and piano principals.
- The **Instrumental** concentration is for students with an instrumental background. Piano and guitar principals with significant instrumental background may elect this concentration with the approval of the music education coordinator.

Professional Licensure Disclosure

This program is designed to prepare students to sit for applicable licensure or certification in Ohio. If you plan to pursue licensure or certification in a state other than Ohio, please review state educational requirements for licensure or certification and contact information for state licensing boards at Kent State's website for professional licensure disclosure.

Minimum Total Credit Hours:		31

¹ With the capstone project, students complete a 12-week, individual research investigation comparable to a master's thesis. Under the supervision of a capstone advisor, students synthesize knowledge through the development of a curricular project applicable to the student's specific area of teaching. A prescribed description outlines requirements, goals, objectives, procedures and assessment. Activities include student reading-research-writing, preparation of a project outline and drafts, regular interaction with a research mentor and evaluation of conclusions for the final submission. The project's goal is to support students to critically analyze and improve their own music teaching and learning skills in classroom settings. The project is reviewed and evaluated by a graduate committee of music education faculty.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
-	3.000

- No more than one-half of a graduate student's coursework may be taken in 50000-level courses.
- Grades below C are not counted toward completion of requirements for the degree.

Program Learning Outcomes

Graduates of this program will be able to:

1. Develop and apply knowledge of foundational principles of music education (history, philosophy, sociology, psychology); research methods and practices; music technology; methods of music education in instrumental, choral and general music contexts; western music theory and history; and world music.
2. Exhibit scholarly writing skills focusing on comprehensive knowledge of research methodology.
3. Demonstrate reading, research, writing and critical-thinking skills related to contemporary music education contexts.

Culminating Requirement

MUS 88199	DISSERTATION I ²	30
-----------	-----------------------------	----

Minimum Total Credit Hours: 75

¹ Students may be required to take courses in music theory, which will be applied toward the Musical Literacy requirement of the degree. Requirements will be determined based on the results of a diagnostic exam as stated in the Music Graduate Handbook. Remaining Musical Literacy credit hours are fulfilled by taking courses in music theory, music history, ethnomusicology, composition, conducting, music performance or other related topics of student interest as approved by the academic advisor.

² Upon successful completion of the candidacy examination, students take a dissertation topic from the proposal stage through approval, writing, submission and an oral defense process with a faculty committee comprised of the music education advisor, one additional music education faculty member, one representative from music education or education, a member from another music discipline area or education and an appointed graduate faculty representative. Each doctoral candidate, upon admission to candidacy, must register for MUS 88199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for Dissertation I, and thereafter MUS 88299, each semester, until all requirements for the degree have been met.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
-	3.000

Residency Requirements

Student must complete a residency requirement of minimum 9 credit hours each year until qualifying exams.

Candidacy Requirements

For the Ph.D. a comprehensive, qualifying, candidacy examination is taken when the student has substantially completed his/her coursework and has received the consent of the advisor committee to attempt the examination. The examination includes an extensive written section consisting of proctored and non-proctored questions, and an oral section taken before a faculty committee. Material for both written and oral sections is drawn from the coursework taken during the degree program, current professional research literature, and current topics in music education. Students who fail the candidacy examination two times will be dismissed from the doctoral program.

Program Learning Outcomes

Graduates of the program will be able to:

1. Demonstrate knowledge of music education research and practice relative to primary, secondary, undergraduate, masters and doctoral levels through writing and oral communication.
2. Engage in research activities appropriate to doctoral and professional level practice in music education.

3. Demonstrate active involvement at local, national and global levels through diverse professional activities, including but not limited to scholarly publications and presentations, collaborative research and engagement with other scholars in order to share knowledge in music and related fields.
4. Communicate a comprehensive and sophisticated knowledge of music education through the lens of history, philosophy, psychology, sociology, research methodologies, advanced pedagogy, learning theories and methods of curricular structure.
5. Demonstrate reading, research, writing and critical-thinking skills related to contemporary music education contexts.

Full Description

The Ph.D. degree in Music Education integrates teaching, theory and research in inquiry about music teaching and learning. Through a collaboration with Kent State's College of Education, Health and Human Services, the degree program allows for emerging scholars to engage in coursework and research in areas connecting musical and educational pedagogies. Students pursuing the Ph.D. degree are interested in preparing music teacher educators at institutions of higher learning; engaging in arts education activities; and exploring emerging practices in curriculum, artistic instruction and educational thought.

¹ A minimum C grade must be earned to fulfill the writing-intensive requirement.

² Major ensemble (eight separate semesters): All music technology majors must enroll in an ensemble appropriate to their major performance area. Two credit hours must be taken in major ensemble.

Major ensemble credit can be earned for MUS 25011 and MUS 25225, as approved by faculty. Students may choose to complete the remaining 6 credit hours with MUS 35213, or 4 credit hours with MUS 35213 or major ensemble and 2 credit hours with ensemble electives (such as MUS 25311 and MUS 45231 for students whose instrument is guitar) as approved by faculty.

³ Applied studio musicianship (four semesters and 8 credit hours): Students must meet the Sophomore Proficiency requirement after two semesters and the Senior Proficiency requirement for graduation.

⁴ Students register for MUS 36913 for all other popular music instruments not listed.

⁵ Students who have completed the Applied Studio Musicianship and Applied Music requirement on piano may replace requirement with Music (MUS) electives.

Program Learning Outcomes

Graduates of this program will be able to:

1. Function as competent and versatile professional studio musicians who perform in diverse commercial music venues.
2. Compose and arrange music.
3. Create appropriate sound for visual media.
4. Create music productions of professional quality.
5. Produce professional audio recordings, both live and in studio, from start to finish.

Full Description

The Bachelor of Science degree in Music Technology prepares students as musicians within a broad field of constantly changing technology. Students study in courses that develop expertise in music computer technology for application in the recording industry, audio-engineering and music production.

The development of music technology has had an enormous impact on the music industry. There are many career opportunities for talented musicians in music technology. Skilled musicians can apply formal training to recording careers, studio performance, arranging or producing and live performances. Opportunities are also available in non-traditional, contemporary popular music venues, the movie industry, television, multi-

media events and music for advertising, as well as traditional performing arts venues. The growth of music technology has made knowledge and experience in this area a necessity for all students preparing for a career in any area of the music industry. To compete effectively in the contemporary music world, one must possess a strong traditional music background, plus the technical expertise required to make the most of a rapidly changing and developing technology.

The Music Technology major comprises the following concentrations:

- The **Audio Recording** concentration provides students the opportunity to learn advanced audio recording techniques.
- The **Music Production** concentration provides students the opportunity to learn how to use technology to realize creative work such as original music, arranging and production.
- The **Performance** concentration provides students who want to perform the necessary technological tools to succeed in the modern music industry.

Music Technology - Minor

College of the Arts
School of Music
www.kent.edu/music

About This Program

The Music Technology minor is designed to give students a strong foundation in the rapidly developing field of music production and audio recording technologies. Coupled with courses in applied music, the minor provides students with the necessary tools to be successful in studio equipment, techniques and standards.

- MUS 11110, MUS 11111, MUS 16914 and MUS 16915 will not count as credit for graduation for this minor.
- Minimum 6 credit hours in the minor must be upper-division coursework (30000 and 40000 level).
- Minimum 6 credit hours in the minor must be outside of the course requirements for any major or other minor the student is pursuing.
- Minimum 50 percent of the total credit hours for the minor must be taken at Kent State (in residence).

Program Learning Outcomes

Graduates of this program will be able to:

1. Be proficient in using music production software, digital audio workstations (DAWs) and other relevant music technology tools.
2. Have the ability to critically listen to and analyze various genres of music, identifying production techniques and sonic characteristics.

Music Theory - M.A.

College of the Arts
School of Music
www.kent.edu/music

About This Program

The Master of Arts degree in Music Theory is designed to enhance music theory abilities of advanced students and prepare them for admission to doctoral study. Based on a solid undergraduate music degree, the master's degree further develops abilities in music theory, including analytical, aural, written, keyboard and pedagogical skills. The program further develops breadth and depth in the area of music history and literature.

Music Theory - Composition - Ph.D.

College of the Arts
School of Music
www.kent.edu/music

About This Program

The Ph.D. degree in Music Theory–Composition prepares composers, research scholars and college/university teachers in the areas of music theory and composition. This degree program is based on the premise that original composition of high quality requires a strong background in theory, and that significant scholarship in theory requires experience in original composition.

Program Learning Outcomes

Graduates of this program will be able to:

1. Perform a wide range of dance works with an intentional focus on the inclusion of Western and non-Western dance forms.
2. Articulate and communicate an embodied understanding of diverse dance forms; their histories, including the role of oppression; and their relationship and representation in the contemporary era of dance.
3. Articulate and demonstrate dance theory, aesthetics, pedagogy and choreography.
4. Create, revise, reflect and present choreography.

Full Description

The Bachelor of Fine Arts degree in Dance develops technically sound, intellectually diverse and creatively expressive dance artists who can contribute significantly to the art form and society. The curriculum provides students with opportunities for strong and varied technical preparation in contemporary dance forms, including modern, ballet, jazz and improvisation. Opportunities for performance and choreography, along with dance theory courses, complete a degree focused on the artist/scholar.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

Graduates of this program will be able to:

1. Perform a wide range of dance works within Western and non-Western dance forms.
2. Articulate and communicate an embodied understanding of diverse dance forms; their histories, including the role of oppression; and their relationship and representation in the contemporary era of dance.
3. Articulate and demonstrate dance theory, aesthetics, pedagogy and choreography.
4. Create, revise, reflect and present choreography.
5. Articulate a relationship between their dance studies and a secondary concentration, minor or double major, as applicable.

Full Description

The Bachelor of Arts degree in Dance Studies allows students who have previous dance experience and a strong interest in another subject area, within or outside of the arts, the opportunity to combine the two into one plan of study. The curriculum provides students with a solid foundation in dance techniques and dance academics while allowing flexibility to incorporate another area or minor.

The B.A. degree program encourages exploration of areas that can be combined with dance to enhance opportunities for future employment.

Full Description

The Bachelor of Fine Arts degree in Musical Theatre prepares students for life as working artists in the musical theatre field. Practical training and creative experiences are coupled with an interdisciplinary liberal arts curriculum and a foundation in theatre history, analysis and criticism.

Students are able to study and perform in the school's theatrical and dance productions. Kent State's Center for the Performing Arts houses three theatres, performance and rehearsal spaces, costume shop and laboratories for costumes, drafting, lighting and scenery. In addition, the School of Theatre and Dance oversees the outdoor venue Porthouse Theatre.

Students in their senior year may participate in the annual New York City Musical Theatre Showcase, which enables students to perform for prospective casting directors, talent managers and theatrical and commercial agents.

Progression Requirements

Students must pass semester reviews and are expected to participate in at least one main-stage production each semester, which may be in addition to any production design assignment.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
-	3.000

- No more than one-half of a graduate student's coursework may be taken in 50000-level courses.
- Grades below C are not counted toward completion of requirements for the degree.

Culminating Requirement

The culminating project requirements include documentation, portfolio presentation and an exit interview. Documentation consists of a design analysis, process journal, relevant research and other supporting materials (e.g., photos, links to the candidate's website). The scope of work may include, but not necessarily be limited to, evidence of research, drawing and drafting, rendering and associated digital image, video or audio files, which will be presented at an exit interview. The topic of each M.F.A. candidate's culminating project will be proposed by the candidate and based on faculty feedback from yearly portfolio and academic assessments. The student will register for THEA 61310 for the student's project assignment. The process is then documented in a format appropriate for the project and presented to the faculty advisor.

Program Learning Outcomes

Graduates of this program will be able to:

1. Acquire creative and technical ability to develop the design of a production from concept to finished product.
2. Acquire advanced abilities in the unification of all design elements used in professional production.
3. Understand analytical or academically oriented theatre studies in areas related to and supportive of the work in the major field such as history, theory, dramatic literature and performance studies.
4. Understand information resources associated with theatrical design and production.
5. Produce full working drawings for mounted productions.
6. Analyze text, music and dance and the ways that historical, critical and theoretical content inform playwriting, acting, directing and design.

7. Communicate ideas clearly and effectively to the theatre community, production teams and the public.
8. Know the history of their area of specialization and have the ability to integrate that history into production design.
9. Know current technology, tools and methods in their area of specialization and have the ability to integrate technology into production design.
10. Know health and safety practices associated with theatre production.
11. Communicate and navigate effectively within the field of professional theatrical production design.
12. Demonstrate an understanding of professional ethics and practice.

Full Description

The Master of Fine Arts degree in Theatre Design and Technology is a terminal degree designed for those who are interested in achieving the artistry and skills necessary to qualify as practicing professionals in the entertainment industry and/or professional theatre educators. The program is a three-year course of study with a flexible curriculum for students to explore areas of special interest.

The Theatre Design and Technology major comprises the following concentrations:

- The **Costume Design and Technology** concentration prepares students for careers in the entertainment industry, professional theatre or theatre education. Students study both design and technology, including related areas such as dye techniques, costume crafts and wigs and makeup. Students also design costumes for main-stage departmental productions. The curriculum includes core classes in theatre history, dramatic theory and historical periods.
- The **Lighting Design** concentration balances instruction and experience in lighting design with instruction and experience in lighting technology. Studies include digital rendering, CAD, lighting technology and automated lighting. Students research and study all of aspects of theatrical lighting, including the design process from concept to execution, communication skills, integration of technology into design, documentation of the work and critical evaluation of the work.
- The **Scene Design** concentration balances focused classroom instruction with practical design and production experience. Students also study related artisan areas such as digital and traditional rendering techniques, 3D CAD, props, fabrication, scene painting and presentation techniques with particular emphasis on integrating contemporary digital techniques into the design process. The curriculum contains courses in construction theory, rigging, costume crafts and projection/media design.
- The **Technical Direction** concentration provides students with training and practical experiences in planning main stage productions for the School of Theatre and Dance. Studies focus on safety and all logistics of production assembly, including touring and dance. Technical directors have the opportunity work in four very different theatre spaces: black box, large proscenium, thrust and open outdoor.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special

talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate ability to conceptualize and realize a design aesthetic consistent with the overall artistic concepts of a production.
2. Demonstrate ability to understand and articulate basic elements and principles of design theory.
3. Demonstrate ability to understand and articulate basic elements and principles of composition related to line, shape, color, texture and sound.
4. Demonstrate an understanding of the aesthetic use of color.
5. Demonstrate understanding of aesthetic use of sound.
6. Demonstrate ability to communicate design ideas and realities to other personnel involved in the production, including directors, other designers, stage managers and actors.
7. Demonstrate ability to produce and communicate design ideas with freehand drawings.
8. Demonstrate ability to provide formalized, accurate production models and drawings by hand and/or through the use of current industry standard software programs.
9. Demonstrate fundamental knowledge of the total design process, including the progression of raw materials through multiple design "shops" and the roles that various craftspeople play in the creation of a finished product.
10. Acquire knowledge of federal, state and local health and safety codes, best practices and industry standards as they relate to theatrical venues and production elements.
11. Prepare and present a professional resume and a portfolio of design- and technology-related work that demonstrate one's abilities, strengths, processes and experiences.
12. Acquire experiences in the design/technology aspects of theatre in a variety of formal and informal settings.

Full Description

The Bachelor of Fine Arts degree in Theatre Design, Technology and Production fosters the artistic development of theatre designers, technicians and artisans. Students study both traditional theatre practices and new methods, materials and technologies. Students must demonstrate continued progress through annual portfolio reviews, course work and production responsibilities. In addition, students are expected to complete a significant production assignment each semester.

Students will be able to apply design and technology concepts for the school's theatrical and dance productions. Kent State's Center for the Performing Arts houses three theatres, performance and rehearsal space, a scene shop, a costume shop and laboratories for costumes, drafting, lighting and scenery. In addition, the School of Theatre and Dance oversees the outdoor venue Porthouse Theatre.

The B.F.A. degree program prepares students for M.F.A. degree study, as well as such occupations as scenic designer, costume designer, lighting designer, sound/projection designer, prop master, scenic artist, stage manager, production manager, wardrobe supervisor, technical director and stage technicians.

Accreditation

The B.A. degree in Theatre Studies is accredited by the National Association of Schools of Theatre (NAST).

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

University Requirements

All students in a bachelor's degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Flashes 101 (UC 10001)	1 credit hour
Course is not required for students with 30+ transfer credits (excluding College Credit Plus) or age 21+ at time of admission.	
Diversity Domestic/Global (DIVD/DIVG)	2 courses
Students must successfully complete one domestic and one global course, of which one must be from the Kent Core.	
Experiential Learning Requirement (ELR)	varies
Students must successfully complete one course or approved experience.	
Kent Core (see table below)	36-37 credit hours
Writing-Intensive Course (WIC)	1 course
Students must earn a minimum C grade in the course.	
Upper-Division Requirement	39 credit hours
Students must successfully complete 39 upper-division (numbered 30000 to 49999) credit hours to graduate.	
Total Credit Hour Requirement	120 credit hours

Kent Core Requirements

Kent Core Composition (KCOMP)	6
Kent Core Mathematics and Critical Reasoning (KMCR)	3
Kent Core Humanities and Fine Arts (KHUM/KFA) (min one course each)	9
Kent Core Social Sciences (KSS) (must be from two disciplines)	6
Kent Core Basic Sciences (KBS/KLAB) (must include one laboratory)	6-7

Program Learning Outcomes

Graduates of this program will be able to:

1. Articulate procedures and approaches to differentiate various theatrical styles and techniques.
2. Examine playwriting and production processes and the artistic and cultural forces that shape them.
3. Develop and apply intermediate to advanced skills in one or more theatre specializations in creation, performance or scholarship.
4. Recognize and evaluate a diverse selection of theatre repertory.
5. Describe the basic process involved in mounting a theatre production.
6. Synthesize research, performance and/or production.

Full Description

The Bachelor of Arts degree in Theatre Studies gives students an opportunity for study in all aspects of theatre and its relationship to other liberal arts studies. This program serves students who seek a wider range of possibilities to fulfill individual creative goals, whether as theatre artists, scholars, educators and/or contributors in related fields. Students receive thorough grounding in theatre history and theory and learn imaginative and critical thinking, the process of making theatre and leadership skills.

The Theatre Studies major comprises the following concentrations:

- Performance
- Production
- Theatre Management
- Theatre and Society

Graduate College

Mission of the College

The Graduate College is a hub for lifelong learning and a resource center wherein we define, create, and implement graduate education at Kent State.

We prepare graduate students for success at Kent State and beyond. Our student-centered commitment is demonstrated through ongoing advocacy and praxis to provide inclusive, innovative, and encouraging environments that foster a sense of belonging across identities and disciplines. From orientation through degree completion, we provide Kent State graduate students an infrastructure of support via programming, professional development, scholarships and awards.

We serve in an advisory role to partner with academic colleges and programs to expand opportunities and promote advancement in graduate education, teaching, research, scholarship, and creative activity. We provide oversight of graduate education, policies, and standards

advocating for graduate student success and well-being at a local, institutional and national level.

Graduate College (GCOL)

GCOL 60100 APPLICATIONS IN DESIGN THINKING AND INNOVATION 3 Credit Hours

(Slashed with GCOL 80100) This course blends analytical skills, intuition and creative thinking to develop practical solutions to real world problems. This will be a reflective lecture and small project-based course that addresses the programmatic, technical, business, social and human factors of design in a way that leads to innovation(s) in the development of integrated solutions. After being introduced to essential concepts, students, working in interdisciplinary teams, will learn how to engage with end users, effectively frame problems, identify potential solutions, build prototypes to test assumptions and learn what works (and doesn't).

Prerequisite: Graduate standing.

Schedule Type: Laboratory, Lecture, Combined Lecture and Lab

Contact Hours: 2 lecture, 2 lab

Grade Mode: Standard Letter

Mission of the College

The mission of the Honors College is to provide an enriched educational experience for academically motivated and talented students at Kent State University. We welcome students of diverse backgrounds and are firmly committed to advancing a diverse, inclusive and equitable community of scholars. We affirm that all members of the Honors College community are valued for their contributions and treated with dignity and respect. Each student in the college plays a vital role in enhancing and influencing critical debate, critical thinking and learning from each other through their individual stories and lived experiences. This synergy creates a unique and inclusive foundation on which students can explore and develop their sense of belonging.

Founded in 1933, the Honors College is at the center of Kent State University's tradition of providing special attention to undergraduates

with outstanding intellectual and creative ability. Within the framework of the larger university, with its diverse academic programs and excellent research and library facilities, the Honors College offers students enriched and challenging courses and programs, opportunities for close relationships with their peers and faculty, and careful advising to meet their interests and goals.

Academic Programs

Special Programs - Non-Degree

- Honors Program

Design Innovation (DI)

DI 10010 SURVEY OF DESIGN INNOVATION NODES 3 Credit Hours

Develop awareness and actively utilize the wide array of shared-resource laboratories and environments across Kent State University's eight campus system that are connected as part of the Design Innovation (DI) Ecosystem. Explore the context of maker-communities, emerging technologies and social innovation resources while working in collaborative cross-disciplinary teams to tackle projects that intentionally connect the capabilities of multiple DI Nodes.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

DI 20020 BE SMARTER THAN YOUR SMARTPHONE 3 Credit Hours

This course uses the development of the smart phone to illustrate the multi-disciplinary nature of design and innovation. It provides an understanding of the technologies that make the smartphone possible. Specifically, the course covers the role of research and design in product development, the changed in patterns and nature of our communications through smartphones, and the implications for businesses, markets and society. The aim of this course is to introduce the multidisciplinary nature of innovation using the smartphone as an example. It presents the complexities, challenges, and opportunities that the smartphone has created.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 3 lecture

Grade Mode: Standard Letter

DI 20100 INTRODUCTION TO DESIGN INNOVATION 3 Credit Hours

This course blends analytical skills, intuition and creative thinking to develop practical solutions to real world problems. Students will gain a high-level understanding of the design process through team-based projects tackling challenges. Design thinking, methods and strategies offer novel ways to discover market opportunities, experiment to validate concepts and mitigate risk, and deliver value to all. This will be a reflective lecture and small project-based course that addresses the programmatic, technical, business, social and human factors of design in a way that leads to innovation(s) in the development of integrated solutions. Learn how to engage with end users, effectively frame problems, identify potential solutions, build prototypes to test assumptions and learn what works (and doesn't). Then dive into a range of ways large and small to bring design innovation into your daily life.

Prerequisite: None.

Schedule Type: Laboratory, Lecture, Combined Lecture and Lab

Contact Hours: 2 lecture, 3 lab

Grade Mode: Standard Letter

DI 30099 CHALLENGE-BASED INNOVATION (ELR) 3 Credit Hours
 (Repeatable for credit) Challenge-Based Innovation (CBI) is a project and problem-based learning course, where multidisciplinary student teams and their instructors collaborate with faculty researchers, community and industry partners to discover novel solutions for the future of humankind. The projects are an elaborate mixture, proposed by cross-disciplinary faculty teams and derived from using research to tackle messy or complex problems to meet societal, human-driven needs. The multidisciplinary student teams act as catalysts in creating novel solutions to pressing problems.

Prerequisite: None.

Schedule Type: Laboratory, Lecture, Combined Lecture and Lab, Project or Capstone

Contact Hours: 2 lecture, 3 lab

Grade Mode: Standard Letter

Attributes: Experiential Learning Requirement

DI 49095 SPECIAL TOPICS IN DESIGN INNOVATION STUDIO 1-6 Credit Hours

(Repeatable for credit) Analysis and cross-disciplinary problem-solving of significant and current issues in design innovation not covered in existing design innovation courses. This studio course is offered when opportunities and resources permit; the topic is announced when the course is scheduled.

Prerequisite: None.

Schedule Type: Studio

Contact Hours: 2-6 other

Grade Mode: Standard Letter

DI 49099 DESIGN INNOVATION WORKSHOP (ELR) 1-4 Credit Hours

(Repeatable for credit) This course supports brief, intensive and interactive activities that address a narrowly defined range of problems in which the content is practical and concentrates on the acquisition of specific information and skills related to practices in design innovation. The variable credit format allows for intensive challenges that might occur in short periods, and that it might be focused on a single problem.

Prerequisite: None.

Schedule Type: Project or Capstone, Workshop

Contact Hours: 1-4 other

Grade Mode: Satisfactory/Unsatisfactory

Attributes: Experiential Learning Requirement

DI 49995 SPECIAL TOPICS IN DESIGN INNOVATION 1-3 Credit Hours

(Repeatable for credit) Analysis and cross-disciplinary problem-solving of significant and current issues in design innovation not covered in existing design innovation courses. This course is offered when opportunities and resources permit; the topic is announced when the course is scheduled.

Prerequisite: None.

Schedule Type: Lecture

Contact Hours: 1-3 lecture

Grade Mode: Standard Letter

DI 49999 DESIGN INNOVATION GRAND CHALLENGES STUDIO PROJECT (ELR) 3 Credit Hours

(Repeatable for credit) A cross disciplinary project-based capstone course that collaboratively focuses on a single grand challenge. Challenges range from those identified by GrandChallenges.org, "solving global health and development problems for those most in need" to one of the "Grand Challenges for Engineering", to one from the list regularly updated by the National Science Foundation, to a pressing challenge identified by the faculty. Taught by a multidisciplinary team of primary instructors with input from industry leaders with complementary expertise, the collaborative effort of students, faculty members, industry partners and-or community leaders, focuses on developing robust multi-perspective, actionable solutions considering multiple criteria including but not limited to technical, socio-cultural and economic dimensions. Outcomes range from early designs, to physical prototypes or policy solutions with an understanding of how to take them to a next phase. Travel component may be included.

Prerequisite: None.

Schedule Type: Project or Capstone

Contact Hours: 6 other

Grade Mode: Standard Letter

Attributes: Experiential Learning Requirement

Honors (HONR)

HONR 10010 HONORS LEADERSHIP ACADEMY 2 Credit Hours

This course will examine effective leadership in the public and nonprofit sectors from both a theoretical and practical perspective. Using course readings, discussions, and assignments students will be challenged and equipped to serve as actively engaged citizens at the university and in the greater community. Students will examine the complexities of generational leadership, working in groups, using effective communication, inspiring a shared vision and purpose, group problem solving, and decision making, ethical leadership, civic engagement, and leading in communities of difference. This class will feature multiple learning methods including lectures, class discussion, case studies, group exercises, in and out-of-class assignments, presentations, and self-reflection. This course aims to teach first semester Honors freshmen students how to be engaged Honors College leaders from the beginning of their college career.

Prerequisite: None.

Schedule Type: Seminar

Contact Hours: 2 lecture

Grade Mode: Standard Letter

HONR 10096 INDIVIDUAL HONORS WORK 1-4 Credit Hours

(Repeatable for credit) Directed independent study for freshmen in any department.

Prerequisite: Special approval of department.

Schedule Type: Individual Investigation

Contact Hours: 1-4 other

Grade Mode: Standard Letter-IP

HONR 10197 FRESHMAN HONORS COLLOQUIUM I (KCMP) 1-4 Credit Hours

(Repeatable for credit) Required of all honors freshmen in lieu of College Writing. Stresses exploration, discussion and communication of ideas expressed in works related to theme of colloquium.

Prerequisite: Admitted to the Honors College.

Schedule Type: Colloquium

Contact Hours: 1-4 other

Grade Mode: Standard Letter-IP

Attributes: Kent Core Composition

HONR 10297 FRESHMAN HONORS COLLOQUIUM II (KCMP) 1-4 Credit Hours

(Repeatable for credit) Continuation of HONR 10197.

Prerequisite: Admitted to the Honors College.

Schedule Type: Colloquium

Contact Hours: 1-4 other

Grade Mode: Standard Letter-IP

Attributes: Kent Core Composition

HONR 13597 COLLOQUIUM: THE WESTERN IDENTITY (KADL) 3 Credit Hours

(Repeatable for credit) Focuses on Western and non-Western cultures from a comparative perspective, in order to identify both different and shared values and to see how one's own culture shapes one's perspective, ideology, and values.

Prerequisite: Admitted to the Honors College; and special approval.

Schedule Type: Colloquium

Contact Hours: 3 lecture

Grade Mode: Standard Letter

Attributes: Kent Core Additional

HONR 20096 INDIVIDUAL HONORS WORK 1-4 Credit Hours

Admission Requirements

The Honors College seeks incoming students who demonstrate the potential for superior academic and creative ability at Kent State University. Admission to the Honors College for new undergraduate students is by invitation only. In addition to reviewing the student's admission application, the college conducts a holistic review of many variables, including, but not limited to, high school performance (curriculum, grade point average), essay, extra-curricular activities and work experiences. Standardized tests are considered but not required for admission to the Honors College.

Program Requirements

Honors section of courses can be used to meet requirements in all degree granting colleges and schools of the university and to also satisfy Kent Core requirements. All new honors students are enrolled in the year-long colloquium (HONR 10197 and HONR 10297). The colloquium is designed to be a rigorous course in reading, thinking and writing about literature and ideas. The goal of the courses are to develop habits of intellectual inquiry, mature understanding and effective communication that will serve the students through the college years and afterward.

Beyond the honors colloquium courses, many Honors courses are offered by distinguished faculty from academic departments throughout the university. Although these courses differ significantly in content, from art to zoology, they share a common form. Class enrollments are small, and students can get to know each other and their professors in an environment that encourages learning through discussion, reading, individual work and writing.

Seniors in the Honors College can conclude their undergraduate careers by completing a sustained scholarly or creative project under faculty guidance. Theses and projects have been submitted by seniors from all of the degree-granting colleges and schools at Kent State University and have ranged over many disciplines and areas of creative endeavor. Novels and plays have been written; research has been undertaken in the natural and social sciences; historical events and periods have been critically analyzed; architectural models have been proposed for urban renewal sites; and paintings and films have been created and exhibited. Each thesis/project attests to the willingness of Honors students to extend

learning beyond the classroom to self-directed efforts appropriate to the conclusion of an enriched program of study.

Graduation Requirements

The college offers three programs for Graduation with Honors. Although each has minimum overall GPA requirements, the primary emphasis is on the successful completion of an undergraduate degree program, including a Senior Honors Thesis or Project.

- Graduation with Departmental Honors requires completion of a Senior Honors Thesis or Project and a minimum 3.5 overall GPA. The requirements are sufficiently flexible to enable undergraduates who join the college in their junior year to participate in this program.
- Graduation with General Honors requires completion of a Senior Honors Thesis or Project plus 24 Honors College credit hours and a minimum 3.5 overall GPA.
- Graduation with University Honors requires completion of a Senior Honors Thesis or Project plus 24 Honors College credit hours and a minimum 3.8 overall GPA.

Students who do not wish to complete a Senior Honors Thesis or Project to graduate with Honors may alternatively finish 24 Honors College credit hours and achieve a minimum 3.25 overall GPA to graduate from the university as Honors College Scholars.

The Honors Concept

The Honors College is guided by two basic principles:

- The first is a responsibility to provide academic work that offers intellectual challenge to the best students in the university and demands of them the best effort of which they are capable. To this end, courses are designed to stretch the mind, sharpen skills and encourage high standards of performance.
- The second principle is a belief that, regardless of degree program, students should be liberally educated. That is, they should understand and appreciate the language, literature and history of our culture; the social, political and economic structure of our society; the creative achievements that enrich our lives; and the basic assumptions and substance of the natural sciences. Honors students are, therefore, encouraged to select courses that provide an understanding of the arts, humanities and sciences.

Honors Advising

Students meet with their Honors College advisors at least once per semester. During advising meetings, students are encouraged to develop long-range plans to organize their academic work and co-curricular experiences in accordance with their interests and career aspirations.

Community

The Stopher-Johnson complex is located at the center of campus. Honors student living there have the best of worlds - a nurturing and stimulating experience with other Honors students as well as convenient access to the surrounding Kent State campus community.

The Honors complex includes the three-story Johnson and Stopher Residence Halls, a library/computer room, a reception lobby and advising offices. Students live just steps from the Honors College dean and its academic advisors.

Student involvement in the affairs of the college is a tradition. For example, Honors students are eligible to serve on the Honors College College Advising Committee.

Scholarships

All new students who are admitted to the Honors College will automatically be considered for an Honors College scholarship award. Honors College scholarships are renewable for maximum eight semesters of undergraduate work, provided students remain in good standing with the Honors College. These scholarships are in addition to university awards.

Mission of the College

The mission of the University College is to help foster an inclusive environment that empowers all students to explore, engage and succeed.

The college's record of innovation includes 20 national awards, three internationally certified programs and nearly \$10 million in grant funding in the past several years.

Initiatives in the University College for students to succeed include the following:

- Students who regularly attend services offered by the Academic Success Center are 17 percent more likely to return for the next academic year and had a graduation rate 18.9% higher than their classmates.
- Students who attend Academic Success Center sessions GPA 0.26 points, on average, higher than their classmates.
- The college's Office of Career Exploration and Development helps our students find on-campus employment, and these students are more likely to earn higher grades and stay in school.
- Our Career Exploration and Development mantra is "Early and Often" – The results are that first-year students engage in career experiences at the same rate as junior and senior students.
- Students who participate in the Exploratory Advising Center's Exploratory Learning Community are nearly 10 percent more likely to return to Kent State compared to their peers.
- Student Support Services exceeded all Ohio Department of Education performance goals by 10 percent or more.

Admission Requirements

- Students must have one semester as a degree-seeking student at Kent State prior to their first co-op rotation.
- Students must be enrolled as a half- or full-time student (minimum 6 credit hours) in the semester prior to enrollment in the co-op education program.
- Students must have earned a minimum 2.000 overall GPA at the time of their co-op application.
- Students must have no holds on their student's record from any source (financial, academic, conduct).
- Cooperative position must be approved and relevant to students' career direction.
- Students must have received a completed grade and have resolved any outstanding non-completed grades for previous co-op rotations.
- International students must receive work authorization prior to enrolling in each co-op rotation.

The University College will work with the student's college to assess all applicants holistically, considering their academic progress, related experience, academic and extracurricular activities, among others, to evaluate the student's likelihood of success in the program.

Full Description

Students in Kent State University's Cooperative Education Program (co-op) enhance their degree program by relating theory to practice and applying what they have learned in the classroom to real-life workplace scenarios. This process of "learning by doing" increases student motivation and employability after graduation and maximizes student growth and development. Through a co-op experience, students explore career and academic options, test career choices, increase professional skills and earn money to contribute to educational expenses. Cooperative education experiences are highly desired, selective and in the student's chosen field.

All students participating in a co-op experience must register for COOP 20092 (non-credit, offered through University College) and pay the co-op fee. Enrollment in the course is restricted by special approval,

and students may only register after submission and approval of all application forms. Enrollment in the course will ensure the student is designated and reported as a full-time student and permit the student to have access to all student services and resources during the co-op semester. Students participating in a cooperative education course do not earn credit hours the semester away. As a result, students are not eligible to receive federal or state grants, student loans or institutional scholarships. However, students will be reported to their federal loan services as enrolled full-time, allowing for student loans to remain in the in-school deferment status and therefore not enter repayment.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

Full Description

The Exploratory pre-major affords a tremendous opportunity for students explore, engage and succeed with purpose—confidently declaring their major. . Students benefit from the guidance, advising and support offered in the Exploratory Program. Beginning in a student's first semester, academic advisors partner with students through their exploration process with a personalized Exploratory Plan.

The Exploratory pre-major does not lead to a degree. Students must declare a degree major by the time they have earned 45 credit hours at Kent State University.

The Exploratory pre-major comprises the following interest areas.

- **Aeronautics, Applied Engineering and Technology.** Are you curious about how things work? Are you a great problem solver, have a flare for detail and organizing and an interest in green technologies that can improve the quality of life for people? Maybe you enjoy using technology to get things done or to solve problems when they arise, or you spend time playing flight simulation video games. If so, you might wish to consider careers in aviation, emerging technologies, production or manufacturing and sustainability.
- **Biological Sciences, Health and Wellness.** Are you committed to improving the health and well-being of others? Do you like to study human behavior or want to pursue a career in nursing, nutrition, speech pathology and audiology, counseling or other health-related fields? You may want to consider a major in the area of biological sciences, health and wellness where you will learn to use the knowledge and techniques of biological and biomedical science as well as the knowledge of the helping professions to promote the maintenance of health and the prevention of illness.
- **Business.** Are you a problem solver and good communicator? Do you like to think strategically and lead others? You may find that a major in the area of business is right for you. Learn to analyze business problems through the development of skills in accounting, finance, economics and information systems and gain an understanding of real-world business problems through case studies and simulations.
- **Communications, Journalism and Media.** If you can imagine yourself writing for a major news organization, producing television shows and movies, providing corporate training and development, designing political or health campaigns, working as a social media manager,

creating advertising or public relations campaigns or working as a speech writer for CEOs or political leaders, majors in this field will appeal to you. Opportunities spanning multiple industries await you in TV, radio, film, print or electronic media, corporate communications, international business and diplomacy. Learn different aspects of communication and information theory, research, use and practice while engaging in scholarly investigations and practical applications of the elements and means of creating, managing, using and evaluating messages.

- **Computers, Mathematics and Information Sciences.** Can you easily solve a Rubik's cube or disentanglement puzzle, figure out logic teasers or optical illusions and decrypt secret message codes? These games of strategy are good indicators that your problem-solving and critical thinking skills could be applied to the study of information and computation, as well as the new area of digital sciences. Understand the properties, uses and impact of the programs used to implement software and use that understanding to create new programs or improve existing ones.
- **Design.** Do you enjoy the process of communicating through visual means – using illustration, photography, motion graphics or the Internet to express a concept or solve a problem? Are you intrigued by the use of lights, stage props and sound in theatre and dance productions to create unique environments? Or perhaps the environment you are interested in is one of residential and commercial spaces – the lighting, interior materials and color, signage and graphics or the very structure and form of a building. Are you admired for your sense of fashion and have an ability and interest in designing and constructing your concepts? A wide range of academic programs in design provide students with an opportunity to merge a creative life with a profession and to work individually, collaboratively or within an organization to bring value and beauty to our global community.
- **Education and Teaching.** Can you envision yourself shaping young minds and preparing them for a successful future? Do those who know you well describe you as nurturing, patient, organized, a multi-tasker good at explaining things and somewhat conventional in your views? If these adjectives resonate with you, then you'll probably find a rewarding career as an educator. For those interested in advanced degrees in schools, schooling, education in non-school settings and leadership positions, there are opportunities to add endorsements, licenses or degrees to strengthen knowledge in teaching, learning, administration and leadership in a variety of disciplines.
- **Government, Public Policy and Justice.** Are you able to resolve disputes? Are you committed to the pursuit of truth? If you are also a detailed problem solver, articulate communicator, and passionate about righting wrongs, you should explore majors in this area. Study the action, regulatory measures, laws, social service agency engagement, social justice and funding priorities developed by government, agencies or representatives, and use qualitative and quantitative methods to understand and assess their impact.
- **Human Services and Social Sciences.** Do you want to make a difference in the lives of others? As long as you are resourceful, committed, empathic and empowering, you can help to change the world. Start living out your calling by providing a voice for the people who need it most.
- **Languages, Literature and Culture.** Have you wondered about people and their roots and history? Do you enjoy languages? Study the creation, organization and use of human knowledge, belief and behavior. Investigate how the development of symbolic languages and social learning have impacted shared attitudes, values, goals

and practices associated with human institutions, organizations and groups.

- **Physical Sciences and the Environment.** If you are intrigued by the natural world and its sustainability, you may have happened upon your ideal area of study. You should be highly inquisitive, detail oriented, analytical and adventurous. Or, you may choose to prepare for scientific careers in the fascinating world of physical science, which uses experimental and quantitative methods to study, model and understand natural and physical phenomena.
- **Sport, Recreation and Hospitality.** Do you want to be in the business of playing? Your competitive, persistent nature will serve you well on the athletic field, as well as in sports management or marketing/promotion. You may also consider the hospitality industry and event planning or community-based park and wellness facilities. The ability to plan activities, motivate and involve participants is critical.
- **Visual and Performing Arts.** Do you find it exciting to express your ideas and emotions through art, music or dance? Are you intrigued by the process of staging productions? Do you enjoy studying the history of visual and performing arts? If you are disciplined, energetic and drawn to challenging artistic environments that demand your best, then a major in the visual and performing arts could be the right choice for you. Study at the graduate level fosters an exciting intersection between professional training and academic excellence where you are encouraged to create artistic projects that combine theory, history, criticism, pedagogy and interdisciplinary studies.

To assist students in making informed major choices by the time they reach 45 credit hours, all Exploratory students participate in personalized Exploration Plan. There are six main components of the Exploration Plan that students participate. Students will:

1. Select one of **13 areas of interest** to begin exploring. This is the first step and will be completed before the student's first semester.
2. Create a **Major Action Plan** using the results of a career readiness inventory and continuously update the plan until a major is declared.
3. Engage in the **Flashes 101** course (UC 10001), which will focus on the transition to college and utilizes a curriculum developed specifically for exploratory students, including career exploration, developing an awareness of diverse perspectives, learning about their strengths, interests and much more.
4. Enroll in **Coursework with Peers**, providing students with the opportunity to network with fellow peers and create study groups. Some of the courses include Kent Core and introductory courses.
5. Enroll in **Career Navigation** in the student's second semester. In this course, students explore themselves, explore careers, make connections and set career-related goals. As a bonus, if students are part of the Exploratory Learning Community, they will take this course with other learning community students.
6. Participate in the **Exploratory Learning Community**. The Exploratory Learning Community is designed to assist students in confidently selecting their major with programming focused on exploration of careers and majors, leadership and academic success. Joining the learning community is a great way for students to build connections with their peers and gain access to more support through their career and major exploration. The Exploratory Learning Community is housed in Lake Hall for students living on campus; however, Honors College students living in honors housing and students who commute may also join.

Each Exploratory student is assigned an academic advisor. The expert academic advisors are focused on partnering with the student. This

partnership includes guiding students through their personalized Exploration Plan, keeping them on track to declare their major (and staying on track to graduate as planned), and celebrating their major declaration and graduation. Exploratory academic advisors are housed in the Exploratory Advising Center; students have a minimum of one required meeting with an advisor each semester.

Leave of Absence for Graduate Students

ASK A QUESTION OR SUBMIT FEEDBACK ON THIS POLICY

A leave of absence is granted for degree-seeking graduate students in active status who must be away from their studies for one or more semesters for personal, family, financial or other compelling reasons. Prior to applying for a leave of absence, students should consider its potential implications for such matters as funding (including assistantships and veterans benefits), loan repayment, immigration status, health insurance, university housing and time-to-degree completion.

International students should contact the Office of Global Education before the initiation of a leave of absence and before returning to campus to ensure compliance with immigration regulations and visa restrictions.

To be eligible for a leave of absence, a student must be seeking a graduate degree, have completed at least one full term of enrollment prior to the date a leave is to begin, be in good academic standing and be making reasonable progress toward the degree. Leaves will not be granted to students who fit one of the following criteria:

- Completed less than one full term of enrollment
- Not in good academic standing
- Received an extension of the degree time limit

Leaves of absence are granted for a maximum of three consecutive terms (e.g., fall, spring, summer).¹ Students may request an extension for maximum one additional term. Although a leave may be taken for as many as 12 months, students are encouraged to return to graduate study as soon as is reasonably possible to minimize the impact of the leave on degree progress. The time taken on an approved leave of absence is not included in the time limitations for degree completion and advancement to candidacy, with the exception of the Doctor of Podiatric Medicine degree.

¹ Refer to the College of Podiatric Medicine section in the University Catalog for leave of absence time limits and procedures for requesting a leave of absence for the Doctor of Podiatric Medicine degree.

The Request for Leave of Absence form should be submitted prior to the start of the term for which the leave is requested, when the necessity for leave is foreseeable. If the need for a leave is not foreseeable, the request should be submitted as soon as possible, but no later than the last day of classes in the term during which the leave has been taken. A retroactive leave of absence will not be granted.

When a department/school grants a leave of absence, it implies the program will be willing to re-admit the student. A plan for re-admission, including any conditions that must be met, should be put in writing and clearly understood by all parties prior to the start of the leave.

Students who are registered for courses must drop or withdraw from all courses prior to taking leave. Course withdrawal does not negate a student's financial obligation, and students will be held responsible for all balances due to the university. Any applicable refunds will be processed per university policy 7-06 regarding student fee refunds, see the Policy Register. Students are advised to check with the Financial, Billing and Enrollment Center prior to taking an approved leave of absence in order to determine the status of their student accounts. Accounts that are overdue will be subject to regular procedures in accordance with university guidelines, notwithstanding any approved leave of absence.

Course withdrawal is not permitted after the tenth week of the fall and spring semesters (or the prorated deadline for flexibly scheduled sections and summer terms). Students applying for a leave of absence after the course withdrawal deadline should address grading and course completion issues with their individual instructors. To consider any variation from this rule for reasons of extenuating circumstances, the student must submit a Petition for Exception to Registration to the University Registrar.

Students on a leave of absence are not registered and, therefore, do not have the rights and privileges of registered students, including course pre-registration and access to the libraries, recreational center and health services. They cannot fulfill any official department or university requirements during the leave period, such as taking qualifying exams or submitting a dissertation/thesis. Students on an approved leave must complete the Application for Graduate Re-Enrollment form in order to register for classes and have the rights and privileges of registered students.

If a student does not return to the graduate program within the approved period for which the leave of absence was granted, he or she will be considered as having permanently withdrawn from the university. To be reconsidered for graduate study, students who have permanently withdrawn must formally apply to their program of interest, including the submission of an application, the non-refundable application fee and any necessary application materials.
